

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

JOURNEYS OF LA SALLE
VOLUME I

The Trail Makers *A Library of History and*

Prof. John Bach MacMaster, Consulting Ed. *Exploration.*

With Introductions, Illustrations, and Maps. 17 Volumes

Each 12mo. \$1.00, net per volume.

The Journey of Alvar Núñez Cabeza de Vaca, and his companions from Florida to the Pacific. 1528-1536.

Translated by Fanny Bandelier, edited with an introduction by Ad. F. Bandelier.

Narratives of the Career of Hernando de Soto in the Conquest of Florida, 1539-1542, as told by a gentleman of Elvas, by Luys Hernandez de Bledman and by Rodrigo Kanjel.

Edited with an introduction by Prof. Edward Gaylord Bourne, of Yale University. In two volumes.

The Journey of Coronado, 1540-42. From the City of Mexico to the Buffalo Plains of Kansas and Nebraska.

Translated and Edited with an Introduction by George Parker Winship.

Voyages and Explorations of Samuel de Champlain.

Translated by Annie Nettleton Bourne. Edited with an Introduction, by Prof. Edward Gaylord Bourne, of Yale University. In two volumes. (In Press).

The Journey of La Salle and his Companions, 1678-1687.

Edited with an Introduction by Prof. I. J. Cox, of the University of Cincinnati. In two volumes.

Voyages from Montreal through the Continent of North America to the Frozen and Pacific Oceans in 1789 and 1793.

By Alexander Mackenzie. In two volumes.

History of the Expedition Under the Command of Captains Lewis and Clark to the Sources of the Missouri. Across the Rocky Mountains Down the Columbia River to the Pacific in 1844-6.

With an Account of the Louisiana Purchase, by Prof. John Bach MacMaster, and an Introduction identifying the route. In three volumes.

A History of the Five Indian Nations of Canada Which Are Dependent upon the Province of New York.

By Cadwallader Colden, Surveyor-General of the Colony of New York. In two volumes.

A Journal of Voyages and Travels in the Interior of North America.

By Daniel Williams Harmon, a partner in the Northwest Company, (beginning in 1800).

The Wild Northland. The Story of a Winter Journey with Dogs Across Northern North America. 1872-3.

By Gen. Sir Wm. Francis Butler, K. C. B.

A. S. BARNES & CO.

From a portrait in Gravier's "Découvertes de la saïe."

THE JOURNEYS OF RÉNÉ ROBERT CAVELIER SIEUR DE LA SALLE

As Related by His Faithful Lieutenant, HENRI DE TONTY; His Missionary Colleagues, Fathers ZENOBIUS MEMBRÉ, LOUIS HENNEPIN, and ANASTASIUS DOUAY; His Early Biographer, Father CHRISTIAN LECLERCQ; His Trusted Subordinate, HENRI JOUTEL; and His Brother, JEAN CAVELIER: Together with Memoirs, Commissions, etc.

INTRODUCTION

THE career of René Robert Cavelier, Sieur de La Salle, in a measure links the exploits of his compatriot Champlain, in the North, with those of Cabeza de Vaca, De Soto and Coronado, in the South and Southwest, and thus fittingly closes the heroic period of Spanish and French exploration in North America. Champlain, in his search for an illusory western sea, was facing in the direction of a possible colonial empire, but his knowledge was too limited and the resources of his colony too meagre to permit him to develop it. The Spaniards De Vaca, De Soto, and Coronado, whose narratives have already appeared in *The Trail Makers*, had preceded La Salle nearly a century and a half, but for this long period their suggestion of colonial expansion in the Mississippi Valley had remained unheeded. It is true that an occasional memoir—such as that of Father Benavides,

INTRODUCTION

in 1630¹—directed the attention of the Spanish government to the vast region between the Rio Grande and the Florida peninsula; but no motive other than a religious one called for its occupation, and it was suffered to remain in the unchallenged possession of the savages. It was La Salle's mission, indirectly, to arouse the Spaniards from their colonial lethargy, while he determined that the supposed route to the South Sea and the Far East was but the great central highway of the American Continent, opening an appropriate field for a new French colonial empire.

The sword of the bigoted Spaniard and the commercial enterprise of Elizabethan courtier and sailor determined the fact that the French must approach the interior by way of the St. Lawrence. During the first decade of the seventeenth century Champlain established upon this river an uncertain base for missionary and commercial endeavor. From this vantage point he and his Recollect companions pushed as far west as Georgian Bay. By 1634 Nicollet reached Green Bay, a western estuary of Lake

¹ Benavides "Memorial," MSS. Lenox Branch, New York Public Library.

INTRODUCTION

Michigan. Here for a time, owing to the death of the great pioneer of French exploration and the religious complications following the substitution of Jesuit missionaries for the Recollects, the thin current of French migration ceased, except for occasional fur-trading expeditions. Even during this period of restricted life upon the St. Lawrence there came those same uncertain rumors of great western waters that had deceived Champlain; and when, with renewed government activity, the western movement again began, a prominent motive that urged it forward was the solution of this geographical problem—a problem that engaged the attention of New France's greatest governor-general, the Count of Frontenac, and the energies of its most intrepid explorer, the subject of these volumes.

The French occupation of the Mississippi Valley, to use a somewhat clumsy figure of speech, resembled a wedge whose apex was aimed at the mouth of the great river, whose eastern side threatened not merely to restrain the English beyond the mountains, but to push the Spaniards out of Florida, while its other side measurably encroached

INTRODUCTION

upon the uncertain regions west of the Mississippi. The placing of this wedge and the peculiar initial impulse which made its force felt in the distant viceroyalty of New Spain constituted the principal task of La Salle. The ultimate success of this great movement of colonial physics in pushing undersirable rivals out of the fairest portion of the American Continent depended upon the energy with which the French government followed up this initial impulse. The fact that it did not adequately do so should not in any measure detract from the genius of the man who conceived the proper force and who, despite almost insuperable obstacles, had the courage to apply it.

It is but fitting, then, that in *The Trail Makers* the life-work of La Salle should form the closing volumes devoted to the great French and Spanish inland explorers. De Vaca skirted the southern edge of the Mississippi Valley, De Soto entered it from the east, and Coronado approached it from the west. Champlain almost solved the problem of reaching it from the north; but it was left for La Salle, from an uncertain base and with vastly more slender resources than the two great Spaniards, to demon-

INTRODUCTION

strate the possibility of entering this great valley and to be first to lead the way in its effective occupation.

Even during the period of governmental inaction, which terminated in 1663, La Salle had his precursors, whose labor was of direct stimulus and aid to him. Jesuit missionaries, during their brief sojourn among the Hurons, heard occasional stories of a great western river flowing into the South Sea. Adventurous traders, among whom the most notable were Grosseilliers and Radisson, explored the shores of Lake Superior and possibly penetrated to the Mississippi. After 1661 Colbert, in France, and Tracy, Courcelles and Talon, in Canada, took up with energy the task of exploration abandoned some thirty years before. The Jesuit Allouez established missions upon Green Bay and the Fox River. The trader Joliet and the Jesuit Marquette were despatched in quest of the great western water, and after passing by the Fox-Wisconsin portage, in June, 1673, they began the first undoubted French exploration of the Mississippi itself. The final completion of this task fell to those whose deeds are reported in the following pages.

INTRODUCTION

René Robert Cavelier, Sieur de La Salle, was born in Rouen, France, in November, 1643. Of a wealthy family, he received an excellent education, especially in mathematics. As a youth he probably had some connection with the Jesuits, but he early left their order. In 1666 he came to Canada, where a brother—a member of the Sulpitian order at Montreal—had already preceded him. Doubtless through the influence of this brother, he obtained, in 1667, a large grant of land at the rapids afterwards known as La Chine—a name suggestive of western exploration that still hoped to reach the distant East.

Although applying himself to his task as proprietor with commendable industry and meeting with a reasonable degree of success, other duties than those of *Seigneur* under the Old Régime in Canada appealed to the ambitious Frenchman. He made short excursions to the west and north, so as to satisfy himself that no way to the western sea lay in those directions. He acquired some practical knowledge in the Indian tongues and in methods of dealing with the natives, for his position on the St. Lawrence gave him a partial monopoly of

INTRODUCTION

the fur trade. Finally, during the winter of 1668-69, he learned from a chance party of Senecas that a great river arose in their country, and after a course entailing a canoe voyage of eight or nine months, emptied into the sea.

This report aroused the explorer in La Salle, for he conceived the possibility of discovering the long-desired channel to the South Sea. With him, to dream was to act, and his action, approved by Courcelles and Talon, implied the disposal of his estate to provide funds for the undertaking. Before this was accomplished the prudent governor had combined La Salle's scheme with a project of the Sulpitians to establish missions among the western Indians. Thus the expedition that left La Chine, in July, 1669, was a double-headed one, with Dollier and Gallinée representing the churchly element, and La Salle the equally enticing spirit of adventurous exploration.

It was La Salle's misfortune thus to begin his career as explorer, as well as to end it, with the handicap of divided responsibility. We may then naturally expect this expedition to result largely in a failure. Passing to Irondequoit Bay, on the south-

INTRODUCTION

ern shore of Lake Ontario, the explorers made a fruitless journey to the Seneca villages. Returning thence, they passed to the western end of Ontario, where they encountered Joliet and a companion, homeward bound from Lake Superior. Here the party separated, Dollier and Gallinée passing westward by Joliet's route, while La Salle turned to the southward.

After leaving his Sulpitian comrades La Salle's movements are enveloped in great uncertainty. From later and not wholly reliable reports, apparently based upon his own statements, he, with a few attendants, passed from Lake Ontario to the Alleghany River, and thence down that stream and the Ohio, as far as the present city of Louisville. Here he was deserted by his men and forced to return alone to Canada. The claim has been made, but without sufficient foundation, that La Salle, in 1670, continued on down the Ohio until he reached the Mississippi, and during the following year returned to that great river—this time by the Chicago-Illinois portage. Although it is reasonably certain that La Salle did not thus reach the Mississippi before Joliet and Marquette, it is more than possible that

INTRODUCTION

at this period he explored the upper courses of both the Ohio and the Illinois.

From the uncertainty of these four years La Salle emerges, in 1673, as the assistant of Frontenac in erecting a fort upon the shores of Lake Ontario. The immediate object of these confederates was to overawe the Iroquois and to control the western fur trade; and the furtherance of this object included the erection of a fort on the Niagara River and the construction of a vessel on Lake Erie. These evident aims of the governor aroused a host of enemies against him and his young subordinate, including not merely Dutch and English traders and the Iroquois, as we should naturally expect, but also Canadians and Jesuits, for he was running counter to their cherished plans to control the fur trade and evangelize the natives.

Owing to the vigorous opposition of these domestic enemies, Frontenac was constrained, in the fall of 1674, to send La Salle to France to provide for the future maintenance of this western outpost, to which the name of Fort Frontenac (now Kingston) had been given. In accordance with evident prearrangement with Fron-

INTRODUCTION

tenac, La Salle petitioned for a seigneurial grant which included this fort and the surrounding region. In return he agreed to reimburse Frontenac for the expense incurred in its construction and to rebuild it in masonry. This undertaking involved an expense which was destined greatly to handicap his future movements; and as a recompense for his service and others which he expected to render the crown of France, he also petitioned for a patent of nobility.

Obtaining a favorable response to both his petitions, he returned to Canada, late in 1675, in company with a future companion, the Recollect friar, Louis Hennepin. Secure in the favor of the governor-general, with a grant including the most valuable seigneury in New France and a practical monopoly of the western fur trade, La Salle had every prospect of becoming the most wealthy proprietor of the colony, and at the same time of advancing materially the fortunes of his patron. He spent the next two years in establishing his grant more firmly by rebuilding the fort, introducing settlers, and constructing vessels to ply on Lake Ontario. At the end of this time report

INTRODUCTION

credited him with an annual income of 25,000 *livres*.

As in the case of his former seigneurie at La Chine, it was La Salle the idealist, rather than La Salle the man of affairs, that now forged to the front. His ambition extended far beyond his western outpost, and embraced a national scope as well as a personal one. The great river of earlier report, reached but not fully explored by Joliet and Marquette, La Salle now believed to enter the Gulf of Mexico. To prove this fact, to seize and fortify its mouth against English and Spanish interference, and to monopolize its trade in buffalo skins and other peltries, became his great ambition—an ambition that advanced the territorial pretensions of his nation equally with his own private fortunes.

In pursuit of his ideal, La Salle embarked for France in November, 1677, and shortly after his arrival presented a memorial to Colbert,² asking for a confirmation of his seigneurial tenure, with additional powers, for the space of five years, to establish other posts to the south and west of Fort Frontenac. On May 12, 1678, he received his

² Margry, "Decouvertes," etc., I, 329-336.

INTRODUCTION

coveted patent, granting him the country "through which, to all appearance, a way may be found to Mexico." To this grant, which was to be carried on without expense to the crown, was attached the condition that he should not trade with those tribes that would naturally carry their furs to Montreal.

La Salle was successful in inducing his friends and relatives to finance his enterprise. He engaged ship-carpenters and and other mechanics for the construction of two vessels—one upon Lake Erie and the other upon some branch of the Mississippi. He enlisted the services of a subordinate, La Motte de Lussière, but, more fortunate still, of his most noted lieutenant, Henri de Tonty (or Tonti). In company with these he reached Quebec in September, 1678, where he found awaiting him Hennepin, eager to engage in the new enterprise.

From this point on, the documents given in these two volumes tell in detail the story of La Salle's wanderings, but it may be well to indicate the main features. These journeys group themselves naturally into two main divisions—his Mississippi explo-

INTRODUCTION

rations, from 1679 to 1683, and his Texas journeys, from 1684 till his death, in 1687. During the former period La Salle built the first sailing vessel on Lake Erie, erected Fort Miami on the St. Joseph and Fort Crevecoeur on the Illinois, performed his wonderful winter march from the latter to Fort Frontenac, organized an Indian confederacy against the Iroquois, explored the Mississippi to its mouth after his subordinate Hennepin had explored its upper course to the Falls of St. Anthony, and erected Fort St. Louis on the Illinois as a stronghold against the all-powerful Iroquois. In 1683 his patron Frontenac was recalled and La Salle himself relieved of his expiring grant. Late in this year he arrived in France, again a petitioner, with almost nothing tangible to show as the result of five years of effort.

The bankrupt explorer courageously ushered in the final period of his life by presenting to Seignelay, son of Colbert and now minister of the marine, the two memoirs which appear in the following pages. In connection with one proposal therein outlined—the invasion of New Biscay—there has arisen a mooted ques-

INTRODUCTION

tion concerning his connection with the Spanish adventurer, Peñalosa, then urging a similar invasion by the channel of the Rio Grande or the Pánuco. The similarity of their plans has led to the suspicion of collusion, but it is probable that La Salle became acquainted with the adventurer, and then merely appropriated what was best in the latter's project, to bolster up his own. He may be partially justified in this course by the fact that Peñalosa was pursuing a like policy with him. Possibly La Salle, as other authorities intimate, may have had some expectation that Peñalosa would follow him, but if so, it would simply be as an independent venture.

The details of this last disastrous voyage, the divided responsibility, the resultant quarrels between La Salle and Beaujeu, the mistaken landing upon the coast of Texas, the fruitless efforts of La Salle to find his "fatal river," his pitiable death at the hands of his own men, and the subsequent wanderings of the remnant of his party that finally reached France, have been graphically pictured by his faithful follower, Joutel, whose abridged narrative forms the main portion of our second

INTRODUCTION

volume. It is well to note, however, that the documents published by Margry give a much more favorable view of Beaujeu's conduct than do the accounts of Joutel or of Cavelier. The course of La Salle during his Texas journey is shown, even by his friends, to be highly erratic, while Beaujeu appears in the light of the practical man of affairs. The careful student of the period must acknowledge that there is a great deal of uncertainty and vacillation in La Salle's movements during the critical moments of this unfortunate expedition. Perhaps the vicissitudes through which he had passed during two strenuous decades of frontier exploration had affected his judgment and rendered him what he proved to be—an unfortunate leader.

Any formal estimate of the character of La Salle would clearly be out of place in this work. Gravier, in his *Découvertes et Etablissements de Cavelier de La Salle*, and Margry in the introduction to his *Découvertes et Etablissements des Français*, give, in French, a detailed and far too favorable picture of their illustrious fellow-townsmen. Parkman's brilliant characterizations, often quoted *verbatim* from the

INTRODUCTION

original sources, in a measure are subject to the same criticism. Shea, in his various editorial notes, minimizes the work of La Salle, and in a way that is far from just. Winsor, in his *Cartiér to Frontenac*, occupies a middle position and one probably more nearly true than the others. He, however, overestimates the connection between La Salle and Peñalosa in the Texas voyage. The testimony of contemporary writers seems to show that La Salle had a few influential friends who were distinguished by their loyalty to him and by their confidence in his ultimate success. His enemies were numerous and vindictive, but he neither took the pains to conciliate them, nor apparently had he the tact to do so, had he tried. He was coldly ambitious, reserved to hauteur, over-confident in his own judgment, with great natural ability and equal determination, imaginative to a fault, and consequently often more visionary than practical. Had he been allowed to carry out his plans unopposed, it is hardly too much to say that more than one seven years' war would have been necessary to shake the hold of France upon the interior; but when those plans ran counter to the

INTRODUCTION

schemes of Jesuit missionaries and irresponsible fur traders, human nature, to mention nothing higher, could not be restrained from persistent opposition. Yet the essential failure of his colonizing and monopoly projects should not obscure his real services as the greatest French explorer of the Mississippi Valley.

The plan of these two volumes devoted to La Salle seems to require some explanation. The various documents here reprinted are found in French's *Historical Collections of Louisiana*, Part I; Shea's *Discovery and Exploration of the Mississippi Valley*, (Part IV of the *Historical Collections*), and Shea's *Early Voyages up and down the Mississippi*. The editor has followed closely the text of these volumes, except where a careful collation with later editions of these same documents has shown a better reading. Some of the editorial notes appearing in the above volumes have also been omitted—in some cases because incorrect or obsolete, in others because of very little interest except to the special student. Where this has been done the bibliographies in the appendix will enable the curious reader, who has access to the

INTRODUCTION

original volumes, readily to ascertain just what has been changed or omitted.

Although the scope of the volumes will quickly appear from a cursory examination of the table of contents, an additional word of explanation may be helpful.

The first volume is composed of miscellaneous documents relating to the Mississippi and the Texas expedition, while the second is devoted to Joutel's narrative of the latter. Among the writers represented in the first volume are Tonty, Hennepin, Le Clercq, Membré, Douay, Cavelier, brother of the explorer, and La Salle himself. The somewhat heterogenous character of the volume is modified by the fact that Tonty, the first and most important of those mentioned, treats of the whole period of which the others, in a measure, give supplementary accounts.

The list includes all of those who from personal knowledge have written at length concerning La Salle, while the documents reprinted comprise nearly all the original material relating to him that is available in English. Two notable exceptions will at once occur to the special student—the various translations from Margry, pub-

INTRODUCTION

lished by the Caxton Club, and the *Description of Louisiana*, or its later form, the *New Discovery*, of Hennepin. The publications of the Caxton Club, of course, cannot yet be reprinted, while Hennepin's works are too long for these volumes and can be obtained in recent editions by Shea and by Thwaites. However, a portion of the brief résumé of the *Nouvelle Découverte*, which appears in the first volume of the *Historical Collections*, has been inserted in order to add Hennepin to our list.

The general subject of annotation opens up the opportunity to bury under a multitude of notes the text of an edition of such writers as those here presented. The limits of the volume made necessary the policy of giving but few notes, and those only which appear to be indispensable. By use of the bibliographies one may note the texts of differing contemporaries and from them draw his own conclusions. In such brief annotation as the editor has used, it is but fitting for him to acknowledge his indebtedness to the labors of Shea and of Thwaites.

Most of the documents are reprinted in the form given by French and by Shea,

INTRODUCTION

but the more extended narratives of Tonty, Douay, Cavelier, and Joutel have been broken up into convenient chapters, without, however, interfering with their continuity. With reference to Joutel, the natural and desirable arrangement to follow would have been the divisions of Margry's fuller text; but this would have meant too many chapters and chapters of unequal length. Accordingly, a more arbitrary arrangement has been followed, but one which permits a ready comparison with Margry. The shorter narratives appear in a single chapter. This chapter-division permits a series of comparative bibliographic notes, which the editor hopes will prove helpful in locating, by chronological periods, the original sources relating to the great explorer.

Two appendices appear in the second volume. The first contains certain legal documents relating to La Salle; the second contains two bibliographies, one of which is a classified list of the source material and secondary works relating to La Salle, and the other the series of bibliographical notes referred to at the close of the preceding paragraph. These notes give cross-references to the documents printed in these

INTRODUCTION

volumes and also to other readily available sources. The editor has attempted to make these bibliographies serviceable rather than minutely complete.

In conclusion the editor wishes to express his appreciation for many courtesies and privileges extended to him while working in the Cincinnati Public Library, the Library of the University of Cincinnati, the Columbia University Library, and the Lenox Branch of the New York Public Library.

MEMOIR,¹

BY

THE SIEUR DE LA TONTY.²

"MEMOIR SENT IN 1693, ON THE DISCOVERY OF THE MISSISSIPPI AND THE NEIGHBORING NATIONS BY M. D. LA SALLE, FROM THE YEAR 1678 TO THE TIME OF HIS DEATH, AND BY THE SIEUR DE TONTY TO THE YEAR 1691."

CHAPTER I

AFTER having been eight years in the French service, by land and by sea, and having had a hand shot off in Sicily by a grenade, I resolved to return to France to solicit employment. At that time the late

¹ This Memoir forms the basis of a spurious work, printed in Paris, 1697, entitled "Derniers Découvertes dans l'Amerique Septentrionale, de M. de la Salle, par Chevalier Tonti, Gouverneur du Fort St. Louis, aux Illinois, Paris, 1697."

² For bibliographic notices for this and the following chapters consult Vol. II., App. II. B.

JOURNEYS OF

M. CAVELIER DE LA SALLE came to Court, a man of great intelligence and merit, who sought to obtain leave to discover the Gulf of Mexico by crossing the southern countries of North America. Having obtained of the King the permission he desired through the favor of the late M. Colbert and M. de Seignelai, the late Monseigneur the Prince Conty, who was acquainted with him, and who honored me with his favor, directed me to him to be allowed to accompany him in his long journeys, which he very willingly assented to. We sailed from Rochelle on the 14th of July, 1678, and arrived at Quebec on the 15th of September following. We recruited there for some days, and after having taken leave of M. de Frontenac, ascended the St. Lawrence as far as Fort Frontenac (Kingston), 120 leagues from Quebec, on the banks of the Lake Frontenac (Lake Ontario), which is about 300 leagues round. After staying there four days, we embarked in a boat of 40 tons burthen to cross the lake, and on Christmas day we were opposite a village called Isonnoutouan, to which M. de la Salle sent some canoes to procure Indian corn for our subsistence. From thence we sailed towards Niagara, intending to look for a place above the Falls where a boat

LA SALLE

might be built. The winds were so contrary that we could not approach it nearer than nine leagues, which obliged us to go by land. We found there some cabins of the Iroquois, who received us well. We slept there, and the next day we went three leagues further up to look for a good place to build a boat, and there encamped. The boat we came in was lost through the obstinacy of the pilot, whom M. de la Salle had ordered to bring it ashore. The crew and the things in it were saved. M. de la Salle determined to return to Fort Frontenac over the ice, and I remained in command at Niagara, with a Father Recollet and 30 men. The boat was completed in the spring [in August] of 1679. M. de la Salle joined us with two other boats, and several men to assist us to work the boat up the Rapids, which I was not able to ascend on account of the weakness of my crew. He directed me to proceed and wait for him at the extremity of Lake Erie, at a place called Detroit, 120 leagues from Niagara, to join some Frenchmen whom he had sent off the last autumn. I embarked in a canoe of bark, and when we were near Detroit the boat came up. We got into it, and continued our voyage as far as Michilimakinac, where we arrived at the end

JOURNEYS OF

[27th] of August, having crossed two lakes larger than that of Frontenac (Ontario). We remained there some days to rest ourselves, and as M. de la Salle intended to go to the Illinois, he sent me to the Falls of St. Mary, which is situated where Lake Superior discharges itself into Lake Huron, to look for some men who had deserted, and he in the meantime sailed for the Lake Illinois. Having arrived at Poutouatamis, an Illinois village, the calumet was sung, during which ceremony presents were given and received. There is a post placed in the midst of the assembly, where those who wish to make known their great deeds in war, striking the post, declaim on the deeds they have done. This ceremony takes place in presence of those with whom they wish to make friendship, the calumet being the symbol of peace. M. de la Salle sent his boat back to Niagara to fetch the things he wanted, and, embarking in a canoe, continued his voyage to the Miamis River, and there commenced building a house. In the meantime I came up with the deserters, and brought them back to within 30 leagues of the Miamis River, where I was obliged to leave my men, in order to hunt, our provisions failing us. I then went on to join M. de la Salle. When I arrived he told me

LA SALLE

he wished that all the men had come with me in order that he might proceed to the Illinois. I therefore retraced my way to find them, but the violence of the wind forced me to land, and our canoe was upset by the violence of the waves. It was, however, saved, but everything that was in it was lost, and for want of provisions we lived for three days on acorns. I sent word of what had happened to M. de la Salle, and he directed me to join him. I went back in my little canoe, and as soon as I arrived we ascended 25 leagues, as far as the portage, where the men whom I had left behind joined us. We made the portage, which extends about two leagues, and came to the source of the Illinois River. We embarked there, and ascending [descending] the river for 100 leagues, arrived at a village of the savages. They were absent hunting, and as we had no provisions we opened some *caches*^a of Indian corn.

During this journey some of our Frenchmen were so fatigued that they determined

^a "The term *cache*, meaning a place of concealment, was originally used by the French Canadian trappers and traders. It is made by digging a hole in the ground, somewhat in the shape of a jug, which is lined with dry sticks, grass, or anything else that will protect its contents from the dampness of the earth. In this place the goods to be concealed are carefully stowed away."—*Gregg's Commerce of the Prairies*, vol. I., p. 68.

JOURNEYS OF

to leave us, but the night they intended to go was so cold that their plan was broken up. We continued our route, in order to join the savages, and found them 30 leagues above [below] the village. When they saw us they thought we were Iroquois, and put themselves on the defensive and made their women run into the woods; but when they recognized us the women were called back with their children, and the calumet was danced to M. de la Salle and me, in order to mark their desire to live in peace with us. We gave them some merchandise for the corn which he had taken in their village. This was on the 3d of January, 1679-80.

As it was necessary to fortify ourselves during the winter we made a fort which was called *Crevecœur*.⁴ Part of our people deserted, and they had even put poison into our kettle. M. de la Salle was poisoned, but he was saved by some antidote a friend had given to him in France. The desertion of these men gave us less annoyance than the effect which it had on the minds of the savages. The enemies of M. de la Salle had spread a report among the Illinois that we were friends of the Iroquois, who are their greatest enemies. The

[⁴ For a discussion of the name cf. Vol. I, page 104.]

LA SALLE

effect thus produced will be seen hereafter.

M. de la Salle commenced building a boat to descend the river. He sent a Father Recollet [Hennepin], with the Sieur Deau, to discover the nation of the Sioux, 400 leagues from the Illinois on the Mississippi River southwards, [northwards] a river that runs not less than 800 leagues to the sea without rapids. He determined to go himself by land to Fort Frontenac, because he had heard nothing of the boat which he had sent to Niagara. He gave me the command of this place, and left us on the 22d of March, with five men. On his road he met with two men, whom he had sent in the autumn to Michilimakinac to obtain news of his boat. They assured him that it had not come down, and he therefore determined to continue his journey. The two men were sent to me with orders to go to the old village to visit a high rock, and to build a strong fort upon it. Whilst I was proceeding thither all my men deserted, and took away everything that was most valuable. They left me with two Recollets and three men, newly arrived from France, stripped of everything and at the mercy of the savages. All that I could do was to send an authentic account of the affair to M. de la Salle. He laid wait for them on Lake

JOURNEYS OF

Frontenac, took some of them and killed others, after which he returned to the Illinois. As for his boat, it was never heard of.

During the time this happened the Illinois were greatly alarmed at seeing a party of 600 Iroquois. It was then near the month of September. The desertion of our men, and the journey of M. de la Salle to Fort Frontenac, made the savages suspect that we intended to betray them. They severely reproached me on the arrival of their enemies. As I was so recently come from France and was not then acquainted with their manners, I was embarrassed at this event and determined to go to the enemy with necklaces, and to tell them that I was surprised they should come to make war with a nation dependent on the government of New France, and which M. de la Salle, whom they esteemed, governed. An Illinois accompanied me, and we separated ourselves from the body of the Illinois, who, to the number of 400 only, were fighting with the enemy. When I was within gunshot the Iroquois shot at us, seized me, took the necklace from my hand, and one of them plunged a knife into my breast, wounding a rib near the heart. However, having recognized me, they carried me into

LA SALLE

the midst of the camp, and asked me what I came for. I gave them to understand that the Illinois were under the protection of the King of France and of the Governor of the country, and that I was surprised that they wished to break with the French, and not to continue at peace. All this time skirmishing was going on on both sides, and a warrior came to give notice that their left wing was giving way, and that they had recognized some Frenchmen among the Illinois, who shot at them. On this they were greatly irritated against me, and held a council on what they should do with me. There was a man behind me with a knife in his hand, who every now and then lifted up my hair. They were divided in opinion. Tégantouki, chief of the Isonoutouan, [Senecas] desired to have me burnt. Agoasto, chief of the Onnoutagues, [Onandagas] wished to have me set at liberty, as a friend of M. de la Salle, and he carried his point. They agreed that, in order to deceive the Illinois, they should give me a necklace of porcelain beads to prove that they also were children of the Governor, and ought to unite and make a good peace. They sent me to deliver this message to the Illinois. I had much difficulty in reaching them, on account of the blood I had lost, both from my wound

JOURNEYS OF

and from my mouth. On my way I met the Fathers Gabriel de la Ribourde and Zenoble Membré, who were coming to look after me.⁵ They expressed great joy that these barbarians had not put me to death. We went together to the Illinois, to whom I reported the sentiments of the Iroquois, adding, however, that they must not altogether trust them. They retired within their village, but seeing the Iroquois present themselves every day in battle array, they went to rejoin their wives and children, three leagues off. When they went I was left with the two Recollets and three Frenchmen. The Iroquois made a fort in their village, and left us in a cabin at some distance from their fort. Two days after, the Illinois appearing on the neighboring hills, the Iroquois thought that we had some communication with them; this obliged them to take us within their fort. They pressed me to return to the Illinois and induce them to make a treaty of peace. They gave me one of their own nation as a hostage, and I went with Father Zenoble. The Iroquois remained with the Illinois, and one of the latter came with me. When we got to the fort, instead of mending matters,

[⁵ For Membré's account of this encounter see Vol. I., page 119.]

LA SALLE

he spoilt them entirely by owning that they had in all only 400 men, and that the rest of their young men were gone to war, and that if the Iroquois really wished for peace they were ready to give them the beaver skins and some slaves which they had. The Iroquois called me to them and loaded me with reproaches; they told me that I was a liar to have said that the Illinois had 1,200 warriors, besides the allies who had given them assistance. Where were the 60 Frenchmen who I had told them had been left at the village? I had much difficulty in getting out of the scrape. The same evening they sent back the Illinois to tell his nation to come the next day to within half a league of the fort, and that they would there conclude the peace, which in fact they did at noon. The Iroquois gave them presents of necklaces and merchandise. The first necklace signified that the Governor of New France was angry at their having come to molest their brothers; the second was addressed to M. de la Salle with the same meaning; and the third, accompanied with merchandise, bound them as by oath to a strict alliance that hereafter they should live as brothers. They then separated, and the Illinois believed, after these presents, in the sincerity of the peace,

JOURNEYS OF

which induced them to come several times into the fort of Iroquois, where some Illinois chiefs having asked me what I thought, I told them they had everything to fear, that their enemies had no good faith, that I knew that they were making canoes of elm-bark, and that consequently it was intended to pursue them; and that they should take advantage of any delay to retire to some distant nation, for that they would most assuredly be betrayed.

The eighth day after their arrival, on the 10th of September, the Iroquois called me and the Father Zenoble to council, and having made me sit down, they placed six packets of beaver skins before us, and addressing me, they said, that the two first packets were to inform M. de Frontenac that they would not eat his children, and that he should not be angry at what they had done; the third, a plaster for my wound; the fourth, some oil to rub on my own and Father Zenoble's limbs, on account of the long journeys we had taken; the fifth, that the sun was bright;* the sixth, that we should profit by it and depart the next day for the French settlements. I

* The published relation states: "Par le cinquième ils nous exhortaient à adorer le soleil" (p. 122). The original is simply: "Le 5e quel e soleil était beau."

LA SALLE

asked them when they would go away themselves. Murmurs arose, and some of them said that they would eat some of the Illinois before they went away; upon which I kicked away their presents, saying, that I would have none of them, since they desired to eat the children of the Governor. An Abenakis who was with them, who spoke French, told me that I irritated them, and the chiefs rising drove me from the council. We went to our cabin, where we passed the night on our guard, resolved to kill some of them before they should kill us, for we thought that we should not live out the night. However, at daybreak they directed us to depart, which we did. After five hours' sailing we landed to dry our peltries which were wet, while we repaired our canoe. The Father Gabriel told me he was going aside to pray. I advised him not to go away, because we were surrounded by enemies. He went about 1000 paces off, and was taken by forty savages, of a nation called Kikapous, who carried him away and broke his head. Finding that he did not return, I went to look for him with one of the men. Having discovered his trail, I found it cut by several others, which joined and ended at last in one. I brought back this sad news to the Father Zenoble, who

JOURNEYS OF

was greatly grieved at it. Towards evening we made a great fire, hoping that perhaps he might return; and we went over to the other side of the river, where we kept a good lookout. Towards midnight we saw a man at a distance, and then many others. The next day we crossed over the river to look for our crew, and after waiting till noon we embarked and reached the Lake Illinois by short journeys, always hoping to meet with the good father. After having sailed on the lake as far as La Touissant we were wrecked, twenty leagues from the village of Poutouatamis. Our provisions failing us, I left a man to take care of our things and went off by land; but as I had a fever constantly on me and my legs were swollen, we did not arrive at this village till St. Martin's day (November 11, 1680). During this journey we lived on wild garlick, which we were obliged to grub up from under the snow. When we arrived we found no savages; they were gone to their winter quarters. We were obliged to go to the places they had left, where we obtained hardly as much as two handfuls of Indian corn a day, and some frozen gourds which we piled up in a cabin at the water's side. Whilst we were gleaning, a Frenchman whom we had left at the *cache*, came

LA SALLE

to the cabin where we had left our little store of provisions. He thought we had put them there for him, and therefore did not spare them. We were very much surprised, as we were going off to Michilimackinac, to find him in the cabin, where he had arrived three days before. We had much pleasure in seeing him again, but little to see our provisions partly consumed. We did not delay to embark, and after two hours' sail, the wind in the offing obliged us to land, when I saw a fresh trail, and directed that it should be followed. It led to the Poutouatamis village, who had made a portage to the bay of the Puans, [Green Bay]. The next day, weak as we were, we carried our canoe and all our things into this bay, to which there was a league of portage. We embarked in Sturgeon Creek, and turned to the right at hazard, not knowing where to go. After sailing for a league, we found a number of cabins, which led us to expect soon to find the savages.

Five leagues from this place we were stopped by the wind for eight days, which compelled us to consume the few provisions we had collected together, and at last we were without anything. We held a council, and despairing of being able to come up with the savages, every one asked to return

JOURNEYS OF

to the village, where at least there was wood, so that we might die warm. The wind lulling we set off, and on entering Sturgeon's Creek we saw a fire made by savages who had just gone away. We thought they were gone to their village, and determined to go there; but the creek having frozen in the night we could not proceed in our canoe. We made shoes of the late Father Gabriel's cloak, having no leather. We were to have started in the morning, but one of my men being very ill from having eaten some *parre-fleche* in the evening, delayed us. As I was urging our starting, two Ottawas savages came up, who led us to where the Poutouatamis were. We found some Frenchmen with them, who kindly received us. I spent the winter with them, and the Father Zenoble left us, to pass the winter with the Jesuits at the end of the bay. I left this place in the spring (1681) for Michilimakinac, hardly recovered from the effects of what we had suffered from hunger and cold during thirty-four days. We arrived at Michilimakinac about the *fête Dieu* in October [June]. M. de la Salle arrived with M. Forest some days afterwards, on his way to seek us at the Illinois. He was very glad to see us again, and notwithstanding the many past reverses, made

LA SALLE

new preparations to continue the discovery which he had undertaken. I therefore embarked with him for Fort Frontenac, to fetch things that we should want for the expedition. The Father Zenoble accompanied us. When we came to Lake Frontenac, M. de la Salle went forward, and I waited for his boat at the village of Tezagon. When it arrived there I embarked for Illinois. At the Miamis River I assembled some Frenchmen and savages for the voyage of discovery, and M. de la Salle joined us in October.⁷ We went in canoes to the River Chicagou, where there is a portage which joins that of the Illinois. The rivers being frozen, we made sledges and dragged our baggage thirty leagues below the village of Illinois, where, finding the navigation open, we arrived at the end of January [Feb. 6th] at the great River Mississippi. The distance from Chicagou was estimated at 140 leagues. We descended the river, and found, six leagues below, on the right, a great river,⁸ which comes from the west, on which there are numerous nations. We slept at its mouth. The next day we went on to the village of Tamarous [Tamaroa, an Illinois tribe], six leagues off

[⁷ For the date of La Salle's arrival cf. MARGRY Vol. I., 592, 593, and Vol. I., page 128.]

⁸ Missouri.

JOURNEYS OF

on the left. There was no one there, all the people being at their winter quarters in the woods. We made marks to inform the savages that we had passed, and continued our route as far as the River Ouabache,* which is eighty leagues from that of Illinois. It comes from the east, and is more than 500 leagues in length. It is by this river that the Iroquois advance to make war against the nations of the south. Continuing our voyage about sixty leagues, we came to a place which was named Fort Prudhomme, because one of our men lost himself there when out hunting, and was nine days without food. As they were looking for him they fell in with two Chikasas savages, whose village was three days' journey inland. They have 2,000 warriors, the greatest number of whom have *flat heads*, which is considered a beauty among them, the women taking pains to flatten the heads of their children, by means of a cushion which they put on the forehead and bind with a band, which they also fasten to the cradle, and thus make their heads take this form. When they grow up their faces are as big as a large soup plate. All the nations on the seacoast have the same custom.

M. de la Salle sent back one of them with

* Ohio.

Chickasaw

LA SALLE

presents to his village, so that, if they had taken Proudhomme, they might send him back, but we found him on the tenth [ninth] day, and as the Chikasas did not return, we continued our route as far as the village of Cappa, fifty leagues off. We arrived there in foggy weather, and as we heard the sound of the tambour, we crossed over to the other side of the river, where, in less than half an hour, we made a fort. The savages having been informed that we were coming down the river, came in their canoes to look for us. We made them land, and sent two Frenchmen as hostages to their village; the chief visited us with the calumet, and we went to the savages. They regaled us with the best they had, and after having danced the calumet to M. de la Salle, they conducted us to their village of Toy-engan, eight leagues from Cappa. They received us there in the same manner, and from thence they went with us to Toriman, two leagues further on, where we met with the same reception. It must be here remarked that these villages, the first of which is Osotonoy, are six leagues to the right descending the river, and are commonly called Akancas (Arkansas). The first three villages are situated on the great river (Mississippi). M. de la Salle erected

Kwa 12-2 -

JOURNEYS OF

the arms of the King there; they have cabins made with the bark of cedar; they have no other worship than the adoration of all sorts of animals. Their country is very beautiful, having abundance of peach, plum and apple trees, and vines flourish there; buffaloes, deer, stags, bears, turkeys, are very numerous. They have even domestic fowls. They have very little snow during the winter, and the ice is not thicker than a dollar. They gave us guides to conduct us to their allies, the Taencas, six leagues distant.

The first day we began to see and kill alligators, which are numerous and from 15 to 20 feet long. When we arrived opposite to the village of the Taencas, M. de la Salle desired me to go to it and inform the chief of his arrival. I went with our guides, and we had to carry a bark canoe for ten *arpens*, and to launch it on a small lake in which their village was placed. I was surprised to find their cabins made of mud and covered with cane mats. The cabin of the chief was 40 feet square, the wall 10 feet high, a foot thick, and the roof, which was of a dome shape, about 15 feet high. I was not less surprised when, on entering, I saw the chief seated on a camp bed, with three of his wives at his side, surrounded by more

LA SALLE

than 60 old men, clothed in large white cloaks, which are made by the women out of the bark of the mulberry tree, and are tolerably well worked. The women were clothed in the same manner; and every time the chief spoke to them, before answering him, they howled and cried out several times—"O-o-o-o-o!" to show their respect for him, for their chiefs are held in as much consideration as our kings. No one drinks out of the chief's cup, nor eats out of his plate, and no one passes before him; when he walks they clean the path before him. When he dies they sacrifice his youngest wife, his house-steward (*maître d'hôtel*), and a hundred men, to accompany him into the other world. They have a form of worship, and adore the sun. There is a temple opposite the house of the chief, and similar to it, except that three eagles are placed on this temple, who look towards the rising sun. The temple is surrounded with strong mud walls, in which are fixed spikes, on which they place the heads of their enemies whom they sacrifice to the sun. At the door of the temple is a block of wood, on which is a great shell (*vignot*), and plaited round with the hair of their enemies in a plait as thick as an arm, and about 20 fathoms (*toises*) long. The inside of the

JOURNEYS OF

7. 2. 1882

temple is naked; there is an altar in the middle, and at the foot of the altar three logs of wood are placed on end, and a fire is kept up day and night by two old priests (*jongleurs*), who are the directors (*maîtres*) of their worship. These old men showed me a small cabinet within the wall, made of mats of cane. Desiring to see what was inside, the old men prevented me, giving me to understand that their God was there. But I have since learnt that it is the place where they keep their treasure, such as fine pearls which they fish up in the neighborhood, and European merchandise. At the last quarter of the moon all the cabins make an offering of a dish of the best food they have, which is placed at the door of the temple. The old men take care to carry it away, and to make a good feast of it with their families. Every spring they make a clearing, which they name "the field of the spirit," when all the men work to the sound of the tambour. In the autumn the Indian corn is harvested with much ceremony, and stored in magazines until the moon of June in the following year, when all the village assemble, and invite their neighbors to eat it. They do not leave the ground until they have eaten it all, making great rejoicings the whole time. This is all

LA SALLE

I learnt of this nation. The three villages below have the same customs.

Let us return to the chief. When I was in his cabin he told me with a smiling countenance the pleasure he felt at the arrival of the French. I saw that one of his wives wore a pearl necklace. I presented her with ten yards of blue glass beads in exchange for it. She made some difficulty but the chief having told her to let me have it, she did so. I carried it to M. de la Salle, giving him an account of all that I had seen, and told him that the chief intended to visit him the next day—which he did. He would not have done this for savages, but the hope of obtaining some merchandise induced him to act thus. He came the next day with wooden canoes to the sound of the tambour and the music of the women. The savages of the river use no other boats than these. M. de la Salle received him with much politeness, and gave him some presents; they gave us, in return, plenty of provisions and some of their robes. The chiefs returned well satisfied. We stayed during the day, which was the 22d of March. An observation gave 31° of latitude. We left on the 22d [26th], and slept in an island ten leagues off. The next day we saw a canoe, and M. de la Salle ordered me to chase it,

JOURNEYS OF

which I did, and as I was just on the point of taking it, more than 100 men appeared on the banks of the river to defend their people. M. de la Salle shouted out to me to come back, which I did. We went on and encamped opposite them. Afterwards, M. de la Salle expressing a wish to meet them peaceably, I offered to carry to them the calumet, and embarking, went to them. At first they joined their hands, as a sign that they wished to be friends; I, who had but one hand, told our men to do the same thing.

I made the chief men among them cross over to M. de la Salle, who accompanied them to their village, three leagues inland, and passed the night there with some of his men. The next day he returned with the chief of the village where he had slept, who was a brother of the great chief of the Natches; he conducted us to his brother's village, situated on the hillside, near the river, at six leagues' distance. We were well received there. This nation counts more than 300 warriors. Here the men cultivate the ground, hunt, and fish, as well as the Taencas, and their manners are the same. We departed thence on Good Friday, and after a voyage of 20 leagues, encamped at the mouth of a large river, which

LA SALLE

runs from the west. We continue our journey, and crossed a great canal, went towards the sea on the right. A few leagues further on we saw some fish on the bank of the river, and sent to inform them. It was the village of the Capissas,¹⁰ who let fly their arrows upon men, who retired in consequence. As M. de la Salle would not fight against any nation, he made us embark. Twelve leagues from this village, on the left, is that of Tangibaos. Scarcely eight days before this village had been totally destroyed. Dead bodies were lying on one another, and the cabins were burnt. We proceeded on our course, and after sailing 40 leagues, arrived at the sea on the 7th of April, 1682.

M. de la Salle sent canoes to inspect the channels; some of them went to the channel on the right hand, some to the left, and M. de la Salle chose the centre. In the evening each made his report, that is to say, that the channels were very fine, wide, and deep. We encamped on the right bank; we erected the arms of the King, and returned several times to inspect the channels. The same report was made. This river is 800 leagues long, without rapids, 400 from the

[¹⁰ The Bayougoulas and Mongoulachas of Iberville. Cf. MARGRY IV., 120.]

JOURNEYS OF

country of the Scioux, and 400 from the mouth of the Illinois river to the sea. The banks are almost uninhabitable, on account of the spring floods. The woods are all those of a boggy district, the country one of canes and briars and of trees torn up by the roots; but a league or two from the river, the most beautiful country in the world, prairies, woods of mulberry trees, vines, and fruits that we were not acquainted with. The savages gather the Indian corn twice in the year. In the lower part of the river, which might be settled, the river makes a bend N. and S., and in many places every now and then is joined by streams on the right and left. The river is only navigable (for large vessels?) as far as the village of the Natches, for above that place the river winds too much; but this does not prevent the navigation of the river from the confluence of the Ouabache^[Ohio] and the Mississippi as far as the sea. There are but few beavers, but, to make amends, there is a large number of buffaloes, bears, large wolves, stags and hinds in abundance, and some lead mines, which yield two-thirds of ore to one of refuse. As these savages are stationary (*sedentaires*), and have some habits of subordination, they might be obliged to make silk in order to procure

LA SALLE

necessaries for themselves; bringing to them from France the eggs of silkworms, for the forests are full of mulberry-trees. This would be a valuable trade.

As for the country of Illinois, the river runs 100 leagues from the Fort St. Louis, to where it falls into the Mississippi. Thus it may be said to contain some of the finest lands ever seen. The climate is the same as that of Paris, though in the 40° of latitude. The savages there are active and brave, but extremely lazy, except in war, when they think nothing of seeking their enemies at a distance of 500 or 600 leagues from their own country. This constantly occurs in the country of the Iroquois, whom, at my instigation, they continually harass. Not a year passes in which they do not take a number of prisoners and scalps. A few pieces of pure copper, whose origin we have not sought, are found in the river of the Illinois country. Polygamy prevails in this nation, and is one of the great hindrances to the introduction of Christianity, as well as the fact of their having no form of worship of their own. The nations lower down would be more easily converted, because they adore the sun, which is their divinity. This is all that I am able to relate of those parts.

JOURNEYS OF

Let us return to the sea coast, where, provisions failing, we were obliged to leave it sooner than we wished, in order to obtain provisions in the neighboring villages. We did not know how to get anything from the village of the Quinipissas, who had so ill received us as we went down the river. We lived on potatoes until six leagues from their village, when we saw smoke. M. de la Salle sent to reconnoitre at night. Our people reported that they had seen some women. We went on at daybreak, and taking four of the women, encamped on the opposite bank. One of the women was then sent with merchandise to prove that we had no evil design and wished for their alliance and for provisions. She made her report. Some of them came immediately and invited us to encamp on the other bank, which we did. We sent back the three other women, keeping, however, constant guard. They brought us some provisions in the evening, and the next morning, at daybreak, the scoundrels attacked us.

We vigorously repulsed them, and by ten o'clock burnt their canoes, and, but for the fear of our ammunition failing, we should have attacked their village. We left in the evening in order to reach Natches, where

LA SALLE

hatchy we had left a quantity of grain on passing down. When we arrived there the chief came out to meet us. M. de la Salle made them a present of the scalps we had taken from the Quinipissas. They had already heard the news, for they had resolved to betray and kill us. We went up to their village, and as we saw no women there, we had no doubt of their having some evil design. In a moment we were surrounded by 1,500 men. They brought us something to eat, and we ate with our guns in our hands. As they were afraid of firearms, they did not dare to attack us. The chief begged M. de la Salle to go away, as his young men had not much sense, which we very willingly did—the game not being equal, we having only fifty men, French and savages. We then went on to the Taencas, and then to the Arkansas, where we were very well received. From thence we came to Fort Prudhomme, where M. de la Salle fell dangerously ill, which obliged him to send me forward, on the 6th of May, to arrange his affairs at Missilimakinac. In passing near the Ouabache, I found four Iroquois, who told us that there were 100 men of their nation coming on after them. This gave us some alarm. There is no pleasure in meeting warriors on one's road,

JOURNEYS OF

especially when they have been unsuccessful. I left them, and at about twenty leagues from Tamaraas we saw smoke. I ordered our people to prepare their arms, and we resolved to advance, expecting to meet the Iroquois. When we were near the smoke, we saw some canoes, which made us think that they could only be Illinois or Tamaraas. They were in fact the latter. As soon as they saw us they came out of the wood in great numbers to attack us, taking us for Iroquois. I presented the calumet to them—they put down their arms, and conducted us to their village without doing us any harm. The chiefs held a council, and, taking us for Iroquois, resolved to burn us; and, but for some Illinois among us, we should have fared ill. They let us proceed. We arrived about the end of June, 1683 (1682), at the River Chicagou, and, by the middle of July, at Michilimakinac. M. de la Salle, having recovered, joined us in September. Resolving to go to France, he ordered me to collect together the French who were on the River Miamis to construct the Fort of St. Louis in the Illinois. I left with this design, and when I arrived at the place, M. de la Salle, having changed his mind, joined me.¹¹ They set

[¹¹ Dec. 30, 1682. Cf. MARGRY I., 613.]

LA SALLE

to work at the fort, and it was finished in March, 1683.¹²

During the winter I gave all the nations notice of what we had done to defend them from the Iroquois, through whom they had lost 700 people in previous years. They approved of our good intentions, and established themselves, to the number of 300 cabins, near the Fort Illinois, as well Mi-amis as Chawanons [Shawnees].

TONTY'S MEMOIR. PART II.

CHAPTER II

TONTY ON THE ILLINOIS AND MISSISSIPPI

M. DE LA SALLE departed for France in the month of September, leaving me to command the fort. He met on his way the Chevalier de Bogis [Baugy], whom M. de la Barre had sent with letters, ordering M. de la Salle to Quebec, who had no trouble in making the journey, as he was met with on the road. M. de la Salle wrote to me to receive M. de Bogis well, which I did. The winter passed, and on the 20th of March, 1684, being informed that the Iro-

¹² This date is no doubt correct, for there is a letter of La Salle's in existence, dated at Fort St. Louis, April 2, 1683.

JOURNEYS OF

quois were about to attack us, we prepared to receive them, and dispatched a canoe to M. de la Durantaye [Durantays], Governor of Missilimakinac, for assistance, in case the enemy should hold out against us a long time. The savages appeared on the 21st, and we repulsed them with loss. After six days' siege they retired with some slaves which they had made in the neighborhood, who afterwards escaped and came back to the fort.

M. de la Durantaye, with Father Daloy, a Jesuit, arrived at the Fort with about sixty Frenchmen, whom they brought to our assistance, and to inform me of the orders of M. de la Barre, to leave the place. They stated that M. de Bogis was in possession of a place belonging to M. de la Forêt, who had accompanied M. de la Salle to France, and had returned by order of M. de la Salle with a *lettre de cachet*. M. de la Barre was directed to deliver up to M. de la Forêt the lands belonging to the Sieur de la Salle, and which were occupied by others to his prejudice. He brought me news that M. de la Salle was sailing by way of the islands to find the mouth of the Mississippi, and had at court obtained a company for me.¹ He sent me orders to

[¹ Cf. MARGRY II., 370-373; III., 28-36.]

LA SALLE

command at Fort St. Louis, as Captain of Foot and Governor. We took measures together, and formed a company of twenty men to maintain the Fort. M. de la Forêt went away in the autumn, for Fort Frontenac, and I began my journey to Illinois. Being stopped by the ice, I was obliged to halt at Montreal, where I passed the winter. When M. de la Forêt arrived there in the spring, we took new measures—he returned to Frontenac, and I went on to the Illinois, where I arrived in June (1685). M. le Chevalier de Bogis retired from his command, according to the orders that I brought him from M. de la Barre.

The Miamis having seriously defeated the Illinois, it cost us 1,000 dollars to reconcile these two nations, which I did not accomplish without great trouble. In the autumn I embarked for Missilimakinac, in order to obtain news of M. de la Salle. I heard there that Monseigneur de Denonville had succeeded M. de la Barre; and by a letter which he did me the honor to write to me, he expressed his wish to see me, that we might take measures for a war against the Iroquois, and informed me that M. de la Salle was engaged in seeking the mouth of the Mississippi in the Gulf of Mexico. Upon hearing this I resolved to go in search of

JOURNEYS OF

him with a number of Canadians, and as soon as I should have found him, to return back to execute the orders of M. de Denonville.

I embarked, therefore, for the Illinois, on St. Andrew's Day (30th of October, 1685); but being stopped by the ice, I was obliged to leave my canoe and to proceed on by land. After going 120 leagues, I arrived at the Fort of Chicagou, where M. de la Durantaye commanded; and from thence I came to Fort St. Louis, where I arrived in the middle of January, 1685 (1686). I departed thence on the 16th [13th] February, with thirty [25] Frenchmen, and five Illinois and Chawanons, for the sea, which I reached in Holy Week [April 10]. After having passed the above-named nations, I was very well received. I sent out two canoes, one towards the coast of Mexico, and the other towards Carolina, to see if they could discover anything. They each sailed about thirty leagues, but proceeded no farther for want of fresh water. They reported that where they had been the land began to rise. They brought me a porpoise and some oysters. As it would take us five months to reach the French settlements, I proposed to my men, that if they would trust to me to follow the coast as far as

LA SALLE

N.K. — Manhatte, that by this means we should arrive shortly at Montreal; that we should not lose our time, because we might discover some fine country, and might even take some booty on our way. Part of my men were willing to adopt my plan; but as the rest were opposed to it, I decided to return the way I came.

The tide does not rise more than two feet perpendicularly on the seacoast, and the land is very low at the entrance of the river. We encamped in the place where M. de la Salle had erected the arms of the King. As they had been thrown down by the floods. I took them five leagues further up, and placed them in a higher situation. I put a silver *ecu* in the hollow of a tree to serve as a mark of time and place. We left this place on *Easter Monday*. When we came opposite the Quinipissas Village,² the chiefs brought me the calumet, and declared the sorrow they felt at the treachery they

² It was at this village (also called Bayagoulis) that Iberville, fourteen years after, found the following letter from Tonty to La Salle, dated 20th April, 1685, which the Indian chiefs had carefully preserved: "Sir, having found the column on which you had placed the arms of France thrown down, I caused a new one to be erected, about seven leagues from the sea. All the nations have sung the calumet. These people fear us extremely, since your attack upon their village. I close by saying that it gives me great uneasiness to be obliged to return under the misfortune of not

JOURNEYS OF

had perpetrated against me on our first voyage. I made an alliance with them. Forty leagues higher up, on the right, we discovered a village inland, with the inhabitants of which we also made an alliance. These are the Oumas, the bravest savages of the river. When we were at Arkansas, ten of the Frenchmen who accompanied me asked for a settlement on the River Arkansas, on a seignory that M. de la Salle had given me on our first voyage. I granted the request to some of them. They remained there to build a house surrounded with stakes. The rest accompanied me to Illinois, in order to get what they wanted. I arrived there on St. John's Day (24th of June). I made two chiefs of the Illinois embark with me in my canoe, to go and receive the orders of M. de Denonville, and we arrived at Montreal by the end of July.

I left that place at the beginning of October to return to the Illinois. I came there on the 10th of October, and I directly sent some Frenchmen to our savage allies to declare war against the Iroquois, inviting having found you. Two canoes have examined the coast thirty leagues towards Mexico, and twenty-five towards Florida."

[Cf. MARGRY III., 561, for a report given by these Indians that La Salle had been seen near Mobile Bay.]

LA' SALLE

them to assemble at the Fort of Bonhomme, which they did in the month of April, 1686 (1687). The Sieur de la Forêt was already gone in a canoe with 30 Frenchmen, and he was to wait for me at Detroit till the end of May. I gave our savages a dog feast (*festin de chien*); and after having declared to them the will of the King and of the Governor, I left with 16 Frenchmen and a guide for the Miami nation. We encamped half a league from the Fort, to wait for the savages who might wish to follow us. I left 20 Frenchmen at the Fort, and the Sieur de Bellefontaine to command there during my absence. Fifty Chagansons, four Loups, and seven Miamis came to join me at night; and the next day more than 300 Illinois came, but they went back again, with the exception of 149. This did not prevent my continuing my route; and after 200 leagues of journey by land, we came, on the 19th of May, to Fort Detroit. We made some canoes of elm, and I sent one of them to Fort St. Joseph on the high ground above Detroit, 30 leagues from where we were, to give the Sieur Dulud, the Commander of this Fort, information of my arrival. The Sieur Beauvais de Tilly joined me, and afterwards the Sieur de la Forêt; then the Sieurs de la Durantaye

in ahican

JOURNEYS OF

and Dulud. I made the French and the savages coast along the bay. After Le Sieur Durantaye had saluted us, we returned the salute. They had with them 30 English, whom they had taken on the Lake Huron, at the place at which they had reached it. We made canoes on our journey, and coasted along Lake Erie to Niagara, where we made a fort below the passage to wait there for news. On our way we took thirty more Englishmen, who were going to Missilimackinac, commanded by Major Gregory, who was bringing back some Huron and Outawas slaves, taken by the Iroquois. Had it not been for these two moves of good luck our affairs would have turned out badly, as we were at war with the Iroquois. The English, from the great quantity of brandy which they had with them, would have gained over our allies, and thus we should have had all the savages and the English upon us at once.

I sent the Sieur de la Forêt forward to inform M. de Denonville of everything. He was at the Fort of Frontenac, and he joined us at Fort Les Sables. The barge boat arrived and brought us provisions. M. le Monseigneur sent us word by it that he expected to arrive by the 10th of July at the

LA SALLE

Marsh, wich is seven leagues from Sonnon-touans.

The Poutouatamis, Hourens and Ottowas joined us there and built some canoes. There was an Iroquois slave among them whom I proposed to have put to death for the insolent manner in which he spoke of the French. They paid no attention to my proposal. Five leagues on our march he ran away and gave information of our approach, and of the marks which our savages bore to recognize each other, which did us great harm in the ambuscade, as will be seen.

On the 10th we arrived at the Marsh of Fort Les Sables, and the army from below arrived at the same time. I received orders to take possession of a certain position, which I did with my company and savages. We then set about building a fort. On the 11th I went with fifty men to reconnoitre the road, three miles from the camp. On the 12th the Fort was finished, and we set off for the village. On the 13th, half a league from the prairie (*deserts*) we found an ambuscade, and my company, who were the advance guard, forced it. We lost seven men, of whom my lieutenant was one, and two of my own people. We were occupied for seven days in cutting the corn of the four villages. We returned to Fort Les

JOURNEYS OF

Sables, and left it to build a fort at Niagara. From thence I returned to Fort St. Louis with my cousin, the *Sieur Dulud*, who returned to his post with eighteen soldiers and some savages. Having made half the portage, which is two leagues in length, some *Hourens* who followed us perceived some *Iroquois*, and ran to give us warning. There were only forty of us, and as we thought the enemy strong, we agreed to fall back with our ammunition towards the Fort and get a reinforcement. We marched all night, and, as the *Sieur Dulud* could not leave his detachment, he begged me to go to the Marquis, while he lay in ambush in a very good position. I embarked, and when I came to the Fort the Marquis was unwilling to give me any men, the more so as the militia was gone away, and he had only some infantry remaining to escort him; however, he sent Captain Valiennes and fifty men to support us, who stayed at the portage while we crossed it. We embarked, and when clear of the land we perceived the *Iroquois* on the banks of the lake. We passed over, and I left the *Sieur Dulud* at his post at *Detroit*. I went in company with the Reverend Father Crévier as far as Missilimackinac, and afterwards to Fort St. Louis.

LA SALLE

There I found M. Cavelier, a priest; his nephew, and the Father Anastatius, a Recollet, and two men. They concealed from me the assassination of M. de la Salle, and upon their assuring me that he was on the Gulf of Mexico, in good health, I received them as if they had been M. de la Salle himself and lent them more than seven hundred francs (28*l.*). M. Cavelier departed in the spring, 1687 (1688), to give an account of his voyage at court.

M. de la Forêt came here in the autumn and went away in the following spring. On the 7th of April one named Coutoure brought me two Akansas, who danced the calumet. They informed me of the death of M. de la Salle, with all the circumstances which they had heard from the lips of M. Cavelier, who had fortunately discovered the house I had built at Arkansas, where the said Coutoure stayed with three Frenchmen. He told me that the fear of not obtaining from me what he desired had made him conceal the death of his brother, but that he had told them of it.

M. Cavelier told me that the Cadadoquis had proposed to accompany him if he would go and fight against the Spaniards. He had objected on account of there being only fourteen Frenchmen. They replied that

JOURNEYS OF

their nation was numerous, that they only wanted a few musqueteers, and that the Spaniards had much money, which they (the French) should take; and as for themselves, they only wished to keep the women and children as slaves. Coutoure told me that a young man whom M. Cavelier had left at Arkansas had assured him that this was very true. I would not undertake anything without the consent of the Governor of Canada. I sent the said Coutoure to the French remaining in Nivondiché^s to get all the information he could. He set off, and at one hundred leagues from the Fort was wrecked, and, having lost everything, returned.

In the interval M. de Denonville directed me to let the savages do as they liked, and to do nothing against the Iroquois. He at the same time informed me that war was declared against Spain. Upon this I came to the resolution of going to Naodiché, to execute what M. Cavelier had ventured to undertake, and to bring back M. de la Salle's men, who were on the seacoast, not knowing of the misfortune that had befallen him. I set off on the 3d of October and joined my cousin, who was gone on before,

[^s Nivondiché, Naodiché, with other spellings, are probably names for the Cenis.]

LA SALLE

and who was to accompany me, as he expected that M. de la Forêt would come and take the command in my absence; but as he did not come, I sent my cousin back to command the Fort.

I bought a larger boat than my own. We embarked five Frenchmen, one Chaganon and two slaves. We arrived on the 17th at an Illinois village at the mouth of their river. They had just come from fighting the Osages, and had lost thirteen men, but brought back one hundred and thirty prisoners. We reached the village of the Kappas on the 16th of January, where we were received with demonstrations of joy, and for four days there was nothing but dancing, feasting and masquerading after their manner. They danced the calumet for me, which confirmed the last alliance. On the 20th of January we came to Tongenga, and they wished to entertain us as the Kappas had done; but, being in haste, I deferred it until another time. I did the same with the Torremans on my arrival, on the 22d. Leaving my crew, I set off the next day for Asotoué, where my commercial house is. These savages had not yet seen me, as they lived on a branch of the river coming from the west. They did their best, giving me two women of the Cadadoquis nation, to

JOURNEYS OF

whom I was going. I returned to Torre-
mans on the 26th, and brought there two
boats. We went away on the 27th. On the
29th, finding one of our men asleep when
on duty as sentinel, I reprimanded him, and
he left me. I sent two of my people to
Coroa, to spare myself the fatigue of drag-
ging on with our crew six leagues inland.
The Frenchman, with whom I had quar-
reled, made with them a third. We slept
opposite the rivers of the Taencas, which
run from Arkansas. They came there on
the 2d, this being the place of meeting. My
Chagenon went out hunting on the other
side of the river, where he was attacked by
three Chacoumas. He killed one of them,
and was slightly wounded by an arrow on
the left breast.

On the 4th the rest of the party arrived.
On the 5th, being opposite Taencas, the
men whom I had sent to Coroa not having
brought any news of the two Frenchmen
whom I was anxious about, I sent them to
Natchés. They found that this nation had
killed the two men. They retired as well
as they could, making the savages believe
that they were numerous. They arrived on
the 8th of February. We set off on the 12th
with twelve Taencas, and after a voyage of
twelve leagues to the northwest we left our

LA SALLE

boat and made twenty leagues portage, and on the 17th of February, 1690, came to Nachitoches. They made us stay at the place, which is in the midst of the three villages called Nachitoches, Quasita and Capiché. The chiefs of the three nations assembled, and before they began to speak the 30 Taencas who were with me got up and, leaving their arms, went to the temple, to show how sincerely they wished to make a solid peace. After having taken their God to witness, they asked for friendship. I made them some presents in the name of the Taencas. They remained some days in the village to traffic with salt, which these nations got from a salt lake in the neighborhood. After their departure they gave me guides to Yatachés, and after ascending the river, always towards the northwest, about thirty leagues, we found fifteen cabins of Natchés, who received us pretty well. We arrived on the 16th of March at Yatachés, about forty leagues from thence. The three villages of Yatachés, Nadas and Choye are together. As they knew of our arrival, they came three leagues to meet us with refreshments, and on joining us we went together to their villages. The chief made many feasts for us. I gave presents to them, and asked for guides to the Cada-

JOURNEYS OF

doquis. They were very unwilling to give us any, as they had murdered three ambassadors about four days before who came to their nation to make peace. However, by dint of entreaties, and assuring them that no harm would happen to their people, they granted me five men, and we got to Cadaquis on the 28th.⁴ At the place where we were encamped we discovered the trail of men and horses. The next day some horsemen came to reconnoitre us, and, after speaking to the wife of the chief, whom I brought back with me, carried back the news. The next day a woman, who governed this nation, came to visit me with the principal persons of the village. She wept over me, demanding revenge for the death of her husband, and of the husband of the woman whom I was bringing back, both of whom had been killed by the Osages. To take advantage of everything, I promised that their death should be avenged. We went together to their temple, and after the priests had invoked their God for a quarter of an hour they conducted me to the cabin of their chief. Before entering they washed my face with water, which is a ceremony among them. During the time I was there

[The report of Tonty's visit reached the Spaniards under Teran the following year. Cf. Tex. Hist. Quar. V., 191.]

LA SALLE

I learned from them that eighty leagues off were seven Frenchmen whom M. Cavelier had left. I hoped to finish my troubles by rejoining them, but the Frenchmen who accompanied me, tired of the voyage, would go no further. They were unmanageable persons, over whom I could exercise no authority in this distant country. I was obliged to give way. All that I could do was to engage one of them, with a savage, to accompany me to the village of Naovediché, where I hoped to find the seven Frenchmen. I told those who abandoned me that, to prevent the savages knowing this, it was best to say that I had sent them away to carry back the news of my arrival, so that the savages should not suspect our disunion.

Cadado

The Cadadoquis are united with two other villages called Natchitoches and Nasoui, situated on the *Red River*. All the nations of this tribe speak the same language. Their cabins are covered with straw, and they are not united in villages, but their huts are distant one from the other. Their fields are beautiful. They fish and hunt. There is plenty of game, but few cattle (*bœufs*). They wage cruel war with each other, hence their villages are but thinly populated. I never found that they did any

JOURNEYS OF

work, except making very fine bows, which they make a traffic with distant nations. The Cadadoquis possess about thirty horses, which they call "cavali" (sp. *caballo*, a horse). The men and women are tattooed in the face and all over the body. They call this river the Red River, because, in fact, it deposits a sand which makes the water as red as blood. I am not acquainted with their manners, having only seen them in passing.

I left this place on the 6th of April, directing our route southwards, with a Frenchman, a Chaganon (Shawnee), a little slave of mine, and five of their savages, whom they gave me as guides to Naouadiché. When I went away I left in the hands of the wife of the chief a small box, in which I had put some ammunition. On our road we found some Naouadichés savages hunting, who assured me that the Frenchmen were staying with them. This gave me great pleasure, hoping to succeed in my object of finding them. On the 19th the Frenchman with me lost himself. I sent the savages who were with me to look for him. He came back on the 21st, and told me that, having lost our trail, he was near drowning himself in crossing a little river on a piece of timber. His bag slipped

LA SALLE

off, and thus all our powder was lost, which very much annoyed me, as we were reduced to sixty pounds of ammunition. On the 23d we slept half a league from the village, and the chiefs came to visit us at night. I asked them about the Frenchmen. They told me that they had accompanied their chiefs to fight against the Spaniards, seven days' journey off; that the Spaniards had surrounded them with their cavalry, and that their chief having spoken in their favor, the Spaniards had given them horses and arms. Some of the others told me that the Quanouatins had killed three of them, and that the four others were gone in search of iron arrow-heads. I did not doubt but they had murdered them. I told them that they had killed the Frenchmen. Directly all the women began to cry, and thus I saw that what I had said was true. I would not, therefore, accept the calumet. I told the chief I wanted four horses for my return, and, having given him seven hatchets and a string of large glass beads, I received the next day four Spanish horses, two of which were marked on the haunch with an R and a crown (*couronne fermée*) and another with an N. Horses are very common among them. There is not a cabin which has not four or five. As this nation is some-

JOURNEYS OF

times at peace and sometimes at war with the neighboring Spaniards, they take advantage of a war to carry off the horses. We harnessed ours as well as we could and departed on the 29th, greatly vexed that we could not continue our route as far as M. de la Salle's camp. We were unable to obtain guides from this nation to take us there, though not more than eighty leagues off, besides being without ammunition, owing to the accident which I related before.

It was at the distance of three days' journey from hence that M. de la Salle was murdered. I will say a few words of what I have heard of this misfortune. M. de la Salle having landed beyond the Mississippi, on the side of Mexico, about eighty leagues from the mouth of the river, and losing his vessels on the coast, saved a part of the cargo, and began to march along the seashore in search of the Mississippi. Meeting with many obstacles on account of the bad roads, he resolved to go to Illinois by land, and loaded several horses with his baggage. The Father Anastatius, M. Cavalier, a priest, his brother; M. Cavalier, his nephew; M. Moranget, a relative; MM. Duhaut and Lanctot ⁶ and several Frenchmen

[⁶ Otherwise spelled Duhaut and Liotot.]

LA SALLE

accompanied him, with a Chaganon savage. When three days' journey from the Naoudiché, and short of provisions, he sent Moranget, his servant, and the Chaganon to hunt in a small wood, with orders to return in the evening. When they had killed some buffaloes they stopped to dry the meat. M. de la Salle was uneasy, and asked the Frenchmen who among them would go and look for them. Duhault and Lanctot had for a long time determined to kill M. de la Salle, because, during the journey along the seacoast, he had compelled the brother of Lanctot, who was unable to keep up, to return to the camp, and who, when returning alone, was massacred by the savages. Lanctot vowed to God that he would never forgive his brother's death. As in long journeys there are always discontented persons, he easily found partisans. He offered, therefore, with them, to search for M. Moranget in order to have an opportunity to execute their design. Having found the men, he told them that M. de la Salle was uneasy about them; but the others showing that they could not set off till the next day, it was agreed to sleep there. After supper they arranged the order of the watch. It was to begin with M. de Moranget; after him was to follow the servant of M. de la Salle,

JOURNEYS OF

and then the Chaganon. After they had kept their watch and were asleep they were massacred, as persons attached to M. de la Salle. At daybreak they heard the reports of pistols, which were fired as signals by M. de la Salle, who was coming with the Father Recollet in search of them. The wretches laid wait for him, placing M. Du-hault's servant in front. When M. de la Salle came near he asked where M. Morangé was. The servant, keeping on his hat, answered that he was behind. As M. de la Salle advanced to remind him of his duty he received three balls in his head and fell down dead. The Father Recollet was frightened, and, thinking that he also was to be killed, threw himself on his knees and begged for a quarter of an hour to prepare his soul. They replied that they were willing to save his life. They went on together to where M. Cavelier was and, as they advanced, shouted: "Down with your arms." M. de Cavelier, on hearing the noise, came forward, and when told of the death of his brother threw himself on his knees, making the same request that had been made by the Father Recollet. They granted him his life. He asked to go and bury the body of his brother, which was refused. Such was the end of one of the greatest men of the age.

LA SALLE

He was a man of wonderful ability, and capable of undertaking any discovery. His death much grieved the three Naoudichés whom M. de la Salle had found hunting, and who accompanied him to the village. After the murderers had committed this crime they seized all the baggage of the deceased and continued their journey to the village of Naoudichés, where they found two Frenchmen who had deserted from M. de la Salle two years before and had taken up their abode with these savages.

After staying some days in this village the savages proposed to them to go to war against the Quanoouatinos, to which the Frenchmen agreed, lest the savages should ill-treat them. As they were ready to set off, an English [German] buccaneer, whom M. de la Salle had always liked, begged of the murderers that, as they were going to war with the savages, they would give him and his comrades some shirts. They flatly refused, which offended him, and he could not help expressing this to his comrades. They agreed together to make a second demand, and if refused to revenge the death of M. de la Salle. This they did some days afterwards. The Englishman, taking two pistols in his belt, accompanied by a French-

JOURNEYS OF

man with his gun, went deliberately to the cabin of the murderers, whom they found were out shooting with bows and arrows. Lanctot met them, and wished them good-day and asked how they were. They answered, "pretty well, and that it was not necessary to ask how they did, as they were always eating turkeys and good venison." Then the Englishman asked for some ammunition and shirts, as they were provided with everything. They replied that M. de la Salle was their debtor, and that what they had taken was theirs. "You will not, then?" asked the Englishman. "No," replied they. On which the Englishman said to one of them, "You are a wretch; you murdered my master," and, firing his pistol, killed him on the spot. Duhault tried to get into his cabin, but the Frenchman shot him also with a pistol in the loins, which threw him on the ground. M. Cavalier and Father Anastatius ran to his assistance. Duhault had hardly time to confess himself, for the father had but just given him absolution when he was finished by another pistol shot at the request of the savages, who could not endure that he should live after having killed their chief. The Englishman took possession of everything. He gave a share to M. Cavalier, who, having found my abode

LA SALLE

in Arkansas, went from thence to Illinois. The Englishman remained at Naoudichés.

We reached Cadadoquis on the 10th of May. We stayed there to rest our horses, and went away on the 17th with a guide, who was to take us to the village of Co-roas.⁶ After four days' journey he left us, in consequence of an accident which happened in crossing a marsh. As we were leading our horses by the bridle he fancied he was pursued by an alligator and tried to climb a tree. In his hurry he entangled the halter of my horse, which was drowned. This induced him to leave us without saying anything, lest we should punish him for the loss of the horse. We were thus left in great difficulty respecting the road which we were to take. I forgot to say that the savages who have horses use them both for war and for hunting. They make pointed saddles, wooden stirrups, and body-coverings of several skins, one over the other, as a protection from arrows. They arm the breast of their horses with the same material, a proof that they are not very far from the Spaniards. When our guide was gone I told the Chaganon to take the lead. All he said in answer was that that was my business; and, as I was unable to

[⁶ Probably near Natchez.]

JOURNEYS OF

influence him, I was obliged to act as guide. I directed our course to the south-east, and after about forty leagues' march, crossing seven rivers, we found the River Coroa. We made a raft to explore the other side of the river, but found there no dry land. We resolved to abandon our horses, as it was impossible to take them on upon account of the great inundation. In the evening, as we were preparing to depart, we saw some savages. We called to them in vain—they ran away, and we were unable to come up with them. Two of their dogs came to us, which, with two of our own, we embarked the next day on our raft, and left our horses. We crossed fifty leagues of flooded country. The water where it was least deep reached halfway up the legs; and in all this tract we found only one little island of dry land, where we killed a bear and dried its flesh. It would be difficult to give an idea of the trouble we had to get out of this miserable country, where it rained night and day. We were obliged to sleep on the trunks of two great trees, placed together, and to make our fire on the trees, to eat our dogs, and to carry our baggage across large tracts covered with reeds. In short, I never suffered so much in my life as in this journey to the Missis-

issippi, which we reached on the 11th of July. Finding where we were, and that we were only thirty leagues from Coroas, we resolved to go there, although we had never set foot in that village. We arrived there on the evening of the 14th. We had not eaten for three days, as we could find no animal, on account of the great flood. I found two of the Frenchmen who had abandoned me at this village. The savages received me very well and sympathized with us in the sufferings we had undergone. During three days they did not cease feasting us, sending men out hunting every day, and not sparing their turkeys. I left them on the 20th, and reached Arkansas on the 31st, where I caught the fever, which obliged me to stay there till the 11th of August, when I left. The fever lasted until we got to the Illinois, in September, 1690.

I cannot describe the beauty of all the countries I have mentioned. If I had had a better knowledge of them I should be better able to say what special advantages might be derived from them. As for the Mississippi, it could produce every year 20,000 *ecus*' worth of peltries, an abundance of lead, and wood for shipbuilding. A silk trade might be established there, and a port for the protection of vessels and

JOURNEYS OF

the maintenance of a communication with the Gulf of Mexico. Pearls might be found there. If wheat will not grow at the lower part of the river, the upper country would furnish it; and the islands might be supplied with everything they need, such as planks, vegetables, grain and salt beef. If I had not been hurried in making this narrative I should have stated many circumstances which would have gratified the reader, but the loss of my notes during my travels is the reason why this relation is not such as I could have wished.

HENRY DE TONTY.

PETITION [†] OF THE CHEVALIER DE TONTY TO
THE COUNT DE PONTCHARTRAIN, MIN-
ISTER OF MARINE.

MONSEIGNEUR,

HENRY DE TONTY humbly represents to your Highness that he entered the army as a cadet, and was employed in that capacity in the years 1668 and 1669; and that he afterwards served as a *garde marine* four years, at Marseilles and Toulon, and made seven campaigns, that is, four on board ships of war and three in the galleys. While

[†] This petition is without date, but was probably written about the year 1690. [Cf. Sparks, Amer. Biog., 2d Ser., I., 203, note.]

LA SALLE

at Messina he was made captain-lieutenant to the *maitre de camp* of 20,000. When the enemy attacked the post of Libisso his right hand was shot away by a grenade, and he was taken prisoner and conducted to Metasse, where he was detained six months, and then exchanged for the son of the governor of that place. He then went to France, to obtain some favor from his Majesty, and the King granted him three hundred livres. He returned to the service in Sicily, made the campaign as a volunteer in the galleys, and, when the troops were discharged, being unable to obtain employment, he solicited at court, but being unsuccessful, on account of the general peace, he decided, in 1678, to join the late Monsieur de la Salle, in order to accompany him in the discoveries of Mexico, during which, until 1682, he was the only officer who did not abandon him.

These discoveries being finished, he remained, in 1683, commandant of Fort St. Louis of the Illinois; and in 1684 he was there attacked by two hundred Iroquois, whom he repulsed, with great loss on their side. During the same year he repaired to Quebec, at the command of M. de la Barre. In 1685 he returned to the Illinois, according to the orders which he received from

JOURNEYS OF

the court, and from M. de la Salle, as a captain of foot in a Marine Detachment, and governor of Fort St. Louis. In 1686 he went, with forty men in canoes, at his own expense, as far as the Gulf of Mexico, to seek for M. de la Salle. Not being able to find him there, he returned to Montreal, and put himself under the orders of Monsieur Denonville, to engage in the war with the Iroquois. On his return to the Illinois he marched two hundred leagues by land, and as far in canoes, and joined the army, when, being at the head of a company of Canadians, he forced an ambuscade of the Tson-nonthouans. (*Seneca*)

The campaign being over, he returned to the Illinois, whence he departed, in 1689, to go in search of the remains of M. de la Salle's people,* but, being deserted by his men, and unable to execute his design, he was compelled to relinquish it, when he had arrived within seven days' march of the Spaniards. Ten months were spent in going and returning. As he now finds himself without employment, he prays that, in consideration of his voyages and heavy ex-

* At the Bay of St. Bernard, and who were there massacred by the Indians, except three sons and a daughter of M. Talon, and a young Frenchman named Eustache de Breman, who were carried into captivity, and afterwards rescued by the Spaniards.

LA SALLE

penses, and considering, also, that during his service of seven years as captain he has not received any pay, your Highness will be pleased to obtain for him, from his Majesty, a company, that he may continue his services in this country, where he has not ceased to harass the Iroquois, by enlisting the Illinois against them in his Majesty's cause.

And he will continue his prayers for the health of your Highness.

HENRY DE TONTY.*

* The last that is known of the brave and generous De Tonty is that he joined Iberville at the mouth of the Mississippi, about the year 1700, and that two years afterwards he was employed on a mission to the Chickasaw nation. No notice has ever been taken of his death. "All the facts that can be ascertained concerning De Tonty are such as give a highly favorable impression of his character, both as an officer and a man. His constancy and his steady devotion to La Salle are marked not only by a strict obedience to orders, but by a faithful friendship and chivalrous generosity. His courage and address were strikingly exhibited in his intercourse with the Indians, as well in war as in peace; but his acts were performed where there were few to observe and fewer to record them. Hence it is that historians have done him but partial justice."

Tonty disavowed to Iberville and Father Marest the publication of a work published in Paris, 1697, entitled "*Dernières Découvertes dans l'Amerique Septentrionale, de M. de la Salle, par M. le Chevalier Tonti,*" which has been since reprinted, under the title of "*Relation de la Louisiane ou du Mississippi, par le Chevalier de Tonti.*"

Tonty must be ranked next to La Salle, who

JOURNEYS OF

Nothing can be more true than the account given by the Sieur de Tonty in this petition; and should his Majesty reinstate the seven companies which have been disbanded in this country, there will be justice in granting one of them to him, or some other recompense for the services which he has rendered, and which he is now returning to render, at Fort St. Louis in the Illinois.

FRONTENAC.

TONTY'S ACCOUNT OF THE ROUTE FROM THE
ILLINOIS, BY THE RIVER MISSISSIPPI, TO
THE GULF OF MEXICO.

SIR,

As the map accompanying this has been made in haste, without proper calculations and measurements, you may probably desire to make one; and for this purpose I will state of the Mississippi that though it winds much, we reckon from the Falls of St. Anthony to the sea eight hundred leagues, and you perceive from the note that its direction is north and south. The distance of the villages, reckoning from the mouth of the River Illinois to the sea, or ascending from

contributed the most towards the exploration and settlement of the Mississippi Valley.

[The editor is informed that Tonty's grave has recently been discovered in Alabama.]

LA SALLE

the sea as far as the River Quiouentagoet (on the banks of which is a village containing eighty Illinois cabins), is calculated at sixty leagues, and from thence to the Miami thirty leagues. The Touraxouslins and Kikapoos are fifteen leagues in the interior, from the banks of the river; two hundred leagues from the junction of the River Illinois, and from thence two hundred leagues to the Falls of St. Anthony. The rivers of the Missouri come from the west, and, after traversing three hundred leagues, arrive at a lake, which I believe *to be that of the Apaches*. The villages of the Missounta, Otentia and Osage are near one another, and are situated in the prairies, one hundred and fifty leagues from the mouth of the Missouri. I should have stated before that the river of the Illinois is two hundred leagues in length. The Fort St. Louis, with two hundred cabins, is seventy leagues from its mouth. The little river on which are the *michigamea*) Machigama, Chipoussa and Michibousa is forty leagues from the Tamazoa. These tribes are situated about ten leagues from its mouth.

The mouth of the river of the Kasquinanipo is ten leagues from the mouth of the Ouabache. The village is situated seventy leagues upwards, on the bank of the river.

Charles of
France

JOURNEYS OF

Tunica

The Maon, a numerous nation, and at peace with no one, is at the source of the said river, one hundred leagues from the Kasquinanipo. The Ozotoues are six leagues from the mouth of the River Arkansas. The Ionica, Yazou, Coroa and Chonque are, one with the other, about ten leagues from the Mississippi, on the river of the Yazou; the Sioux fifteen leagues above. All these villages are situated in prairies, but it is remarkable that the country about, the soil of which is the best in the world, and is intersected by streams, has been abandoned.

Chactaw
house

The Yazou are masters of the soil. The Mauton are seventy leagues from the Osoztoues and forty leagues from the Cadodouquis. The Coroa are their neighbors, though thirteen leagues off.

With respect to the other nations, I have sufficiently described at what distance they are from one another, from the nations on the Mississippi, and from those on the Red River, excepting the Nadouc, who are twelve leagues from the banks. In case the court wishes this discovery to be continued, I will add a note. In that I have stated it will be requisite to build a ship of fifty tons, to get to France from the Arkansas. Two pilots, &c.; particulars of everything neces-

LA SALLE

sary, and more numerous than set forth in M. de la Salle's Note.

I undertake, with God's assistance, to descend the river, to take solar observations, to account for the expenses, and to sail to France with the said vessel built in the Arkansas. This is the place best adapted for the purpose, for we should not be interrupted by enemies; and wood and everything necessary for subsistence is there abundant.

HENRY DE TONTY.

ADDITIONAL STATEMENT OF WHAT WILL BE REQUIRED FOR BUILDING THE VESSEL.

THE former statement related to the expenses of the voyage, and presents for the savages. In case his Majesty grants the above request, I entreat Monseigneur de Pontchartrain to be kind enough to send orders to M. the Intendant at Rochefort to send the things to Messrs. the Count de Frontenac and Champigny, and the latter to provide twenty large canoes and forty good men to manage them.

HENRY DE TONTY..

JOURNEYS OF

CHAPTER III.

ACCOUNT¹ OF THE DISCOVERY OF THE RIVER MISSISSIPPI AND THE ADJACENT COUN- TRY BY FATHER LOUIS HENNEPIN.

FINDING in myself a strong inclination to retire from the world, I entered into the Franciscan order, where I was overjoyed in reading the travels of the fathers of my own order, who were, indeed, the first that undertook missions into any foreign country. I thought nothing greater or more glorious than to instruct the ignorant and barbarous and lead them to the light of the gospel. In order to [do] which I went [as] missionary for Canada, by command of my superiors, and embarked at Rochelle, in company of M. de Laval, since Bishop of Quebec, the capital city of Canada. Our crew was about one hundred men, to three-fourths of whom I administered the sacrament, they being Catholics. I likewise performed divine service every day when the weather was calm, and we sung the Itin-

¹ This *Account* seems to be an abridged version of the *New Discovery*. Cf. Thwaites' edition of the latter. Vol. II., App. II. A., 10.

LA SALLE

erary of the clergy, translated into French verse, after evening prayers.

I shall omit the accidents that befell us, being such only as are inseparable companions of all great voyages. Soon after my arrival I was sent in mission about one hundred and twenty leagues beyond Quebec, accompanied by Father Luke Buisset. We went up the River St. Lawrence southwards till we came to Fort Frontenac, distant from Quebec one hundred leagues. It was built to prevent the excursions of the Iroquois, and to interrupt the trade of skins these savages maintain with the inhabitants of New York, who furnish them with commodities at cheaper rates than the French of Canada.

The Iroquois are an insolent and barbarous nation, and have shed the blood of more than two millions of people in that vast extended country. They would never cease from disturbing the repose of the Europeans, were it not for fear of their fire-arms; for they entertain no commerce with them, unless it be for arms, which they buy on purpose to use against their neighbors, and by means of which they have extended their bloody conquests five or six hundred leagues beyond their own precincts, exterminating whatever nation they hate.

JOURNEYS OF

I had already acquired some small knowledge of the Iroquois language, and Father Luke and I translated the Creed, Lord's Prayer and Litany, which we caused them to get by heart and repeat to their children. They pronounce no labial letters, such as B, P, M, F. Here we remained two years and a half, till we saw our house of mission finished, and then returned in a canoe down the River St. Lawrence to Quebec.

Having tarried there till those who were expected from Europe to bear part in this discovery were arrived, I embarked in a small canoe, made of the bark of birch trees, carrying nothing with me but a portable chapel, one blanket and a mat of rushes, which was to serve me for bed and quilt. I arrived at Fort Frontenac the 2d of November, 1678,² and on the 18th embarked in a brigatine of about ten tons and fifteen men, the *Sieur de la Motte*, commander. We sailed on till we came to the further end of the Lake Ontario, and on the 6th of January entered the River Niagara, where we set our carpenters and the rest of the crew to work in building a fort and some houses;

[² From this point Hennepin's narrative should be compared with those of Tonty (Vol. i., Ch. i) and Le Clercq (I., Chap. iv. and v.), and with Margry.]

LA SALLE

but, foreseeing that this was like to give jealousy to the Iroquois, and to the English who dwell near them, and have a great commerce with them, we told those of the village of Niagara that we did not intend to build a fort on the bank of their river, but only a great storehouse to keep the commodities we had brought to supply their occasions. And, to remove their suspicions, M. de la Motte thought it absolutely necessary to send an embassy to the Iroquois, telling me "he was resolved to take along with him seven men out of sixteen that we were in all, and desired me to accompany him, because I understood in a manner the language of their nation." We passed through forests thirty-two leagues, and after five days' journey came to a great village, and were immediately carried to the cabin of their principal. The younger savages washed our feet and rubbed them over with the grease of deer, wild goats and oil of bears. They are for the most part tall and well shaped, covered with a sort of robe made of beavers' and wolves' skins, or black squirrels, holding a pipe or calumet in their hands. The Senators of Venice do not appear with a graver countenance, and perhaps do not speak with more majesty and solidity than those ancient Iroquois.

JOURNEYS OF

One of our men, who well understood their language, told the assembly :

1. That we were come to pay them a visit and smoke with them in their pipes. Then we delivered our presents, consisting of axes, knives, a great collar of white and blue porcelain, with some gowns. The same presents were renewed upon every point we proposed to them.

2. We desired them to give notice to the five cantons of their nation that we were about to build a ship or great canoe above the great fall of the River Niagara, to go and fetch European commodities by a more convenient passage than that of the River St. Lawrence, whose rapid currents make it dangerous and long; and that by these means we should afford them our commodities cheaper than the English of Boston, or the Dutch, at that time masters of New York. This pretense was specious enough and very well contrived to engage the barbarous nation to extirpate the English and Dutch out of that part of America.

3. We told them we should provide them, at the River Niagara, with a blacksmith and gunsmith to mend their guns, axes, &c., they having nobody among them that understood that trade. We added many other reasons which we thought proper to per-

LA SALLE

suade them to favor our design. The presents we made unto them in cloth or iron were worth above four hundred livres, besides some other European commodities, very scarce in that country; for the best reasons in the world are not listened to among them unless they are enforced with presents.

The next day their speaker answered our discourse article by article, seeming to be pleased with our proposals, though they were not really so, having a greater inclination for the English and Dutch than for us. Whilst we were with them their parties had made an excursion towards Virginia and brought two prisoners. They spared the life of one, but put to death the other, with most exquisite torments. They commonly use this inhumanity towards all their prisoners, and their torments sometimes last a month. When they have brought them into their canton they lay them on pieces of wood like a St. Andrew's cross, to which they tie their legs and arms, and expose them to gnats and flies, who sting them to death. Children cut pieces of flesh out of their flanks, thighs or other parts and, boiling them, force those poor souls to eat thereof. Their parents eat some themselves and, the better to inspire into their children a

JOURNEYS OF

hatred of their enemies, give them some of their blood to drink. This cruelty obliged us to leave them sooner than we would have done, to show them the horror we had of their inhumanity, and never ate with them afterwards; but returned the same way we went, through the woods to the River Niagara, where we arrived the 14th of January, much fatigued with our voyage, having no food on the way but Indian corn. M. de la Motte, no longer able to endure so laborious a life, gave over his design and returned to Canada, having about two hundred leagues to travel.

On the 20th M. de la Salle arrived from Fort Frontenac with a great bark to supply us with provisions, rigging and tackling for the ship we designed to build at the mouth of the Lake Erie; but that bark was unfortunately cast away on the Lake Ontario, within two leagues of Niagara. On the 22d we went two leagues above the great fall of Niagara, where we made a dock for building the ship. M. de la Salle returned to Fort Frontenac, leaving one Tonti, an Italian, for our commander. He undertook this journey afoot, over the snow, having no other provision but a little sack of roasted Indian corn. However, he got home safely with two men and a dog, who

dragged his baggage over the frozen snow.

Most of the Iroquois were now gone to wage war on the other side of the Lake Erie, and our men continued, with great application, to build our ship; for the Iroquois who were left behind were not so insolent as before, though they came sometimes to our dock, and expressed some discontent at what we were doing.

We made all the haste we could to get our ship afloat, though not altogether finished, to prevent their designs of burning it. She was called the Griffin, about sixty tons, and carried five small guns. We fired three guns and sung *Te Deum*; and, carrying our hammocks aboard, the same day were out of the reach of the savages.

Before we could proceed in our intended discovery I was obliged to return to Fort Frontenac to bring along with me two monks of my own order to help me in the function of my ministry. I concealed part of the discouragements I had met with, because I designed to engage Father Gabriel and Zenobe in our voyage. Having dispatched our affairs, we three went aboard a brigantine, and in a short time arrived at the river which runs into the Lake Ontario, where we continued several days, our men being very busy in bartering their commodi-

JOURNEYS OF

ties with the natives, who exchanged their skins for knives, guns, powder and shot, but especially brandy, which they love above all things. M. de la Salle arrived in a canoe eight days after. These impediments retarded us so long that we could not reach the River Niagara before the 30th of July. Father Gabriel and I went overland to view the great fall, the like whereof is not in the whole world. It is compounded of two great cross streams of water and two falls, with an isle sloping along the middle of it. The waters which fall from this vast height do foam and boil after the most hideous manner imaginable, making an outrageous noise, more terrible than that of thunder; so that when the wind blows from the south their dismal roaring may be heard above fifteen leagues off.

The River Niagara having thrown itself down this incredible precipice, continues its impetuous course for two leagues with an inexpressible rapidity; and the banks are so prodigious high that it makes one tremble to look steadily on the water, rolling along with a rapidity not to be imagined. It is so rapid above the descent that it violently hurries down the wild beasts endeavoring to pass to feed on the other side, casting them down headlong above six hundred feet. A

LA SALLE

bark or greater vessel may pass from Fort Frontenac until you come within two leagues of the fall, for which two leagues the people are obliged to carry their goods overland; but the way is very good, and the trees are but few, and they chiefly firs and oaks. Were it not for this vast cataract, which interrupts navigation, we might sail with barks or greater vessels above four hundred and fifty leagues further.

On the 7th of August we went on board, being in all thirty-four men, and sailed from the mouth of the Lake Erie, and on the 11th entered a strait thirty leagues long and one broad, except in the middle, which makes < the lake of St. Clair. On the 23d we got into the Lake Huron. The 26th we had so violent a storm that we brought down our yards and topmasts and let the ship drive at the mercy of the wind, knowing no place to run into to shelter ourselves. M. de la Salle, notwithstanding he was a courageous man, began to fear, and told us we were undone; whereupon everybody fell on his knees to say his prayers and prepare himself for death, except our pilot, whom we could never oblige to pray; and he did nothing all that while but curse and swear against M. de la Salle, who had brought him thither to make him perish in a nasty

JOURNEYS OF

lake and lose the glory he had acquired by his long and happy navigations on the ocean. When the wind abated we hoisted our sail, and the next day arrived at Missilmakinak.

On the 2d of September we weighed anchor and sailed to an island at the mouth of the Bay of Puans [Green Bay], forty leagues from Missilmakinak. The chief among them, who had been formerly in Canada, received us with all the civility imaginable. M. de la Salle, without asking any other body's advice, resolved to send back the ship to Niagara, laden with furs and skins, to discharge his debts. Our pilot, and five men with him, were therefore sent back, and ordered to return with all imaginable speed to join us towards the southern parts of the lake, where we should stay for them among the Illinois. They sailed the 18th, with a westerly wind, and fired a gun as taking leave. It was never known what course they steered, nor how they perished; but it is supposed that the ship struck upon a sand and was there buried. This was a great loss for M. de la Salle and other adventurers, for that ship with its cargo cost above sixty thousand livres.

We continued our voyage in four canoes, being fourteen men in all, and departed the

LA SALLE

19th of September. We steered to the south towards the continent, distant from the island near forty leagues. On the 1st of October, after twelve leagues' rowing, we were in so great danger by stress of weather that we were forced to throw ourselves into the water and carry our canoes on our shoulders to save them from being broken to pieces. I carried Father Gabriel on my back, whose great age, being sixty-five years, did not permit him to venture into the water.

Having no acquaintance with the savages of the village near which we landed, we prepared to make a vigorous defense in case of an attack, and, in order to do it, possessed ourselves of a rising ground where we could not be surprised. We then sent three men to buy provisions in the village, with the calumet or pipe of peace which those of the island had given us. And, because the calumet of peace is the most sacred thing among the savages, I shall here describe the same.

It is a large tobacco pipe, of a red, black or white marble. The head is finely polished. The quill, which is commonly two feet and a half long, is made of a pretty strong reed or cane, adorned with feathers of all colors, interlaced with locks of

JOURNEYS OF

Women's hair. Every nation adorns it as they think fit, and according to the birds they have in their country.

Such a pipe is a safe conduct amongst all the allies of the nation who has given it; and in all embassies the calumet is carried as a symbol of peace, the savages being generally persuaded that some great misfortune would befall them if they should violate the public faith of the calumet. They fill this pipe with the best tobacco they have and then present it to those with whom they have concluded any great affair and smoke out of the same after them.

Our three men, provided with this pipe and very well armed, went to the little village three leagues from the place where we landed; but, finding nobody therein, took some Indian corn, and left instead of it some goods, to let them see that we were not robbers nor their enemies. However, twenty of them, armed with axes, small arms, bows and clubs, advanced near the place where we stood; whereupon M. de la Salle with four men, very well armed, went toward them to speak with them, and desired them to come near us, for fear a party of our men who were gone a-hunting should meet with them and kill them. They sat down at the foot of the eminence where we

LA SALLE

were posted, and M. de la Salle spoke to them all the while concerning his voyage, which he told them he had undertaken for their good and advantage. This was only to amuse them till our three men returned, who, appearing with the calumet of peace, the savages made a great shout and rose and began to dance. We excused our taking some of their corn, telling them that we had left the true value of it in goods, which they took so well that they sent immediately for more, and gave us next day as much as we could carry away in our canoes. They retired towards evening, and M. de la Salle ordered some trees to be cut down and laid across the way, to prevent any surprise from them. The oldest of them came to us next morning with their calumet of peace and brought us some wild goats. We presented them with some axes, knives and several little toys for their wives, with which they were well pleased.

We left that place the 2d of October and coasted along the lake, which is so steep that we could hardly find any place to land. The violence of the wind obliged us to drag our canoes sometimes to the top of the rocks to prevent their being dashed in pieces. The stormy weather lasted four days, during which we suffered very much, and our pro-

JOURNEYS OF

visions failed us again; which, with the fatigues of rowing, caused old Father Gabriel to faint away in such a manner that I thought verily he could not live. We had no other subsistence but a handful of Indian corn once every twenty-four hours, which we roasted or else boiled in water, and yet rowed almost every day from morning till night. Being in this dismal distress, we saw upon the coast a great many ravens and eagles, from whence we conjectured there was some prey; and, having landed upon that place, we found above the half of a fat wild goat which the wolves had strangled. This provision was very acceptable to us, and the rudest of our men could not but praise the divine Providence who took so particular a care of us.

Having thus refreshed ourselves, we continued our voyage directly to the southern parts of the lake. On the 16th we met with abundance of game. A savage we had with us killed several stags and wild goats, and our men a great many turkeys, very fat and big; wherewith we provided ourselves for several days, and so embarked again. On the 1st of November we came to the mouth of the river of the Miamis [St. Joseph], which runs from the south and falls into the lake. Here we spent all

LA SALLE

that month in building a fort forty feet long and eighty broad, made with great square pieces of timber laid one upon the other.

On the 3d of December we embarked, being thirty-three men, in eight canoes, and, having rowed about twenty-five leagues up the River Miamis to the south-west, we could not find the place where we were to land and carry our canoes and equipage into the river of the Illinois, which falls into Mississippi. Our savage, who was hunting ashore, not finding us at the place of portage, came higher up the river and told us we had missed it. So we returned and carried our canoes overland to the head of the Illinois River, which is but a league and a half from that of Miamis. We continued our course upon this river very near the whole month of December, towards the end of which we arrived at the village of the Illinois, about one hundred and thirty leagues from Fort Miamis. We found nobody in the village, which caused a great perplexity among us, for, though we wanted provisions, yet we durst not meddle with the corn which they had laid underground for their subsistence and to sow their lands with, it being the most sensible wrong one can do them, in their opinion, to take some of their corn in their absence.

JOURNEYS OF

However, our necessity being very great, and it being impossible to continue our voyage without it, M. de la Salle took about forty bushels of it, hoping to appease them with some presents.

We embarked again with this fresh provision and fell down the river the first of January, 1680. We took the elevation of the pole, which was $33^{\circ} 45'$. Although we used all the precaution we could, we found ourselves on a sudden in the middle of their camp, which took up both sides of the river. The Illinois, being much terrified, though they were several thousand men, tendered us the calumet of peace, and we offered them ours. M. de la Salle presented them with Martinico tobacco and some axes. He told them, "he knew how necessary their corn was to them, but that, being reduced too an unspeakable necessity when he came to their village, and seeing no probability to subsist, he had been forced to take some corn from their habitations without their leave. That he would give them axes and other things in lieu of it, if they could spare it; and if they could not, they were free to take it again." The savages considered our proposals, granted our demands and made an alliance with us.

Some days after Nikanape, brother to the

LA SALLE

most considerable man among them, who was then absent, invited us to a great feast, and before we sat down told us, "that he had invited us not so much to give us a treat as to endeavor to dissuade us from the resolution we had taken to go down to the sea by the great River Mississippi." He said, "that the banks of that river were inhabited by barbarous and bloody nations, and that several had perished upon the same enterprise." Our interpreter told him, by order of M. de la Salle, "that we were much obliged to him for his advice, but the difficulties and dangers he had mentioned would make our enterprise still more glorious. That we feared the Master of the life of all men, who ruled the sea and all the world, and therefore would think it happiness to lay down our lives to make His name known to all His creatures." However, Nikanape's discourse had put some of our men under such terrible apprehensions that we could never recover their courage nor remove their fears; so that six of them who had the guard that night (among which were two sawyers, the most necessary of our workmen for building our ship) ran away, taking with them what they thought necessary. But, considering the country through which they were to travel and the season

JOURNEYS OF

of the year, we may say that, in avoiding an uncertainty, they exposed themselves to a most certain danger.

M. de la Salle, seeing those six men were gone, exhorted the rest to continue firm in their duty, assuring them that if any were afraid of venturing themselves upon the river of Mississippi because of the dangers Nikanape had mentioned, he would give them leave to return next spring to Canada, and allow them a canoe to make their voyage; whereas they could not venture to return home at this time of the year without exposing themselves to perish with hunger, cold, or the hands of the savages.

On the 15th we made choice of an eminence on the bank of the river, defended on that side by the river and on two others by two deep ditches made by the rains, so that it was accessible only by one way. We cast a line to join those two natural ditches, and made the eminence steep on every side, supporting the earth with great pieces of timber. By the first of March our fort was near finished, and we named it Crève-cœur, because the desertion of our men, with the difficulties we labored under, had almost broken our hearts.³ We also built a bark for the continuance of our discovery. It

[³ Cf. Vol. I., page 104.]

LA SALLE

was forty-two feet long by the keel, and was in such forwardness that we should have been in a condition to sail in a very short time had we been provided with all other necessities. But, hearing nothing of our ship Griffin, and therefore wanting the rigging and other tackle we expected by her, we found ourselves in great perplexity, and did not know what to do in this sad juncture, being above five hundred leagues from Fort Frontenac, whither it was almost impossible to return at that time, because the snow made traveling very dangerous by land, and the ice made it impracticable to our canoes.

M. de la Salle did now no longer doubt but his beloved Griffin was lost, but neither this nor the other difficulties dejected him. His great courage buoyed him up, and he resolved with three men to return to Fort Frontenac by land, notwithstanding the snow and the unspeakable dangers attending so great a journey, and to bring along with him the necessary things to proceed on our discovery; while I with two men should go in a canoe to the River Mississippi to get the friendship of the nations inhabiting the banks thereof. Then, calling his men together, told them, "He would leave M. Tonti to command in the fort,

JOURNEYS OF

and desired them to obey his orders in his absence; to live in a Christian union and charity; to be courageous and firm in their design." He assured them, "He would return with all the speed imaginable and bring with him a fresh supply of meat, ammunition and rigging for our bark; and that in the meantime he left them arms and other things necessary for a vigorous defense in case their enemies should attack them before his return."

Then telling me, "That he expected that I should depart without further delay," he embraced me and gave me a calumet of peace, with two men to manage our canoe, Picard and Ako, to whom he gave some commodities to the value of about one thousand livres to trade with the savages or make presents. He gave to me in particular, and for my own use, ten knives, twelve shoemakers' awls or bodkins, a small roll of Martinico tobacco, two pounds of rassade, *i. e.*, little pearls or rings of colored glass, to make bracelets for the savages, and a small parcel of needles; telling me, "He would have given me a greater quantity, if it had been in his power."

Thus relying on the providence of God, and receiving the blessing of Father Gabriel, I embraced all our men and took my

LA SALLE

leave of M. de la Salle, who set out a few days after for Canada with three men, without any provisions but what they killed in their journey, during which they suffered very much by cold weather, snow, and hunger.

CHAPTER IV.

NARRATIVE OF THE FIRST ATTEMPT BY M. CAVELIER DE LA SALLE TO EXPLORE THE MISSISSIPPI. DRAWN UP FROM THE MANUSCRIPTS OF FATHER ZENOBIOUS MEMBRÉ, A RECOLLECT, BY FATHER CHRETIEN LECLERCQ.

THE *Sieur* Robert Cavelier de la Salle, a native of Rouen, of one of the most distinguished families there, a man of vast intellect, brought up for literary pursuits, capable and learned in every branch, especially in mathematics, naturally enterprising, prudent and moral, had been for some years in Canada, and had already, under the administration of De Courcelles and Talon, shown his great ability for discoveries. M. de Frontenac selected him to command Fort Frontenac, where he was nearly a year, till, coming to France in 1675, he obtained of

JOURNEYS OF

the court the government and property of the lake and its dependencies on condition of building there a regular stone fort, clearing the ground, and making French and Indian villages, and of supporting there, at his own expense, a sufficient garrison and Recollect missionaries.

Monsieur de la Salle returned to Canada and fulfilled these conditions completely; a fort with four bastions was built at the entrance of the lake on the northern side at the end of a basin, where a considerable fleet of large vessels might be sheltered from the winds. This fort enclosed that built by Monsieur de Frontenac. He also gave us a piece of ground fifteen arpents in front by twenty deep, the donation being accepted by Monsieur de Frontenac, syndic of our mission.

It would be difficult to detail the obstacles he had to encounter, raised against him daily in the execution of his plans, so that he found less opposition in the savage tribes whom he was always able to bring into his plans. Monsieur de Frontenac went up there every year, and care was taken to assemble there the chiefs and leading men of the Iroquois nations, great and small; maintaining by this means alliance and commerce with them, and disposing them to embrace

LA SALLE

Christianity, which was the principal object of the next establishment.¹

My design being to treat of the publication of the faith of that prodigious quantity of nations who are comprised in the dominions of the king, as his majesty has discovered them, we shall continue our subject by those which were made during the rest of the present epoch in all parts of New France.

While the reverend father Jesuits among the southern Iroquois on the upper part of the river had the honor of bearing the gospel to the nations bordering on those tribes; the peace between the two crowns of France and England giving them free access everywhere, without being traversed by the English, they announced the faith to the Etchemins and other Indian nations that came to trade at Loup River, where the ordinary

¹ Le Clercq, p. 119. The subsequent pages, down to page 131, relate to the religious affairs of the colony. The only reference to La Salle is this, on p. 127: "Our reverend fathers having obtained of the King letters-patent for our establishments at Quebec, Isle Percée, and Fort Frontenac, they were registered at the sovereign council of Quebec, and Monsieur de la Salle built, at his own expense, a house on the land he had given us near the fort, in which a chapel was made. A fine church was afterward added, adorned with paintings and necessary vestments—also, a regular house and appendages, completed by the exertions of Father Joseph Denis."

JOURNEYS OF

post of the mission was; our missions of St. John's River, Beaubassin, Mizamichis, Nipisiguit, Ristigouche and Isle Percée were similarly supported—we continued to labor for the conversion of the Indians of those vast countries comprised under the name of Acadia, Cape Breton and the great bay (Gulf of St. Lawrence).

In the time of M. de Courcelles and Talon the discoveries were pushed toward the north bay (Hudson's), of which something was known from two or three previous attempts. The Sieur de St. Simon was chosen for the expedition, with the Reverend Father Albanes (Albanel), a Jesuit. By the maps of the country it is easy to see what difficulties had to be surmounted, how much toil and hardship undergone, how many falls and rapids to be passed and portages made to reach by land these unknown parts and tribes as far as Hudson's bay or strait. M. de Frontenac was in Canada on the return of the party in 1672. The discovery thenceforward enabled them to push the mission much further to the north and draw some elect from those distant nations to receive the first rudiments of Christianity, until in 1686 the victorious arms of the king, under the guidance of M. de Troye, D'Hiberville, Ste. Helaine and a number of brave Cana-

LA SALLE

dians, by order of the Marquis d'Enonville, then governor-general of the country, conquered these northern parts, where, as the French arms are still gloriously maintained, the zeal of the Jesuit fathers is employed in publishing the gospel.

The unwearied charity of those illustrious missionaries advanced their labors with much more success during the present epoch among the Ottawa nations, seconded by the great zeal of Frontenac's protection and the ascendant which the wisdom of the Governor had acquired over the savages. A magnificent church, furnished with the richest vestments, was built at the mission of St. Mary's of the sault; that of the bay of the Fetid [Puants, Green Bay] and Michilimakinak Island were more and more increased by the gathering of Indian tribes. The missions around Lake Condé (Superior), further north, were also increased. This lake alone is one hundred and fifty miles long, sixty wide and about five hundred in circuit, inhabited by different nations, whence we may form an idea of the labors of the missionaries in five or six establishments. Finally, in the last years of M. de Frontenac's first administration, Sieur du Luth, a man of talent and experience, opened a way to the missionaries and

JOURNEYS OF

the gospel in many different nations turning toward the north of that lake, where he even built a fort. He advanced as far as the lake of the Issati, called Lake Buade, from the family name of M. de Frontenac, planting the arms of his majesty in several nations on the right and left, where the missionaries still make every effort to introduce Christianity, the only fruit which indeed consists in the baptism of some dying children and in rendering adults inexcusable at God's judgment by the gospel preached to them.

I shall hereafter limit myself to publish the great discoveries made by order of the king, under the command of M. de Frontenac and the direction of M. de la Salle, as being those which promised the greatest fruits for the establishment of the faith, if in course of time they are resumed and supported as they deserve.

The Sieur de la Salle, having completed the construction of Fort Frontenac and greatly advanced the establishment of French and Indian settlements, was induced by the report of many tribes to believe that great progress could be made by pushing on the discoveries by the lakes into the River Mississippi, which he then supposed to empty into the Red Sea (Gulf of Cali-

LA SALLE

fornia).² He made a voyage to France in 1677 and, favored by letters from the Count de Frontenac, obtained of the court necessary powers to undertake and carry out this great design at his own expense.

Furnished with these powers, he arrived in Canada toward the close of September, 1678, with the Sieur de Tonty, an Italian gentleman, full of spirit and resolution, who afterward so courageously and faithfully seconded him in all his designs. He had also with him thirty men—pilots, sailors, carpenters and other mechanics, with all things necessary for his expedition. Some Canadians having joined him, he sent all his party in advance to Fort Frontenac, where Father Gabriel de la Ribourde and Father Luke Buisset were already, and where Fathers Louis Hennepin, Zenobius Membré and Melithon Watteau now repaired. They were all three missionaries of our province of St. Anthony of Padua, in Artois, as well as Father Luke Buisset, his majesty having honored the Recollects with the care of the spiritual direction of the expedition by express orders addressed to Father Valentine

² This assertion seems perfectly gratuitous, and is not justified by the letters-patent to La Salle. Joliet's return set the matter at rest and left no doubt as to its emptying into the gulf. [Cf. Hennepin. (SHEA's Edition), *Description of Louisiana*, 60, 61.]

JOURNEYS OF

le Roux, commissary provincial and superior of the mission. The Sieur de la Salle soon followed them, the Almighty preserving him from many perils in that long voyage from Quebec, over falls and rapids to Fort Frontenac, where he arrived at last, much emaciated.² Deriving new strength from his great courage, he issued all his orders and sent off his troop in a brigantine for Niagara with Father Louis on the 18th of November.

The navigation, in which they had to encounter many dangers and even disasters crossing the great lake in so advanced a season, prevented their reaching Niagara River before the 5th of December. On the sixth they entered the river, and the following days, by canoe and land, advanced to the spot where the Sieur de la Salle intended to raise a fort and build a bark above Niagara Falls, whence the St. Lawrence (*Le Fleuve*) communicated with Lake Conty (Erie) and Lake Frontenac (Ontario) by the said falls and river, which is, as it were, the strait of communication.

A glance at the map will show that this project, with that of Fort Frontenac and the fort he was about to build at Niagara,

[² Dec. 16, 1678. Cf MARGRY I., 575.]

LA SALLE

might excite some jealousy among the Iroquois who dwelt in the neighborhood of the great lake. The Sieur de la Salle, with his usual address, met the principal chiefs of those tribes in conference and gained them so completely that they not only agreed to it, but even offered to contribute with all their means to the execution of his design. This great concert lasted some time. The Sieur de la Salle also sent many canoes to trade north and south of the lake among these tribes.

Meanwhile, as certain persons traversed with all their might the project of the Sieur de la Salle, they insinuated feelings of distrust in the Seneca Iroquois as the fort building at Niagara began to advance, and they succeeded so well that the fort became an object of suspicion and the works had to be suspended for a time, and he had to be satisfied with a house surrounded by palisades. The Sieur de la Salle did not fail to give prompt orders; he made frequent voyages from Fort Frontenac to Niagara, during the winter on the ice, in the spring with vessels loaded with provisions. In all the opposition raised by those envious of him fortune seemed to side with them against him; the pilot who directed one of his well-loaded barks lost it on Lake Fron-

JOURNEYS OF

tenac.⁴ When the snow began to melt he sent fifteen of his men to trade on the lake in canoes as far as the Illinois, to prepare him the way till his bark building at Niagara was completed. It was perfectly ready in the month of August, 1679.

The father commissary had started some time before them from Quebec for the fort to give the orders incumbent on his office and put in force those expedited in the month of July, by which Father Gabriel was named superior of the new expedition, to be accompanied by Father Louis Hennepin, Zenobius Membré and Melithon Watteaux, the latter to remain at Niagara and make it his mission, while Father Luke should remain at the fort.

The three former accordingly embarked on the 7th of August with Monsieur de la Salle and his whole party in the vessel, which had been named the Griffin in honor of the arms of Monsieur de Frontenac. Father Melithon remained at the house at Niagara, with some laborers and clerks. The same day they sailed for Lake Conty, after passing, contrary to all expectations, the currents of the strait. This was due to the resolution and address of the Sieur de la Salle, his men having before his arrival used

[⁴ Jan. 8, 1679. Cf. MARGRY I., 576.]

LA SALLE

every means to no purpose. It appeared a kind of marvel, considering the rapidity of the current in the strait, which neither man nor animal nor any ordinary vessel can resist, much less ascend.

The map will show that from this place you sail up Lake Conty (Erie) to Lake Orleans (Huron), which terminates in Lake Dauphin (Michigan), these lakes being each a hundred or a hundred and twenty leagues long by forty or fifty wide, communicating with one another by easy channels and straits, which offer vessels a convenient and beautiful navigation. All these lakes are full of fish; the country is most finely situated, the soil temperate; being north and south bordered by vast prairies, which terminate in hills covered with vines, fruit-trees, groves and tall woods, all scattered here and there, so that one would think that the ancient Romans, princes and nobles would have made them as many villas. The soil is everywhere equally fertile.

The Sieur de la Salle, having entered Lake Conty on the 7th, crossed it in three days, and on the 10th reached the strait (Detroit), by which he entered Lake Orleans. The voyage was interrupted by a storm as violent as could be met in the open sea; our people lost all hope of escape; but

JOURNEYS OF

a vow which they made to St. Anthony of Padua, the patron of mariners, delivered them by a kind of miracle,⁵ so that after long making head against the wind, the vessel on the 27th reached Missilimakinak, which is north of the strait, by which we go from Lake Orleans to Lake Dauphin.

No vessels had yet been seen sailing on the lakes, yet an enterprise which should have been sustained by all well-meaning persons for the glory of God and the service of the king had produced precisely the opposite feelings and effects, which had been already communicated to the Hurons, the Outaouäts (ort awa) of the island the neighboring nations, to make them ill affected. The Sieur de la Salle even found here the fifteen men whom he had sent in the spring prejudiced against him and seduced from his service; a part of his goods wasted, far from having proceeded to the Illinois to trade according to their orders; the Sieur de Tonty, who was at their head, having in vain made every effort to inspire them with fidelity.⁶

At last he weighed anchor, on the 2d of September, and arrived pretty safely at the Bay of the Fetid (Green Bay, at the en-

[⁵ Cf. HENNEPIN, *Louisiana*, Shea, ed.) 96.]

⁶ La Salle's sending them was a violation of his patent. See *Historical Collections of Louisiana*, vol. I., p. 35.

LA SALLE

trance of Lake Dauphin, forty leagues from Missilimakinak. Would to God that the Sieur de la Salle had continued his route in the vessel. His wisdom could not foresee the misfortunes which awaited him; he deemed proper to send it back by the same route to Niagara with the furs already bought, in order to pay his creditors. He even left in it a part of his goods and implements, which were not easy to transport. The captain had orders to return with the vessel as soon as possible and join us in the Illinois.

Meanwhile, on the 18th of September, the Sieur de la Salle, with our fathers and seventeen men, continued their route in canoes by Lake Dauphin, from the Pouteotatamis to the mouth of the river of the Miamis (St. Joseph's), where they arrived on the first of November. This place had been appointed a rendezvous for twenty Frenchmen, who came by the opposite shore, and also for the Sieur de Tonty, who had been sent by the Sieur de la Salle to Missilimakinak on another expedition.

The Sieur de la Salle built a fort there to protect his men and property against any attack of the Indians; our religious soon had a bark cabin erected to serve as a chapel, where they exercised their ministry for

JOURNEYS OF

French and Indians until the 3d of December, when, leaving four men in the fort, they went in search of the portage which would bring, them to the Seignelay (Illinois) which descends to the Mississippi. They embarked on this river to the number of thirty or forty, by which, after a hundred or a hundred and twenty leagues' sail, they arrived, toward the close of December, at the largest Illinois village, composed of about four or five hundred cabins, each of five or six families.

It is the custom of these tribes at harvest time to put their Indian corn in caches, in order to keep it for summer, when meat easily spoils, and to go and pass the winter in hunting wild cattle and beaver, carrying very little grain. That of our people had run short, so that, passing by the Illinois village, they were obliged, there being no one there, to take some Indian corn, as much as they deemed necessary for their subsistence.

They left it on the 1st of January, 1680, and by the 4th were thirty leagues lower down, amid the Illinois camp; they were encamped on both sides of the river, which is very narrow there, but soon after forms a lake about seven leagues long and about one wide, called Pimiteoui, meaning in their

LA' SALLE

language that there are plenty of fat beasts there. The Sieur de la Salle estimated it at $33^{\circ} 45'$. It is remarkable, because the Illinois River, which for several months in winter is frozen down to it, never is from this place to the mouth, although navigation is at times interrupted by accumulations of floating ice from above.

Our people had been assured that the Illinois had been excited and prejudiced against them. Finding himself then in the midst of their camp, which lay on both sides of the river, at a narrow pass, where the current was hurrying on the canoes faster than they liked, the Sieur de la Salle promptly put his men under arms and ranged his canoes abreast so as to occupy the whole breadth of the river; the canoes nearest the two banks, in which were the Sieur de Tonty and the Sieur de la Salle, were not more than half a pistol shot from the shore. The Illinois, who had not yet discovered the little flotilla ranged in battle order, were alarmed; some ran to arms, others fled in incredible confusion. The Sieur de la Salle had a calumet of peace, but would not show it, not liking to appear weak before them. As they were soon so near that they could understand each other, they asked our Frenchmen who they were. They replied

JOURNEYS OF

that they were French, still keeping their arms ready, and letting the current bear them down in order, because there was no landing place till below the camp.

The Indians, alarmed and intimidated by this bold conduct (although they were several thousand against a handful), immediately presented three calumets; our people at the same time presented theirs, and, their terror changing to joy, they conducted our party to their cabins, showed us a thousand civilities and sent to call back those who had fled. They were told that we came only to give them a knowledge of the true God, to defend them against their enemies, to bring them arms and other conveniences of life. Besides presents made them, they were paid for the Indian corn taken at their village; a close alliance was made with them, the rest of the day being spent in feasts and mutual greetings.

All the *Sieur de la Salle's* intrepidity and skill were needed to keep the alliance intact, as *Monsoela*,⁷ one of the chiefs of the nation of *Maskoutens*, came that very evening to traverse it. It was known that he was sent by others than those of his nation; he had even with him some *Miamis*, and young men bearing kettles, knives, axes and other

[⁷ *Monso*, according to *MARGRY II.*, 41.]

LA SALLE

goods. He had been chosen for this embassy, rather than a Miami chief, to give more plausibility to what he should say, the Illinois not having been at war with the Maskoutens, as they had with the Miamis. He caballed even the whole night, speaking of the Sieur de la Salle as an intriguer, a friend of the Iroquois, coming to the Illinois only to open the way to their enemies, who were coming on all sides with the French to destroy them; he made them presents of all that he had brought, and even told them that he came on behalf of several Frenchmen, whom he named.

This council was held at night, the time chosen by the Indians to transact secret business. This ambassador retired the same night, so that the next day the Illinois chiefs were found completely changed, cold and distrustful, appearing even to plot against our Frenchmen, who were shaken by the change; but the Sieur de la Salle, who had attached one of the chiefs to him particularly by some present, learned from him the subject of this change. His address soon dispelled all these suspicions, but did not prevent six of his men, already tampered with and prejudiced at Michilimakinak, from deserting that very day.

The Sieur de la Salle not only reassured

JOURNEYS OF

that nation, but found means in the sequel to disabuse the Maskoutens and Miamis and to form an alliance between them and the Illinois which lasted as long as the Sieur de la Salle was in the country.

With this assurance the little army, on the 14th of January, 1680, the floating ice from above having ceased, repaired to a little eminence, a site quite near the Illinois camp, where the Sieur de la Salle immediately set to work to build a fort, which he called Crève-cœur, on account of the many disappointments he had experienced,⁸ but which never shook his firm resolve. The fort was well advanced and the little vessel already up to the string-piece by the first of March, when he resolved to proceed to Fort Frontenac. There were four or five hundred leagues to go by land, but, not finding his brigantine, the Griffin, return, nor those he had sent on to meet her, and foreseeing the disastrous consequences of the probable loss of his vessel, his courage rose above the difficulties of so long and painful a journey.

As he had chosen Father Louis [Hennepin], and as the latter had offered to con-

⁸ It is more probable that the fort was named after a Dutch city, in the siege of which Tonty had participated. Cf. LE CLERCQ, *Estab't of the Faith* (SHEA, ed.), II., 123.]

LA SALLE

tinue the discovery toward the north by ascending the Mississippi, the Sieur de la Salle reserving to himself its continuation in canoe by descending till he found the sea, Father Louis set out in canoe from Fort Crèvecoeur on the 29th of February, 1680, with two men, well armed and equipped, who had besides twelve hundred livres in goods, which make a good passport. The enterprise was great and hardy, although it did not equal the great zeal of the intrepid missionary, who undertook and continued it with all the firmness, constancy and edification which can be desired, amid inconceivable toils.

Although the discovery had already been pushed four or five hundred leagues into Louisiana,* from Fort Frontenac to Fort Crèvecoeur, this great march can be considered only as a prelude and preparation for enterprises still more vast and an entrance to be made in countries still more advantageous.

I have hitherto given only a short abridgment of the relations which Father Zenobius Membré gives of the commence-

* In fact, no discovery had been made; the Illinois country was visited by traders before Marquette's second voyage to it, and was perfectly known; Allouez, too, was there shortly before this, as La Salle himself states.

JOURNEYS OF

ment of this enterprise. Father Louis, whom we see starting for the upper Mississippi, has published a description of the countries which he visited and into which he carried the gospel. I therefore refer my reader to it without repeating it here. We have, then, only to describe what is most essential and important in this discovery conducted by the personal labors of the Sieur de la Salle in the subsequent years.

CHAPTER V.

NARRATIVE OF THE ADVENTURES OF LA SALLE'S PARTY AT FORT CREVECŒUR, IN ILLINOIS, FROM FEBRUARY, 1680, TO JUNE, 1681, BY FATHER ZENOBIOUS MEMBRÉ, RECOLLECT.¹

FATHER LOUIS (HENNEPIN) having set out on the 29th of February, 1680, the Sieur de la Salle left the Sieur de Tonty as com-

¹ If the projects of La Salle had raised up against him pertinacious enemies, they nevertheless drew around him a few faithful and devoted friends, and none more conspicuous than the excellent missionary whose journals we here insert. The amiable Father Membré is the name under which all seem to delight in presenting him to us, so much were they touched by his goodness of heart. Were it prudent to credit Hennepin's last work for anything new, we might say that Membré was born at Bapaume, a small fortified town now in France, but then in the Spanish Nether-

LA SALLE

mander of Fort Crèvecoeur, with ammunitions and provisions and peltries to pay the workmen as agreed, and merchandise to

lands, and that he was a cousin of Father Christian le Clercq, who published his journals in the "Etablissement de la Foi." It was probably on entering the Recollect convent in Artois, where he was the first novice in the new province of St. Anthony, that he assumed the name of Zenobius. With his cousin, Le Clercq, he was the first sent by that province to Canada, where he arrived in 1675, from which time till that of his departure for Frontenac, in September 1678, he was probably employed at the convent of Quebec, as his name does not appear in any of the neighboring parish registers examined to obtain his autograph. From Fort Frontenac he accompanied La Salle to Niagara, Mackinaw, and at last to Fort Crèvecoeur, in Illinois. Here he was left by that commander with Tonty and Father Gabriel de la Rebourde, with whom, on the inroad of the Iroquois and flight of the Illinois, he endeavored to reach Green Bay. Father Gabriel perished on the way by the hand of the Kikapoos; the survivors were hospitably received by the Jesuits at Green Bay, where they wintered, and in the spring proceeded to Mackinaw with Father Enjalran. Here La Salle soon joined them, and Membre, after a voyage to Fort Frontenac, and probably to Montreal, with that commander in the spring of 1681, descended the Mississippi with him to the gulf, and on their return proceeded, at his request, to France, in 1682, to lay before the government the result of the expedition. He left a journal of his voyage at Quebec; but, as he declined communicating it to the new governor, De la Barre, the latter, in his report to the home government, throws imputations on any account of the missionary, which must, however, be ascribed only to bias and dissatisfaction. After fulfilling his mission at court Father Membre became warden of the Recollects at Bapaume, and remained so till he was appointed, at La Salle's request,

JOURNEYS OF

trade with and buy provisions as we needed them, and, having lastly given orders as to

superior of the missionaries who were to accompany his expedition by sea. Father Membré reached Texas in safety, and, though nearly drowned in the wreck of one of the vessels, was left by La Salle in good health at Fort St. Louis, in January, 1687, intending as soon as possible to begin a mission among the friendly Cenis with Father Maximus le Clercq. The colony was, however, cut to pieces by the Indians, for when, in 1689, a party of Spaniards set out to expel the French as intruders, all was silent as they drew near. To their horror they found on reaching it nothing but dead bodies within and without: priest and soldier, husband and wife, old and young, lay dead before them, pierced with arrows or crushed with clubs. Touched with compassion, the Spaniards committed their remains to a common grave and retired. Here Father Membré perished, but earth has no record of the day. He was not, apparently, a man of refined education, nor is this a reproach, as his order was not intended to direct colleges and seats of learning, but to preach to the poor and lowly. But though his journal is often involved and obscure, it bears intrinsic marks of fidelity, and shows him to have been less prejudiced than many of his companions. Fitted rather for the quiet direction of a simple flock, his zeal could not bear up against the hardships and barrenness of an Indian mission, for which no previous training or associations had fitted him, while his many wanderings tended still more to prevent his usefulness. His only permanent mission was in Illinois, where he labored assiduously with Father Gabriel from March to September, 1680, notwithstanding the repugnance which he felt for the ungrateful field. They are, accordingly, after the Jesuits Marquette and Allouez, the first missionaries of Illinois, and worthy of a distinguished place in her annals, and of the noble eulogy of Mr. Sparks, on the missionaries of New France.

LA SALLE

what was to be done in his absence, set out with four Frenchmen and an Indian on the 2d of March, 1680. He arrived on the 11th at the great Illinois village where I then was, and thence, after twenty-four hours' stay, he continued his route on foot over the ice to Fort Frontenac.² From our arrival at Fort Crèvecoeur, on the 14th of January past, Father Gabriel, our superior; Father Louis and myself had raised a cabin, in which we had established some little regularity, exercising our functions as missionaries to the French of our party and the Illinois Indians, who came in crowds. As by the end of February I already knew a part of their language, because I spent the whole of the day in the Indian camp, which was but half a league off, our father superior appointed me to follow when they were about to return to their village. A chief named Oumahouha had adopted me as his son in the Indian fashion, and M. de la Salle had made him presents to take care of me. Father Gabriel resolved to stay at the fort with the Sieur de Tonty and the workmen; this had been, too, the request of the Sieur de la Salle, who hoped that by his credit and the apparent confidence of the

[² SHEA in *Estab't of the Faith*, II., 130, note, calls this journey "the only really bold and adventurous act known of La Salle."]]

JOURNEYS OF

people in him he would be able to keep them in order; but God permitted that the good intentions in which the *Sieur de la Salle* thought he left them should not last long. On the thirteenth he himself had met two of his men whom he had sent to *Missilimakinak* to meet his vessel, but who had got no tidings of it. He addressed them to the *Sieur de Tonty*; but these evil-disposed men caballed so well that they excited suspicion and dissatisfaction in most of those there, so that almost all deserted, carrying off the ammunition, provisions and all that was in store. Two of them who were conducting *Father Gabriel* to the *Illinois* village, where *M. de Tonty* had come on a visit, abandoned the good father at night in the middle of the road and spiked the guns of the *Sieur de Boisrondet* and the man called *Lesperance*, who were in the same canoe, but not in their plot. They informed the *Sieur de Tonty*, who, finding himself destitute of everything, sent four of those who remained by two different routes to inform the *Sieur de la Salle*.

The perfidious wretches assembled at the fort which the *Sieur de la Salle* had built at the mouth of *Myamis' River*, demolished the fort, carried off all that was there and, as we learned some months after, went to

LA SALLE

Missilimakinak, where they seized the peltries belonging to the Sieur de la Salle and left in store there by him.^a

The only great Ilinois village being composed of seven or eight thousand souls, Father Gabriel and I had a sufficient field for the exercise of our zeal, besides the few French who soon after came there. There are, moreover, the Miamis, situated southeast by south of the bottom of the Lake Dauphin, on the borders of a pretty fine river, about fifteen leagues inland at 41° N.; the nation of the Maskoutens and Outagamies [Foxes], who dwell at about 43° N., on the banks of the river called Melleoki (Milwaukee), which empties into Lake Dauphin, very near their village; on the western side the Kikapous and the Ainoves (Iowas), who form two villages; west of these last, above the River Checagoumemant, the village of the Ilinois Cascaschia, situated west of the bottom of Lake Dauphin, a little southwest at about 41° N.; the Anthoutantass⁴ [Ottos] and Maskoutens, Nadouesions,^b about one hundred and thirty leagues from the Ilinois, in three great villages built near a river which empties into

[^b The two names go together and refer to a band of Sioux (Shea).]

JOURNEYS OF

the River Colbert on the west side, above that of the Illinois, almost opposite the mouth of the Miskoncing, in the same river. I might name here a number of other tribes with whom we had intercourse, and to whom French *coureurs-de-bois*, or lawfully sent, rambled while I was with the Illinois, under favor of our discovery.

The greater part of these tribes, and especially the Illinois, with whom I have had intercourse, make their cabins of double mats of flat rushes sewed together. They are tall of stature, strong and robust, and good archers; they had as yet no firearms; we gave them some. They are wandering, idle, fearful, and desolate, almost without respect for their chiefs, irritable and thievish. Their villages are not enclosed with palisades, and, being too cowardly to defend them, they take to flight at the first news of a hostile army. The richness and fertility of the country gives them fields everywhere. They have used iron implements and arms only since our arrival. Besides the bow, they use in war a kind of short pike and wooden maces.* Hermaphrodites are numerous. They have many wives, and often take several sisters that they may agree better;

* All agree in the great skill of the Illinois bowmen, and even as late as 1692-93, when Rale was with them, they had not yet begun to use guns.

LA SALLE

and yet they are so jealous that they cut off their noses on the slightest suspicion. They are lewd, and even unnaturally so, having boys dressed as women, destined for infamous purposes. These boys are employed only in women's work, without taking part in the chase or war. They are very superstitious, although they have no religious worship. They are, besides, much given to play, like all the Indians in America that I am able to know.

As there are in their country many serpents, these Indians know herbs much superior to our orvietan and theriaque, for, after rubbing themselves with them, they can without fear play with the most venomous insects, and even put them some distance down their throat. They go perfectly naked in summer, except the feet, which are covered with shoes of ox-hide, and in winter they protect themselves against the cold (which is piercing in these parts, though of short duration) with skins, which they dress and card very neatly.

Although we were almost destitute of succor, yet the *Sieur de Tonty* never lost courage; he kept up his position among the Illinois either by inspiring them with all the hopes which he built on the *Sieur de la Salle's* return or by instructing them in the

JOURNEYS OF

use of firearms and many arts in the European way. As during the following summer a rumor ran that the Miamis wished to move and join the Iroquois, he taught them how to defend themselves by palisades, and even made them erect a kind of little fort with intrenchments, so that, had they had a little more courage, I have no doubt they would have been in a position to sustain themselves.

Meanwhile, from the flight and desertion of our men about the middle of March to the month of September, Father Gabriel and I devoted ourselves constantly to the mission. An Illinois named Asapista, with whom the Sieur de la Salle had contracted friendship, adopted Father Gabriel as his son, so that that good father found in his cabin a subsistence in the Indian fashion. As wine failed us for the celebration of the divine mysteries, we found means, toward the close of August, to get wild grapes which began to ripen, and we made very good wine, which served us to say mass till the second disaster, which happened a few days after. The clusters of these grapes are of prodigious size, of very agreeable taste, and have seeds larger than those of Europe.

With regard to conversions, I can not

LA SALLE

rely on any. During the whole time Father Gabriel unraveled their language a little, and I can say that I spoke so as to make myself understood by the Indians on all that I wished; but there is in these savages such an alienation from the faith, so brutal and narrow a mind, such corrupt and anti-Christian morals, that great time would be needed to hope for any fruit. It is, however, true that I found many of quite docile character. We baptized some dying children and two or three dying persons who manifested proper dispositions. As these people are entirely material in their ideas, they would have submitted to baptism, had we liked, but without any knowledge of the sacrament. We found two who had joined us and promised to follow us everywhere; we believed that they would keep their word and that by this means we would insure their baptisms; but I afterwards felt great scruples when I learned that an Indian named Chassagouaché, who had been baptized, had died in the hands of the medicine men, abandoned to their superstitions, and consequently doubly a child of hell.

During the summer we followed our Indians in their camps and to the chase. I also made a voyage to the Myamis to learn something of their dispositions; thence I

JOURNEYS OF

went to visit other villages of the Illinois, all, however, with no great success, finding only cause for chagrin at the deplorable state and blindness of these nations. It is such that I cannot express it fully.

Thus far we enjoyed a pretty general peace, though meanwhile a cruel war, which we knew not, was machinating. While we were still at Fort Frontenac, the year before the Sieur de la Salle learned that his enemies had, to baffle his designs, excited the Iroquois to resume their former hostilities against the Illinois, which had been relinquished for several years. They sought, too, to draw the Miamis into the same war. This is a tribe which formerly dwelt beyond the Illinois, as regards the Iroquois and Fort Frontenac. They had persuaded them to invite the Iroquois by an embassy to join them against their common enemy; those who came to treat of this affair with the Iroquois brought letters from some ill-disposed Frenchmen who had correspondents in those tribes, for there were at that time many coureurs de bois.

The Sieur de la Salle happened to be among the Senecas when this embassy arrived; the moment seemed unfavorable, and the ambassadors were privately warned that they risked their lives if they did not depart

LA SALLE

as soon as possible, the Sieur de la Salle being a friend of the Illinois. The Myamis, however, left his former country and came and took up a position where he is now between the Iroquois and the Illinois. This was afterward believed intentional, and we having to pass through both these nations suspected by each other, might become so to one of them, who would then prevent our progress. Monsieur de la Salle, on his arrival at the Illinois last year, made peace between the two nations; but, as the Indians are very inconstant and faithless, the Iroquois and the Myamis afterwards united against the Illinois by means which are differently related.

Be that as it may, about the 10th of September, in the present year, 1680, the Illinois, allies of Chaouenons (Shawnees), were warned by a Shawnee, who was returning home from an Illinois voyage, but turned back to advise them, that he had discovered an Iroquois army, four or five hundred strong, who had already entered their territory. The scouts sent out by the Illinois confirmed what the Shawnee had said, adding that the Sieur de la Salle was there. For this there was no foundation, except that the Iroquois chief had a hat and a kind of vest. They at once talked of tomahawk-

JOURNEYS OF

ing us, but the *Sieur de Tonty* undeceived them, and, to show the falsity of the report, offered to go with the few men he had to fight the *Iroquois* with them. The *Illinois* had already sent out to war the greater part of the young men, yet the next day they took the field against the enemy, whom the *Myamis* had reinforced with a great number of their warriors. This multitude terrified the *Illinois*; nevertheless, they recovered a little at the solicitation of the *Sieur de Tonty* and the French. They at first mingled and wrangled, but the *Sieur de Tonty*, having grounds to fear for the *Illinois*, who had almost no firearms, offered to put matters in negotiation and to go to the *Iroquois* as a man of peace, bearing the calumet. The latter, hoping to surprise the *Illinois*, and seeing their hopes baffled by the state in which they found them resolved for battle, received without any demur a man who came with a calumet of peace, telling them that the *Illinois* were his brothers, friends of the French, and under the protection of *Ononto*, their common father. I was beside the *Sieur de Tonty*, when an *Iroquois* whom I had known in the *Seneca* village recognized me. These proposals for peace did not, however, please some young men, whose hands itched for fight; suddenly a

LA SALLE

volley of balls and arrows came whizzing around us, and a young Onondaga ran up with a drawn knife and struck M. de Tonty near the heart, the knife fortunately glancing off a rib. They immediately surrounded him and wished to carry him off; but when, by his ears, which were not pierced, they saw that he was a Frenchman, one of the Iroquois chiefs asked loudly what they had meant by striking a Frenchman in that way, that he must be spared, and drew forth a belt of wampum to staunch the blood and make a plaster for the wound. Nevertheless, a mad young Iroquois having hoisted the Sieur de Tonty's hat on a gun to intimidate the Illinois, the latter believing by this sign that Tonty was dead, we were all in danger of losing our heads; but the Iroquois having told us to show ourselves and stop both armies, we did so.⁷ The Iroquois received the calumet and pretended to retire; but scarcely had the Illinois reached his village when the Iroquois appeared on the opposite hills.

This movement obliged the Sieur de Tonty and the chiefs of the nation to depute me to these savages to know their reason. This was not a very agreeable mission to a savage tribe, with arms in their hands, espe-

[⁷ Cf. MARGY I., 510, 586.]

JOURNEYS OF

cially after the risk I had already run ; nevertheless, I made up my mind, and God preserved me from all harm. I spoke with them ; they treated me very kindly, and at last told me that the reason of their approach was that they had nothing to eat. I made my report to the Illinois, who gave them their fill, and even offered to trade for beaver and other furs, very abundant in those parts. The Iroquois agreed, hostages were given and received, and I went with an Illinois to the enemy's camp, where we slept. The Iroquois came in greater numbers into that of the Illinois, and even advanced to their village, committing hostilities so far as to disinter the dead and destroy their corn ; in a word, seeking a quarrel, under show of peace, they fortified themselves in the village. The Illinois, on the first announcement of war, had made their families draw off behind a hill, to put them out of sight and enable them to reach the Mississippi, so that the Iroquois found the village empty. The Illinois warriors retired in troops on the hills, and even gradually dispersed, so that we, seeing ourselves abandoned by our hosts, who no longer appeared in force, and left alone, exposed to the fury of a savage and victorious enemy, were not long in resolving to retreat. The reverend

LA SALLE

father Gabriel, the Sieur de Tonty, the few French who were with us and myself began our march on the 18th of September, without provisions, food or anything, in a wretched bark canoe, which, breaking the next day, compelled us to land about noon to repair it. Father Gabriel, seeing the place of our landing fit for walking in the prairies and hills with little groves, as if planted by hand, retired there to say his breviary, while we were working at the canoe all the rest of the day. We were full eight leagues from the village, ascending the river. Toward evening I went to look for the Father, seeing that he did not return; all our party did the same; we fired repeatedly to direct him, but in vain; and, as we had reason to fear the Iroquois during the night, we crossed to the other side of the river and lit up fires, which were also useless. The next morning at daybreak we return to the same side where we were the day before and remained till noon, making all possible search. We entered the wood, where we found several fresh trails, as well as in the prairie on the bank of the river. We followed them one by one, without discovering anything, except that M. de Tonty had ground to believe and fear that some hostile parties were in ambush to cut us all off, for,

JOURNEYS OF

seeing us take flight, the savages had imagined that we declared for the Illinois. I insisted on staying to wait for positive tidings, but the *Sieur de Tonty* forced me to embark at three o'clock, maintaining that the Father had been killed by the enemy, or else had walked on along the bank, so that, following it constantly, we should at last infallibly meet him. We got, however, no tidings of him, and the more we advanced the more this affliction unmanned us, and we supported this remnant of a languishing life by the potatoes and garlick and other roots that we found by scraping the ground with our fingers.

We afterward learned that we should have expected him uselessly, as he had been killed soon after landing. The Kikapous, a little nation you may observe on the west, quite near the Winnebagoes, had sent some of their youth in war parties against the Iroquois but learning that the latter were attacking the Illinois, the war party came after them. Three braves who formed a kind of advanced guard, having met the good father alone, although they knew that he was not an Iroquois, killed him for all that, cast his body into a hole, and carried off even his breviary and diurnal, which soon after came to the hands of a Jesuit

LA SALLE

father. They carried off the scalp of this holy man and vaunted of it in their village as an Iroquois scalp. Thus died this man of God by the hands of some mad youths. We can say of his body what the Scripture remarks of those whom the sanguinary Herod immolated to his fury, "*Non erat qui sepüleret.*" Surely he deserved a better fate, if, indeed, we can desire a happier one before God, than to die in the exercise of the apostolic functions by the hands of nations to whom we are sent by God. He had not been merely a religious of common and ordinary virtue; it is well known that he had in Canada, from 1670, maintained the same sanctity of life which he had shown in France as superior, inferior and master of novices. He had for a long time, in transports of fervor, acknowledged to me the profound grief which he felt at the utter blindness of these people, and that he longed to be an anathema for their salvation. His death, I doubt not, has been precious before God, and will one day have its effect in the vocation of these people to the faith, when it shall please the Almighty to use His great mercy.*

* Of this estimable missionary we know little but what was given in Hennepin. He was, we are assured, the last scion of a noble Burgundian house, who not only renounced his inheritance

JOURNEYS OF

We must admit that this good old man, quite attenuated, like ourselves, by want of everything, would not have been able to support the hardships we had to go through after that. The Sieur de Tonty and de Boisrondet and two other Frenchmen, with myself, had still eighty leagues to make to the Pottawatomis. Our canoe often failed us and leaked on all sides. After some days we had to leave it in the woods and make

and the world to enroll himself among the lowly children of St. Francis, but even when advanced in life, and honored with the first dignities of his order, sought the new and toilsome mission of Canada. He came out among the first Recollect fathers in the summer of 1670, and on the return of the provincial, F. Allart, to France, became commissary and first superior of the mission, as well as confessor to Frontenac. He restored such missions as circumstances enabled him to begin, and guided his little flock with such moderation and skill in the troublous times on which he had fallen that he acquired the veneration and respect of all parties. His moderation was not, indeed, liked by all, and a few years after F. Eustace Maupassant was sent out to succeed him, and the venerable Ribourde was sent as missionary to Fort Frontenac, but not before he had witnessed the consecration of their church at Quebec. He was subsequently joined by Buisset and Hennepin, and consulting his zeal rather than his age, embarked with La Salle. The date of his death is September 9, 1680; he was then in the seventieth year of his age, and had spent more than forty in the religious state, and, as master of novices, trained many to imitate his zeal and virtues. "This holy religious," with Membré, who was to perish in the same unknown way, are among the earliest missionaries of Illinois.

the rest of our journey by land, walking barefooted over the snow and ice. I made shoes for my companions and myself of Father Gabriel's cloak. As we had no compass, we frequently got lost, and found ourselves in the evening where we had started in the morning, with no other food than acorns and little roots. At last, after fifteen days' march, we killed a deer, which was a great help to us. The Sieur de Boisrondet lost us, and for at least ten days we thought him dead. As he had a tin cup, he melted it to make balls for his gun, which had no flint. By firing it with a coal he killed some turkeys, on which he lived during that time. At last we fortunately met at the Pottawatami village, where their chief, Onanghissê, quite well known among those nations, welcomed us most cordially. He used to say that he knew only three great captains—M. de Frontenac, M. de la Salle and himself. The chief harangued all his people, who contributed to furnish us food. Not one of us could stand for weakness; we were all like skeletons, the Sieur de Tonty extremely sick; but, being a little recruited, I found some Indians going to the bay of the Fetid, where the Jesuits have a house. I accordingly set out for it, and cannot express the hardships I had to un-

JOURNEYS OF

dergo on the way. The Sieur de Tonty followed us soon after with the rest. We cannot sufficiently acknowledge the charity these good fathers displayed toward us until the thaws began, when we set out with Father Enjalran in a canoe for Missilimakinak, hoping to find news there from Canada.

From the Illinois we had always followed the route by the north; had God permitted us to take that by the south of Lake Dauphin we should have met the Sieur de la Salle, who was coming with well-furnished canoes from Fort Frontenac, and had gone by the south to the Illinois, where he expected to find us with all his people in good order, as he had left us when he started in the preceding year (March 2d, 1680).⁹

1613 This he told us himself when he arrived at Missilimakinak, about the middle of June [1618], when he found us a little restored from our sufferings. I leave you to conceive our mutual joy, damped though it was by the narrative he made us of all his misfortunes and by that we made him of our tragical adventures. He told us that after our departure from Fort Frontenac they had excited his creditors before the

[⁹ For La Salle's movements cf. MARGRY I., 514-524; II., 137.]

LA SALLE

time to seize his property and all his effects, on a rumor which had been spread that he had been drowned with all his people. He told us that his ship, the Griffin, had perished in the lakes a few days after leaving the bay of the Fetid; that the captain, sailors and more than ten thousand crowns in merchandise had been lost and never heard of. He had sent little fleets of canoes to trade right and left on Lake Frontenac; but these wretches, he told us, had profited by the principal and the trade, without his being able to obtain any justice from those who should have rendered it, notwithstanding all the efforts made by M. de Frontenac, the governor, in his favor; that, to complete his misfortunes, a vessel coming from France with a cargo for his account, amounting to twenty-two thousand livres, had been wrecked on St. Peter's Islands, in the Gulf of St. Lawrence; that canoes ascending from Montreal to Fort Frontenac loaded with goods had been lost in the rapids; in a word, that, except the Count de Frontenac, all Canada seemed in league against his undertaking. The men he had brought from France had been seduced from him; some had run off with his goods to New York; and as regarded the Canadians who had joined him, means had been

JOURNEYS OF

found to work upon them and draw them from his interests.

Although he had left Fort Frontenac in his bark on the 23d of July, 1680, he was detained on the lake by head winds, so that he could not reach the straits of Lake de Conty till the close of August. All seemed to oppose his undertaking. Embarking in the beginning of September on Lake de Conty, he had been detained with M. de la Forrest, his lieutenant, and all his men at Misilimakinak, being unable to obtain corn for goods or money; but at last, as it was absolutely necessary, he was obliged, after three weeks' stay, to buy some for liquor, and in one day he got sixty sacks.

He left there the 4th of October, and on the 28th [24th] of November reached the Myamis' River, where he left a ship-carpenter and some of his people; then, pushing on, reached the Illinois on the first of December. There he was greatly surprised to find their great village burnt and empty. The rest of the time was spent in a journey to the Myamis' River, where he went to join his men forty leagues from the Illinois. Thence he passed to different tribes, among others to an Outagamis village, where he found some Illinois, who related to him the unhappy occurrences of the preceding year.

LA SALLE

He learned, moreover, that after our flight and departure from the Illinois their warriors had returned from the Nadoues-siouz, where they had been at war, and that there had been several engagements, with equal loss on both sides, and that at last, of the seventeen Illinois villages, the greater part had retired beyond the River Colbert, among the Ozages, two hundred leagues from their country, where, too, a part of the Iroquois had pursued them.

At the same time the Sieur de la Salle intrigued with the Outagami chiefs, whom he drew into his interests and those of the Illinois; thence he passed to the Myamis, whom he induced by presents and arguments to leave the Iroquois and join the Illinois; he sent two of his men and two Abenakis to announce this to the Illinois and prevent new acts of hostility and to recall the dispersed tribes. To strengthen both more, he sent others with presents to the Shawness to invite them to come and join the Illinois against the Iroquois, who carried their wars even to them. All this had succeeded when M. de la Salle left on the 22d of May, 1681, to return to Missilimakinak, where he expected to find us. If we wish to settle in these parts and see the faith make any progress it is absolutely nec-

JOURNEYS OF

essary to maintain peace and union among all these tribes, as well as among others more remote, against the common enemy—that is, the Iroquois—who never makes a real peace with any whom he has once beaten, or whom he hopes to overcome by the divisions which he artfully excites; so that we should be daily exposed to routs like that to which we were subjected last year. M. de la Salle, convinced of this necessity, has, since our return, purchased the whole Illinois¹⁰ country, and has given cantons to the Shawnees, who there colonize in large families.

The Sieur de la Salle related to us all his hardships and voyages, as well as all his misfortunes, and learned from us as many regarding him; yet never did I remark in him the least alteration, always maintaining his ordinary coolness and self-possession. Any one but him would have renounced and abandoned the enterprise; but, far from that, by a firmness of mind and an almost unequalled constancy, I saw him more resolute than ever to continue his work and to carry out his discovery. We accordingly left for Fort Frontenac with his whole party to adopt new measures to resume and com-

plete our course, with the help of heaven,
in which we put all our trust.

CHAPTER VI.

NARRATIVE OF LA SALLE'S VOYAGE DOWN THE MISSISSIPPI, BY FATHER ZENOBIUS MEMBRÉ, RECOLLECT.

M. DE LA SALLE, having arrived safely at the Miamies on the 3d of November,¹ 1681, began with his ordinary activity and vast mind to make all preparations for his departure. He selected twenty-three Frenchmen and eighteen Mohegans and Abnakis,²

[¹ Others give Dec. 16 and 19. Cf. MARGEY I, 593; II., 20.]

² The Mohegans, whose name is generally translated by old French writers, who call them "*Loups*," or "Wolves," were hereditary enemies of the Iroquois. They were known to the French as early as the time of Champlain, who calls them "*Mayganathicoise*." It is needless here to follow the varieties in orthography which it underwent. The Iroquois called them "*Agotsagenens*" (F. Jogues' MS.). Their relations with their European neighbors seem always to have been friendly, and they never apparently warred on either English, Dutch or French, although their position between the Hudson and Connecticut exposed them to frequent occasions of trouble. Though never really the allies of the French, the hostility of the Iroquois to both brought them in contact, so that Mohegans frequently figure in small parties in French campaigns.

The Abnakis were a people of Maine, and, like

JOURNEYS OF

all inured to war. The latter insisted on taking along ten of their women to cook for them, as their custom is while they were fishing or hunting. These women had three children, so that the whole party consisted of but fifty-four persons, including the *Sieur de Tonty* and the *Sieur Dautray*, son of the late *Sieur Bourdon*, procurator-general of Quebec.

On the 21st of December I embarked with the *Sieur de Tonty* and a part of our people on Lake Dauphin (Michigan), to go toward the divine river, called by the Indians *Checagou*, in order to make necessary arrangements for our voyage. The *Sieur de la Salle* joined us there with the rest of his troop on the 4th of January, 1682, and found that *Tonty* had had sleighs made to put all on and carry it over the Chicago, which was frozen; for, though the winter in these parts is only two months long, it is, notwithstanding, very severe.

the *Mohegans*, of the *Algonquin* family. They were originally allies of the English, who called them "*Taranteens*," but the unwise policy of the New England colonies compelled them to join the French. Their conversion to the Catholic religion, which they still profess, tended still more to embitter the colonies against them, and long and bloody wars resulted, in which the *Abnakis*, forsaken by the French, were at last humbled. They now form about five villages in Maine and Canada.

LA SALLE

We had to make a portage to enter the Illinois River, which we found also frozen; we made it on the 27th of the same month, and, dragging our canoes, baggage and provisions about eighty leagues on the River Seignelay (Illinois), which runs into the River Colbert (Mississippi), we traversed the great Illinois town without finding any one there, the Indians having gone to winter thirty leagues lower down on Lake Pimiteoui (Peoria), where Fort Crèvecoeur stands. We found it in a good state, and La Salle left his orders here. As from this spot navigation is open at all seasons and free from ice, we embarked in our canoes, and on the 6th of February reached the mouth of the River Seignelay, at 38° north. The floating ice on the River Colbert * at this place kept us till the 13th of the same month, when we set out, and six leagues lower down found the Ozage (Missouri) River, coming from the west. It is full as large as the River Colbert, into which it empties, troubling it so that from the mouth of the Ozage the water is hardly drinkable. The Indians assure us that this river is formed by many others, and that they ascend it for ten or twelve days to a mountain where it rises; that beyond this mountain

[* Named at this time. Cf. MARGRY I., 595.]

JOURNEYS OF

is the sea, where they see great ships; that on the river are a great number of large villages, of many different nations; that there are arable and prairie lands and abundance of cattle and beaver. Although this river is very large, the Colbert does not seem augmented by it; but it pours in so much mud that from its mouth the water of the great river, whose bed is also slimy, is more like clear mud than river water, without changing at all till it reaches the sea, a distance of more than three hundred leagues, although it receives seven large rivers, the water of which is very beautiful, and which are almost as large as the Mississippi.

On the 14th, six leagues further, we found on the east the village of the Tamaroas,⁴ who had gone to the chase; we left there marks of our peaceful coming and signs of our route, according to practice in such voyages. We went slowly, because we were obliged to hunt and fish almost daily, not having been able to bring any provisions but Indian corn.

Forty leagues from Tamaroa is the River Oüabache (Ohio), where we stopped. From the mouth of this river you must advance

{ ⁴The Tamaroas, or Maroas, were an Illinois tribe, who long had their village in this quarter.

LA SALLE

forty-two leagues without stopping, because the banks are low and marshy, and full of thick foam, rushes and walnut trees.

On the 24th [or 26th] those whom we sent to hunt all returned but Peter Prudhomme; the rest reported that they had seen an Indian trail, which made us suppose our Frenchman killed or taken. This induced the *Sieur de la Salle* to throw up a fort and intrenchment and to put some French and Indians on the trail. None relaxed their efforts till the first of March, when *Gabriel Minime* and two *Mohegans* took two of five Indians whom they discovered. They said that they belonged to the *Sicacha* (*Chickasaw*) nation and that their village was a day and a half off. After showing them every kindness I set out with the *Sieur de la Salle* and half our party to go there, in hopes of learning some news of *Prudhomme*; but, after having traveled the distance stated, we showed the Indians that we were displeased with their duplicity; then they told us frankly that we were still three days off. (These Indians generally count ten or twelve leagues to a day.) We returned to the camp, and one of the Indians having offered to remain while the other carried the news to the village, *La Salle* gave him some goods and he set out, after

JOURNEYS OF

giving us to understand that we should meet their nation on the bank of the river as we descended.

At last Prudhomme, who had been lost, was found on the ninth day and brought back to the fort, so that we set out the next day, which was foggy. Having sailed forty leagues till the third [or 13th] of March, we heard drums beating and sasocoüest (war-cries) on our right. Perceiving that it was an Akansa village, the Sieur de la Salle immediately passed over to the other side with all his force, and in less than an hour threw up a retrenched redoubt on a point, with palisades, and felled trees, to prevent a surprise and give the Indians time to recover confidence. He then made some of his party advance on the bank of the river and invite the Indians to come to us. The chiefs sent a periagua (these are large wooden canoes, made of a hollow tree, like little bateaux), which came within gunshot. We offered them the calumet of peace, and two Indians, advancing, by signs invited the French to come to them. On this the Sieur de la Salle sent a Frenchman and two Abnakis, who were received and regaled with many tokens of friendship. Six of the principal men brought him back in the same periagua, and came into the re-

LA SALLE

doubt, where the Sieur de la Salle made them presents of tobacco and some goods. On their side they gave us some slaves, and the most important chief invited us to go to the village to refresh ourselves, which we readily did.

All those of the village, except the women, who had at first taken flight, came to the bank of the river to receive us. Here they built us cabins, brought us wood to burn and provisions in abundance. For three days they feasted us constantly. The women now returned, brought us Indian corn, beans, flour and various kinds of fruits; and we, in return, made them other little presents, which they admired greatly.

These Indians do not resemble those at the north, who are all sad and severe in their temper; these are far better made, honest, liberal and gay. Even the young are so modest that, though they had a great desire to see La Salle, they kept quietly at the doors, not daring to come in.

We saw great numbers of domestic fowls, flocks of turkeys, tame bustards, many kinds of fruits, peaches already formed on the trees, although it was only the beginning of March.

On the 14th of the same month the Sieur de la Salle took possession of this country

JOURNEYS OF

with great ceremony. He planted a cross and set up the king's arms, at which the Indians showed a great joy.⁵ You can talk much to Indians by signs, and those with us managed to make themselves a little understood in their language. I took occasion to explain something of the truth of God and the mysteries of our redemption, of which they saw the arms. During this time they showed that they relished what I said by raising their eyes to heaven and kneeling as if to adore. We also saw them rub their hands over their bodies after rubbing them over the cross. In fact, on our return from the sea we found that they had surrounded the cross with a palisade. They finally gave us provisions and men to conduct us and serve as interpreters with the Taensa, their allies, who are eighty leagues distant from their village.

On the 17th we continued our route, and six leagues lower down we found another village of the same Akansa nation, and then another three leagues lower, the people of which were of the same kind and received us most hospitably.⁶ We gave them pres-

⁵ Cf. MARGRY II., 181-185.]

Amid the conflict of names to be found in early narratives, it is a relief to meet so much uniformity relative to the Akansas. It is not, indeed, easy to recognize them in the Quigata, Quipana, Pacaha or Cayas of De Soto's expedi-

ents and tokens of our coming in peace and friendship.

On the 22d [or 20th] we reached the Taensa, who dwell around a little lake formed in the land by the River Mississippi. They have eight villages. The walls of their houses are made of earth mixed with straw; the roof is of canes, which form a dome adorned with paintings; they have wooden beds and much other furniture, and even ornaments in their temples, where they in-

tion. Marquette, in his journal, first gives the name "Akamsea," which has remained to this day on his map. He gives near them the Papi-kaha and Atotchasi. Father Membre here mentions three towns of the tribe, but does not name them. Tonty does, and has on the Mississippi the Kappas, and inland the Toyengan, or Tongenga, the Toriman, and the Osotonoy, or Assotoué. The latter is, indeed, his post, but old deeds show a village lay opposite, which probably gave its name. On the next expedition Father Anastasius writes Kappa, Doginga, Toriman and Osotteoez, which Joutel repeats, changing Doginga to Tongenga, and Osotteoez to Otsotchové. In 1721 Father Charlevoix writes them the Kappas, Toremans, Toppingas and Sothouis, adding another tribe, the Ouyapes, though there were still but four villages. In 1729 Father Poisson places them all on the Arkansas—the Tourimans and Tongingas nine leagues from the mouth by the lower branch, the Sauthouis three leagues further, and the Kappas still higher up.

The only material difference is in the Atotchasi, Otsotchové, Osotteoez, Ossotonoy, Assotoué, or Sothouis, in which, however, there is similarity enough to establish identity. They call themselves Oguapas, and never use the term "Arkansas."—(Nuttall.)

Nwapa

JOURNEYS OF

ter the bones of their chiefs. They are dressed in white blankets made of the bark of a tree, which they spin; their chief is absolute, and disposes of all without consulting anybody. He is attended by slaves, as are all his family. Food is brought him outside his cabin; drink is given him in a particular cup, with much neatness. His wives and children are similarly treated, and the other Taensa address him with respect and ceremony.

The *Sieur de la Salle*, being fatigued and unable to go into the town, sent in the *Sieur de Tonty* and myself with presents. The chief of this nation, not content with sending him provisions and other presents, wished also to see him, and, accordingly, two hours before the time a master of ceremonies came, followed by six men; he made them clear the way he was to pass, prepare a place and cover it with a delicately worked cane-mat. The chief, who came some time after, was dressed in a fine white cloth or blanket. He was preceded by two men carrying fans of white feathers. A third carried a copper plate and a round one of the same metal, both highly polished. He maintained a very grave demeanor during this visit, which was, however, full of confidence and marks of friendship.

LA SALLE

The whole country is covered with palm-trees, laurels of two kinds, plums, peaches, mulberry, apple, and pear trees of every kind. There are also five or six kinds of nut-trees, some of which bear nuts of extraordinary size. They also gave us several kinds of dried fruit to taste; we found them large and good. They have also many other kinds of fruit-trees which I never saw in Europe, but the season was too early to allow us to see the fruit. We observed vines already out of blossom. The mind and character of this people appeared on the whole docile and manageable, and even capable of reason. I made them understand all I wished about our mysteries. They conceived pretty well the necessity of a God, the creator and director of all, but attribute this divinity to the sun. Religion may be greatly advanced among them, as well as among the Akansas, both these nations being half-civilized.

Our guides would go no further, for fear of falling into the hands of their enemies, for the people on one shore are generally enemies of those on the other. There are forty villages on the east and thirty-four on the west, of all of which we were told the names.

The 26th of March resuming our course,

JOURNEYS OF

we perceived, twelve leagues lower down, a periagua or wooden canoe, to which the *Sieur de Tonty* gave chase, till, approaching the shore, we perceived a great number of Indians. The *Sieur de la Salle*, with his usual precaution, turned to the opposite banks, and then sent the calumet of peace by the *Sieur de Tonty*. Some of the chief men crossed the river to come to us as good friends. They were fishermen of the *Nachie* tribe (*Natchez*), enemies of the *Taensa*. Although their village lay three leagues inland, the *Sieur de la Salle* did not hesitate to go there with a part of our force. We slept there, and received as kindly a welcome as we could expect; the *Sieur de la Salle*, whose very air, engaging manners and skillful mind command alike love and respect, so impressed the heart of these Indians that they did not know how to treat us well enough. They would gladly have kept us with them, and even, in sign of their esteem, that night informed the *Koroo*,⁷ their ally, whose chief and head men came the next day to the village, where they paid their obeisance to the king of the French in the person of the *Sieur de la Salle*, who

⁷ Marquette's map mentions this tribe as lying inland, on the western side. He writes it "*Akoroa*." [Iberville later "*Coloa*."]

LA SALLE

was well able to exalt in every quarter the power and glory of his nation.

After having planted the king's arms under the cross and made presents to the Nachié, we returned to the camp the next day with the head men of the town and the Koroa chief, who accompanied us to his village, situated ten leagues below, on a beautiful eminence, surrounded on one side by fine corn fields and on the other by beautiful prairies. This chief presented the Sieur de la Salle with a calumet and feasted him and all his party. We here, as elsewhere, made presents in return. They told us that we had still ten days to sail to the sea.

The Sicacha (Chickasaw), whom we had brought thus far, obtained leave to remain in the village, which we left on Easter Sunday, the 29th of March, after having celebrated the divine mysteries for the French and fulfilled the duties of good Christians. For our Indians, though of the most advanced and best instructed, were not yet capable.

About six leagues below the river divides into two arms or channels, forming a great island, which must be more than sixty leagues long.⁸ We followed the channel on

[⁸ This was a mistake, but the maps of that

JOURNEYS OF

the right, although we had intended to take the other, but passed it in a fog without seeing it. We had a guide with us, who pointed it out by signs; but, his canoe being then behind, those in it neglected when the Indian told them to overtake us, for we were considerably ahead. We were informed that on the other channel there were ten different nations, numerous and well-disposed.

On the second of April, after having sailed forty [or eighty] leagues, we perceived some fishermen on the bank of the river; they took flight, and we immediately after heard sasacöest—that is, war-cries and beating of drums. It was the Quinipissa nation. Four Frenchmen were sent to offer them the calumet of peace, with orders not to fire; but they had to return in hot haste, because the Indians let fly a shower of arrows at them. Four of our Mohegans, who went soon after, met no better welcome. This obliged the Sieur de la Salle to continue his route, till two leagues lower down we entered a village of the Tangiboa,⁹ which had been recently sacked and plundered; we found time represented the Mississippi as two rivers connected by a channel. Cf. *Estab't of the Faith* (Shea, ed.) II., 175, note.]

⁹ Called in act of possession "Maheouala."

LA SALLE

there three cabins full of human bodies dead for fifteen or sixteen days.

At last, after a navigation of about forty leagues, we arrived, on the sixth of April, at a point where the river divides into three channels. The Sieur de la Salle divided his party the next day into three bands to go and explore them. He took the western, the Sieur Dautray the southern, the Sieur Tonty, whom I accompanied, the middle one. These three channels are beautiful and deep. The water is brackish ; after advancing two leagues it became perfectly salt, and, advancing on, we discovered the open sea, so that on the ninth of April, with all possible solemnity, we performed the ceremony of planting the cross and raising the arms of France. After we had chanted the hymn of the church, "Vexilla Regis," and the "Te Deum," the Sieur de la Salle, in the name of his majesty, took possession of that river, of all rivers that enter it and of all the country watered by them. An authentic act was drawn up, signed by all of us there, and, amid a volley from all our muskets, a leaden plate subscribed with the arms of France and the names of those who had just made the discovery was deposited in the earth.¹⁰ The Sieur de la Salle, who

¹⁰ See De la Salle's *procès verbal* of the taking

JOURNEYS OF

always carried an astrolabe, took the latitude of the mouth. Although he kept to himself the exact point, we have learned that the river falls into the Gulf of Mexico, between 27° and 28° north, and, as is thought, at the point where maps lay down the Rio Escondido. This mouth is about thirty leagues distant from the Rio Bravo (Rio Grande), sixty from the Rio de Palmas, and ninety or a hundred leagues from the River Panuco (Tampico), where the nearest Spanish post on the coast is situated. We reckoned that Espiritu Santo Bay (Apalachee Bay) lay northeast of the mouth. From the Illinois River we always went south or southwest; the river winds a little, preserves to the sea its breadth of about a quarter of a league, is everywhere very deep, without banks or any obstacle to navigation, although the contrary has been published.¹¹ This river is reckoned eight hundred leagues long; we traveled at least three hundred and fifty from the mouth of the River Seignelay.

We were out of provisions, and found possession of Louisiana, in the *Hist. Coll. of Louisiana*, Vol. I., p. 45. [Also Vol. I., Chap. VII.]
¹¹ We do not know to what Father Membré refers. Marquette's work makes no such assertion of the Mississippi. Hennepin, indeed, says that an Illinois had so stated before La Salle went down.—*Description de la Louisiane*, p. 177.

LA SALLE

only some dried meat at the mouth, which we took to appease our hunger; but soon after perceiving it to be human flesh, we left the rest to our Indians. It was very good and delicate. At last, on the tenth of April, we began to remount the river, living only on potatoes and crocodiles (alligators). The country is so bordered with canes and so low in this part that we could not hunt, without a long halt. On the twelfth we slept at the village of the Tangibao, and as the Sieur de la Salle wished to have corn, willingly or by force . . . Our Abnakis perceived, on the thirteenth, as we advanced, a great smoke near. We thought that this might be the Quinipissa, who had fired on us some days before; those whom we sent out to reconnoitre brought in four women of the nation on the morning of the fourteenth, and we went and encamped opposite the village. After dinner some periaguas came toward us to brave us, but the Sieur de la Salle having advanced in person with the calumet of peace, on their refusal to receive it a gun was fired, which terrified these savages, who had never seen firearms. They called it thunder, not understanding how a wooden stick could vomit fire and kill people so far off without touching them. This obliged the Indians to take flight, al-

JOURNEYS OF

though in great force, armed in their manner. At last the *Sieur de la Salle* followed them to the other side and put one woman on the shore, with a present of axes, knives and beads, giving her to understand that the other three should follow soon if she brought some Indian corn. The next day a troop of Indians having appeared, the *Sieur de la Salle* went to meet them, and concluded a peace, receiving and giving hostages. He then encamped near their village, and they brought us some little corn. We at last went up to the village, where these Indians had prepared us a feast in their fashion. They had notified their allies and neighbors, so that when we went to enjoy the banquet in a large square we saw a confused mass of armed savages arrive, one after another. We were, however, welcomed by the chiefs; but, having ground for suspicion, each kept his gun ready, and the Indians, seeing it, durst not attack us.

The *Sieur de la Salle* retired with all his people and his hostages into his camp and gave up the *Quinipissa* women. The next morning before daybreak our sentinel reported that he heard a noise among the canes on the banks of the river. The *Sieur Dautray* said that it was nothing, but the *Sieur de la Salle*, always on the alert, hav-

LA SALLE

ing already heard the noise, called to arms. As we instantly heard war cries, and arrows were fired from quite near us, we kept up a brisk fire, although it began to rain. Day broke, and after two hours' fighting, and the loss of ten men killed on their side and many wounded, they took to flight, without any of us having been injured. Our people wished to go and burn the village of these traitors, but the *Sieur de la Salle* prudently wished only to make himself formidable to this nation, without exasperating it, in order to manage them in time of need. We, however, destroyed many of their canoes. They were near, but contented themselves with running away and shouting. Our *Mohegans* took only two scalps.

We set out, then, the evening of the same day, the 18th of April, and arrived on the first of May at the Koroe, after having suffered much from want of provisions. The *Koroe* had been notified by the Quinipissa, their allies, and had, with the intention of avenging them, assembled Indians of several villages, making a very numerous army, which appeared on the shores and often approached us to reconnoitre. As this nation had contracted friendship with us on our voyage down, we were not a little surprised at the change; but they told us the reason,

JOURNEYS OF

which obliged us to keep on our guard. The Sieur de la Salle even advanced intrepidly, so that the Indians durst not undertake anything.

When we passed going down we were pretty well provided with Indian corn, and had put a quantity in *cache* pretty near their village. We found it in good condition, and, having taken it up, continued our route, but were surprised to see the Indian corn at this place, which, the 29th of March, was just sprouting from the ground, already fit to eat, and we then learned that it ripened in fifty days. We also remarked other corn four inches above ground.

We set out, then, the same day, the first of May, in the evening, and after seeing several different nations on the following days and having renewed our alliance with the Taensa, who received us perfectly well, we arrived at the Akansa, where we were similarly received. We left it on the eighteenth; the Sieur de la Salle went on with two canoes of our Mohegans and pushed on to a hundred leagues below the River Seignelay, where he fell sick. We joined him there with the rest of the troop on the second of June. As his malady was dangerous and brought him to extremity, unable to advance any further, he was obliged to send

LA SALLE

forward the Sieur de Tonty for the Illinois and Miamis to take up our *caches* and put everything in order, appointing Tonty to command there. But at last the malady of the Sieur de la Salle, which lasted forty days, during which I assisted him to my utmost, having somewhat abated, we started at the close of July by slow journeys. At the end of September we reached the Miami River, where we learned of several military expeditions made by the Sieur de Tonty after he had left us. He had left the Sieur Dautray and the Sieur Cochois among the Miamis, and other people among the Illinois, with two hundred new cabins of Indians, who were going to repeople that nation. The said Sieur de Tonty pushed on to Missilimakinak to render an account, more at hand, of our discovery to the governor, the Count de Frontenac, on behalf of the Sieur de la Salle, who prepared to retrace his steps to the sea the next spring with a larger force and families to begin establishments.

The River Seignelay is very beautiful, especially below the Illinois (Indians), wide and deep, forming two lakes as far as the sea (*jusqu'à la mer*), edged with hills, covered with beautiful trees of all kinds, whence you discern vast prairies, on which herds of wild cattle pasture in confusion.

JOURNEYS OF

The river often overflows and renders the country around marshy for twenty or thirty leagues from the sea.²² The soil around is good, capable of producing all that can be desired for subsistence. We even found hemp there growing wild, much finer than that of Canada. The whole country on this river is charming in its aspect.

It is the same with what we have visited on the River Colbert. When you are twenty or thirty leagues below the Maroa the banks are full of canes until you reach the sea, except in fifteen or twenty places, where there are very pretty hills and spacious, convenient landing places. The inundation does not extend far, and behind these drowned lands you see the finest country in the world. Our hunters, French and Indians were delighted with it. For an extent of at least two hundred leagues in length and as much in breadth, as we were told, there are vast fields of excellent land, diversified here and there with pleasing hills, lofty woods, groves through which you might ride on horseback, so clear and unobstructed are the paths. These little forests also line the rivers, which intersect the country in various places, and which

²² I cannot see what he means by the term sea in these two places, unless in the former it means the mouth and in the latter the bed of the river.

LA SALLE

abound in fish. The crocodiles are dangerous here, so much so that in some parts no one would venture to expose himself or even put his hand out of his canoe. The Indians told us that these animals often dragged in their people, where they could anywhere get hold of them.

The fields are full of all kinds of game, wild cattle, stags, does, deer, bears, turkeys, partridges, parrots, quails, woodcock, wild pigeons and ring-doves. There are also beavers, otters, martens, till a hundred leagues below the Maroa, especially in the river of the Missouri, the Ouabache, that of the Chepousseau (the Cumberland), which is opposite it, and on all the smaller ones in this part; but we could not learn that there were any beavers on this side toward the sea.

There are no wild beasts formidable to man. That which is called Michybichy never attacks man, although it devours the strongest beasts. Its head is like that of a lynx, though much larger; the body long and large, like a deer's, but much more slender; the legs also shorter, the paws like those of a wildcat, but much larger, with longer and stronger claws, which it uses to kill the beasts it would devour. It eats a little, then carries off the rest on its back

JOURNEYS OF

and hides it under some leaves, where ordinarily no other beast of prey touches it. Its skin and tail resemble those of a lion, to which it is inferior only in size.

buttalo

The cattle of this country surpass ours in size; their head is monstrous and their look frightful, on account of the long, black hair with which it is surrounded, and which hangs below the chin and along the houghs of this animal. It has on the back a kind of upright crests (*coste*), of which that nearest the neck is longest; the others diminish gradually to the middle of the back. The hair is fine and scarce inferior to wool. The Indians wear their skins, which they dress very neatly with earth, which serves also for paint. These animals are easily approached and never fly from you; they could be easily domesticated.

There is another little animal (the opossum), like a rat, though as large as a cat, with silvery hair sprinkled with black. The tail is bare, as thick as a large finger, and about a foot long; with this it suspends itself when it is on the branches of trees. It has under the belly a kind of pouch, where it carries its young when pursued.

The Indians assured us that inland, toward the west, there are animals on which men ride, and which carry very heavy loads;

LA SALLE

they described them as horses, and showed us two feet which were actually hoofs of horses.

We observed everywhere wood of various kinds, fit for every use, and, among others, the most beautiful cedars in the world, and another kind shedding an abundance of gum, as pleasant to burn as the best French pastilles. We also remarked everywhere hemlocks and many other pretty large trees with white bark. The cottonwood trees are large; of these the Indians dig out canoes forty or fifty feet long, and have sometimes fleets of a hundred and fifty below their villages. We saw every kind of tree fit for shipbuilding. There is also plenty of hemp for cordage, and tar might be made remarkably near the sea.

You meet prairies everywhere, sometimes of fifteen or twenty leagues front and three or four deep, ready to receive the plough. The soil is excellent, capable of supporting great colonies. Beans grow wild, and the stalk lasts several years, always bearing fruit; it is thicker than an arm and runs up like ivy to the top of the highest trees. The peach trees are quite like those of France and very good; they are so loaded with fruit that the Indians have to prop up those they cultivate in their clearings. There are

JOURNEYS OF

whole forests of very fine mulberries, of which we ate the fruit from the month of May ; many plum trees and other fruit trees, some known and others unknown in Europe ; vines, pomegranates and horse chestnuts are common. They raise three or four crops of corn a year. I have already stated that I saw some ripe, while more was sprouting. Winter is known only by the rains.

We had not time to look for mines ; we only found coal in several places ; the Indians who had lead and copper wished to lead us to many places whence they take it ; there are quarries of very fine stone, white and black marble, yet the Indians do not use it.

These tribes, though savage, seem generally of very good dispositions, affable, obliging and docile. They have no true idea of religion by a regular worship, but we remarked some confused ideas and a particular veneration they had for the sun, which they recognize as Him who made and preserves all. It is surprising how different their language is from that of tribes not ten leagues off ; they manage, however, to understand each ; and, besides, there is always some interpreter of one nation residing in another, when they are allies, and

LA SALLE

who acts as a kind of consul. They are very different from our Canada Indians in their houses, dress, manners, inclinations and customs, and even in the form of the head, for theirs is very flat. They have large public squares, games, assemblies; they seem lively and active; their chiefs possess all the authority; no one would dare pass between the chiefs and the cane-torch which burns in his cabin, and is carried before him when he goes out; all make a circuit around it with some ceremony. The chiefs have their valets and officers, who follow them and serve them everywhere. They distribute their favors and presents at will. In a word, we generally found them to be men. We saw none who knew firearms, or even iron or steel articles, using stone knives and hatchets. This was quite contrary to what had been told us, when we were assured that they traded with the Spaniards, who were said to be only twenty-five or thirty leagues off; they had axes, guns and all commodities found in Europe. We found, indeed, tribes that had bracelets of real pearls, but they pierce them when hot and thus spoil them. Monsieur de la Salle brought some with him. The Indians told us that their warriors brought them from very far, in the direction of the sea, and receive them

JOURNEYS OF

in exchange from some nations apparently on the Florida side.

There are many other things which our people observed on advancing a little into the country to hunt, or which we learned from the tribes through whom we passed; but I should be tedious were I to detail them, and, besides, the particulars should be better known.

To conclude, our expedition of discovery was accomplished without having lost any of our men, French or Indian, and without anybody's being wounded, for which we were indebted to the protection of the Almighty and the great capacity of Monsieur de la Salle. I will say nothing here of conversions; formerly the apostles had but to enter a country, when on the first publication of the gospel great conversions were seen. I am but a miserable sinner, infinitely destitute of the merits of the apostles; but we must also acknowledge that these miraculous ways of grace are not attached to the exercise of our ministry; God employs an ordinary and common way, following which I contented myself with announcing, as well as I could, the principal truths of Christianity to the nations I met. The Illinois language served me about a hundred leagues down the river, and I made the rest under-

LA SALLE

stand by gestures and some terms in their dialect which I insensibly picked up; but I cannot say that my little efforts produced certain fruits. With regard to these people, perhaps some one, by a secret effect of grace, has profited; God only knows. All we have done has been to see the state of these tribes and to open the way to the gospel and to missionaries, having baptized only two infants whom I saw struggling with death, and who, in fact, died in our presence.

CHAPTER VII.

ACCOUNT OF THE TAKING POSSESSION OF
LOUISIANA BY M. DE LA SALLE,¹ 1682.

“PROCES VERBAL OF THE TAKING POSSESSION
OF LOUISIANA, AT THE MOUTH OF THE
MISSISSIPPI, BY THE SIEUR DE LA SALLE,
ON THE 9TH OF APRIL, 1682.

“JAQUES DE LA METAIRIE, Notary of Fort Frontenac, in New France, commissioned to exercise the said function of Notary during the voyage to Louisiana, in North America, by M. de la Salle, Governor of Fort Frontenac for the King, and comman-

[¹ Reprinted by French, in 1875, in *Hist'l Coll'ns La. and Fla., Second Series*, page 17, ff.]

JOURNEYS OF

dant of the said Discovery by the commission of his Majesty given at St. Germain, on the 12th of May, 1678.

“To all those to whom these presents shall come, greeting;—Know, that having been requested by the said Sieur de la Salle to deliver to him an act, signed by us and by the witnesses therein named, of possession by him taken of the country of Louisiana, near the three mouths of the River Colbert,² in the Gulf of Mexico, on the 9th of April, 1682.

“In the name of the most high, mighty, invincible and victorious Prince, Louis the Great, by the Grace of God, King of France and of Navarre, Fourteenth of that name, and of his heirs, and the successor of his crown, we, the aforesaid Notary, have delivered the said act to the said Sieur de la Salle, the tenor whereof follows:

“On the 27th of December, 1681, M. de la Salle departed on foot to join M. de Tonty, who had preceded him with his followers and all his equipage forty leagues into the Miamis country, where the ice on the River Chekagou, in the country of the Mascoutens [Miamis], had arrested his progress, and where, when the ice became stronger, they used sledges to drag the bag-

² Mississippi.

LA SALLE

gage, the canoes and a wounded Frenchman through the whole length of this river and on the Illinois, a distance of seventy leagues.

"At length, all the French being together, on the 25th of January, 1682, we came to Pimiteoui. From that place, the river being frozen only in some parts, we continued our route down the River Colbert, sixty leagues, or thereabouts, from Pimiteoui, and ninety leagues, or thereabouts, from the village of the Illinois. We reached the banks of the River Colbert on the 6th of January [February], and remained there until the 13th, waiting for the savages, whose progress had been impeded by the ice. On the 13th, all having assembled, we renewed our voyage, being twenty-two French, carrying arms, accompanied by the Reverend Father Zenobe Membré,³ one of the Recollet missionaries, and followed by eighteen New England savages and several women, Ilgonquines, Otchipoises and Huronnes.⁴

"On the 14th we arrived at the village of Maroa, consisting of a hundred cabins, without inhabitants. Proceeding about a hundred leagues down the River Colbert,

[³ The 1875 reprint, page 19, has the word "and."]

[⁴ Spelling of these three names different in 1875 reprint.]

Tam.
100

JOURNEYS OF

we went ashore to hunt on the 26th of February. A Frenchman was lost in the woods, and it was reported to M. de la Salle that a large number of savages had been seen in the vicinity. Thinking that they might have seized the Frenchman, and in order to observe these savages, he marched through the woods during two days, but without finding them, because they had all been frightened by the guns which they had heard and had fled.

"Returning to camp, he sent in every direction French and savages on the search, with orders, if they fell in with savages, to take them alive, without injury, that he might gain from them intelligence of this Frenchman. Gabriel Barbié, with two savages, having met five of the Chikacha [Chickasaw] nation, captured two of them. They were received with all possible kindness, and after he had explained to them that he was anxious about a Frenchman who had been lost, and that he only detained them that he might rescue him from their hands, if he was really among them, and afterwards make with them an advantageous peace (the French doing good to everybody), they assured him that they had not seen the man whom we sought, but that peace would be received with the great-

LA SALLE

est satisfaction. Presents were then given to them, and, as they had signified that one of their villages was not more than half a day's journey distant, M. de la Salle set out the next day to go thither; but after traveling till night, and having remarked that they often contradicted themselves in their discourse, he declined going farther without more provisions. Having pressed them to tell the truth, they confessed that it was yet four days' journey to their villages, and, perceiving that M. de la Salle was angry at having been deceived, they proposed that one of them should remain with him, while the other carried the news to the village, whence the elders would come and join them four days' journey below that place. The said Sieur de la Salle returned to the camp with one of these Chikachas, and the Frenchman whom we sought having been found, he continued his voyage, and passed the river of the Chepontias and the village of the Metsigameas [Mitchigamea]. The fog, which was very thick, prevented his finding the passage which led to the rendezvous proposed by the Chikachas.

"On the 12th of March we arrived at the Kapaha village of Akansa [Arkansas]. Having established a peace there and taken possession, we passed, on the 15th, another

JOURNEYS OF

of their villages, situate on the border of their river, and also two others, farther off in the depth of the forest, and arrived at that of Imaha, the largest village in this nation, where peace was confirmed, and where the chief acknowledged that the village belonged to his Majesty. Two Akan-sas embarked with M. de la Salle to conduct him to the Talusas [Taensas], their allies, about fifty leagues distant, who inhabit eight villages upon the borders of a little lake. On the 19th we passed the villages of Tourika [Tonicas], Jason [Yazoo] and Kouera [Koroas]; but as they did not border on the river, and were hostile to the Arkansas and Taensas, we did not stop there.

“On the 20th we arrived at the Taensas, by whom we were exceedingly well received and supplied with a large quantity of provisions. M. de Tonty passed a night at one of their villages, where there were about seven hundred men, carrying arms, assembled in the place. Here again a peace was concluded. A peace was also made with the Koroas, whose chief came there from the principal village of the Koroas, two [ten] leagues distant from that of the Natches. The two chiefs accompanied M. de la Salle to the banks of the river. Here the Koroa

LA SALLE

chief embarked with him ^s to conduct him to his village, where peace was again concluded with this nation, which, besides the five other villages of which it is composed, is allied to nearly forty others. On the 31st we passed the village of the Oumas without knowing it, on account of the fog and its distance from the river.

"On the 3d of April, at about ten o'clock in the morning, we saw among the canes thirteen or fourteen canoes. M. de la Salle landed with several of his people. Foot-prints were seen, and also savages, a little lower down, who were fishing, and who fled precipitately as soon as they discovered us. Others of our party then went ashore on the borders of a marsh formed by the inundation of the river. M. de la Salle sent two Frenchmen, and then two savages, to reconnoitre, who reported that there was a village [Tennipisas] not far off, but that the whole of this marsh, covered with canes, must be crossed to reach it; that they had been assailed with a shower of arrows by the inhabitants of the town, who had not dared to engage with them in the marsh, but who had then withdrawn, although neither the French nor the savages with

[^s The 1875 reprint adds: ("On Easter Sunday, the 29th of March.")].

JOURNEYS OF

them had fired, on account of the orders they had received not to act [fire] unless in pressing danger. Presently we heard a drum-beat in the village and the cries and howlings with which these barbarians are accustomed to make attacks. We waited three or four hours, and, as we could not encamp in this marsh, and seeing no one and no longer hearing anything, we embarked.

“An hour afterwards we came to the village of Maheouala, lately destroyed, and containing dead bodies and marks of blood. Two leagues below this place we encamped. We continued our voyage till the 6th, when we discovered three channels by which the River Colbert (Mississippi) discharges itself into the sea. We landed on the bank of the most western channel, about three leagues from its mouth. On the 7th M. de la Salle went to reconnoitre the shores of the neighboring sea, and M. de Tonty likewise examined the great middle channel. They found these two [three] outlets beautiful, large and deep. On the 8th we reascended the river, a little above its confluence with the sea, to find a dry place beyond the reach of inundations. The elevation of the North Pole was here about 27° . Here we prepared a column and a cross,

LA SALLE

and to the said column were affixed the arms of France, with this inscription :

‘LOIS LE GRAND, ROI DE FRANCE ET DE NAVARRE, RÈGNE; LE NEUVIÈME AVRIL, 1682.’

The whole party, under arms, chanted the *Te Deum*, the *Exaudiat*, the *Domine salvum fac Regem*; and then, after a salute of fire-arms and cries of *Vive le Roi*, the column was erected by M. de la Salle, who, standing near it, said, with a loud voice, in French: ‘In the name of the most high, mighty, invincible and victorious Prince, Louis the Great, by the Grace of God King of France and of Navarre, Fourteenth of that name, this ninth day of April, one thousand six hundred and eighty-two, I, in virtue of the commission of his Majesty which I hold in my hand, and which may be seen by all whom it may concern, have taken, and do now take, in the name of his Majesty and of his successors to the crown, possession of this country of Louisiana, the seas, harbors, ports, bays, adjacent straits, and all the nations, people, provinces, cities, towns, villages, mines, minerals, fisheries, streams and rivers comprised in the extent of said Louisiana, from the mouth of the great River St. Louis, on the eastern side,

JOURNEYS OF

otherwise called Ohio; Alighin [Alleghany], Sipore, or Chukagona [Chicago], and this with the consent of the Chaouanons [Shawnees], Chikachas and other people dwelling therein, with whom we have made alliance as also along the River Colbert, or Mississippi, and rivers which discharge themselves therein, from its source beyond the country of the Kiouss [Sioux], or Nadoouessious, and this with their consent, and with the consent of the Motantees, Illinois, Mesigameas, Natches, Koroas, which are the most considerable nations dwelling therein, with whom, also, we have made alliance, either by ourselves or by others in our behalf;* as far as its mouth at the sea, or Gulf of Mexico, about the 27th degree of the elevation of the North Pole, and also to the mouth of the River of Palms; upon the assurance which we have received from all these nations that we are the first Europeans who have descended or ascended the said River Colbert; hereby protesting against all those who may in future under-

* "There is an obscurity in this enumeration of places and Indian nations which may be ascribed to an ignorance of the geography of the country; but it seems to be the design of the Sieur de la Salle to take possession of the whole territory watered by the Mississippi from its mouth to its source, and by the streams flowing into it on both sides."—*Note by Mr. Sparks.*

LA SALLE

take to invade any or all of these countries, people or lands above described, to the prejudice of the right of his Majesty, acquired by the consent of the nations herein named. Of which, and of all that can be needed, I hereby take to witness those who hear me, and demand an act of the Notary, as required by law.'

"To which the whole assembly responded with shouts of *Vive le Roi* and with salutes of firearms. Moreover, the said Sieur de la Salle caused to be buried at the foot of the tree, to which the cross was attached, a leaden plate, on one side of which were engraved the arms of France and the following Latin inscription :

LVDOVICVS MAGNUS REGNAT.

NONO APRILIS CIG IGC LXXXII.

ROBERTVS CAVELIER, CVM DOMINO DE TONTY,
LEGATO, R. P. ZENOBIO MEMBRÈ, RECOLLECTO,
ET VIGINTI GALLIS, PRIMVS HOC FLVMEN,
INDE AB ILINEORVM PAGO, ENAVIGAVIT,
EJVSQUE OSTIVM FECIT PERVIVM, NONO
APRILIS ANNI CIG IGC LXXXII.

After which the Sieur de la Salle said that his Majesty, as eldest son of the Church, would annex no country to his crown without making it his chief care to establish the

JOURNEYS OF

Christian religion therein, and that its symbol must now be planted; which was accordingly done at once by erecting a cross, before which the *Vexilla* and the *Domine saluum fac Regem* were sung. Whereupon the ceremony was concluded with cries of *Vive le Roi*.

"Of all and every of the above, the said Sieur de la Salle having required of us an instrument, we have delivered to him the same, signed by us, and by the undersigned witnesses, this ninth day of April, one thousand six hundred and eighty-two.

CHAPTER VIII.

[MEMOIRS PRESENTED BY LA SALLE TO THE
MARQUIS DE SEIGNELAY IN 1684.]

A MEMOIR ¹ OF ROBERT CAVELIER DE LA SALLE
ON THE NECESSITY OF FITTING OUT AN
EXPEDITION TO TAKE POSSESSION OF
LOUISIANA.

THE principal result which the Sieur de la Salle expected from the great perils and labors which he underwent in the discovery of the Mississippi was to satisfy the wish expressed to him by the late Monseigneur Colbert of finding a port where the French might establish themselves and harass the Spaniards in those regions from whence they derive all their wealth. The place which he proposes to fortify lies sixty leagues above the mouth of the River Colbert (Mississippi), in the Gulf of Mexico, and possesses all the advantages for such a purpose which can be wished for, both upon account of its excellent position and the favorable disposition of the savages who live in that part of the country.

[¹ This memoir and the one following it were composed during the early part of 1684.]

JOURNEYS OF

The right of the King to this territory is the common right of all nations to lands which they have discovered—a right which cannot be disputed after the possession already taken in the name of his Majesty by the Sieur de la Salle, with the consent of the greater number of its inhabitants. A colony can easily be founded there, as the land is very fertile and produces all articles of life—as the climate is very mild—as a port or two would make us masters of the whole of this continent—as the posts there are good, secure and afford the means of attacking an enemy or retreating in case of necessity—and also since all things are found there requisite for refitting. Its distance inland will prevent foreigners from sending fleets to attack it, since they would be exposed to destruction by fire, which they could only avoid with difficulty in a narrow river, for if fire-ships were sent down they would not fail to fall aboard them under the favor of night and of the current. The coast and the banks, being overflowed for more than twenty leagues above the mouth, make it inaccessible by land; and the friendship of the savages towards the French and the hatred which they bear towards the Spaniards will serve also as a strong barrier.

LA SALLE

These Indians, irritated by the tyranny of the Spaniards, carry on a cruel war against them, without even the aid of firearms, which they have not yet had. On the other hand, they have been so conciliated by the gentleness of the *Sieur la Salle* that they have made peace with him and offered to accompany him anywhere, and he has no doubt that they would favor his enterprise as much as they would oppose themselves to those of the enemies of France. This any person may judge of by the offerings which were made at the posts on which the arms of France were attached, and by the assembly of more than eighteen thousand Indians of various nations, some of whom had come from a distance of more than two thousand leagues, who met together in a single camp (*village*)—and who, forgetting their own old disputes, threw themselves into his arms and made him master of their different interests—and also from the deputations sent to him by the Cicacas and the Kansas, and other nations, offering to follow wherever he might be pleased to lead them. By the union of these forces it would be possible to form an army of more than fifteen thousand savages, who, finding themselves supported by the French and by the Abenaki followers of the *Sieur de la Salle*,

JOURNEYS. OF

with the aid of the arms which he has given them, would not find any resistance in the province which he intends to attack, where there are not more than four hundred native Spaniards, in a country more than one hundred and fifty leagues in length and fifty in breadth, all of whom are officers or artisans, better able to explore the mines than to oppose themselves vigorously to an expedition which would, moreover, be favored by Mulattoes, Indians and by Negroes if their liberty were promised to them.

Upon account of these considerations the Sieur de la Salle proposes, with the approbation of Monseigneur, to undertake this enterprise, and, if peace should prevent the execution of it, he offers to establish a very advantageous station for commercial purposes, very easy to be maintained, and from whence, at the commencement of hostilities, it would be possible to take from the Spaniards a good part of their mines.

New Biscay is the most northern province of Mexico, and is situated between 25° and $27^{\circ} 30'$ of north latitude. It is bounded to the north by vast forests frequented by the people called Terliquimeki, whom the Spanish only know by the name of "*Indios Bravos y de guerra*," never having been able to subdue them or to compel them to

LA SALLE

live in peace. From this province they extend themselves as far as the River Seignelai, which is distant from it in some parts forty and in some fifty leagues. On the east it is bounded by the same forest, by the River Panuco, from which it is separated by a chain of mountains, which also form its limits to the south, from the province of Zacatecas to the west, from that of Culiacan to the northwest, where it separates the latter province from the new kingdom of Leon, not having more than two or three passages by which succors could be expected.

The distance from Mexico, which is more than one hundred and fifty leagues, increases these difficulties, without speaking of the necessity which the viceroys would have of dividing their forces in order to defend the maritime districts, and the small number of native Spaniards to be met with in this vast extent of country, from whence no succors are to be obtained but with great loss of time and trouble—the height, also, of the mountains which they must pass for this purpose are too rough for a people enervated by long inactivity, to be able to surmount without great means of conveyance and train. Even if succors could arrive more quickly than is presumed, the proximity of the woods and of the river would

JOURNEYS OF

aid as much to secure a retreat and preserve any booty, as it is favorable to an irruption of which the enemy would have no information before we should be in the middle of his territory.

As they do not think themselves to be in danger of being attacked, except by savages, they have no one place capable of sustaining an attack, though the country is very rich in silver mines, more than thirty having been already discovered. These would be much more profitable to the French on account of the proximity of the river, which would serve for the transport of the metals; whereas the Spaniards, from ignorance, from fear of savages, and on account of the personal interest of the viceroys, transport the silver at a great expense, as needless to us as it is to them inevitable, at so great a distance.

Assuming, then, these facts, the Sieur de la Salle offers, if the war continues, to leave France with two hundred men; fifty more will join him who are in the country, and fifty buccaneers (*filibustiers*) can be taken in passing St. Domingo. The savages who are at Fort St. Louis, to the number of more than four thousand warriors, together with many others who will join, can be directed to descend the river. This army he will di-

LA SALLE

vide into three divisions, to maintain it more easily. In order to compel the Spaniards to divide their forces, two of these divisions shall each be composed of fifty French, fifty Abenakis and two hundred savages. They will receive orders to attack at the same time the two extremities of the province, and on the same day the center of the country will be entered with the other division, and it is certain that we shall be seconded by all the unhappy in the country who groan in slavery. The English colony of Boston, although it is more powerful than all those of Spain, has been desolated by six hundred savages. Chili has been ruined by the Araucanians, and the evil which the Iroquois, although without discipline or generalship, have done in Canada, are instances from which we may infer how disastrous is this mode of warfare to those who are not experienced in it, and also what may be expected from the aid of savages led by experienced Frenchmen having much knowledge of the country.

This province being taken, its approaches may be protected by Indians and Mulattoes, who may be required to occupy the narrowest passes of the mountains, by which alone it can be entered, and firearms may be given to them to defend it with greater efficiency.

JOURNEYS OF

This undertaking is certain of success if it is executed in this manner, since the Spaniards cannot be prepared to defend passes of which they have no knowledge; whereas, if attacked by the River Panuco, or by sea, in open warfare, before the maritime places are conquered, or the River Panuco is ascended, which is populated from its mouth by their settlements, they would have leisure to occupy passes with which they are well acquainted and to make the result doubtful, or at least more difficult.

It is true that, in order to make a diversion, the buccaneers (*filibustiers*) might be of service if they were previously to make an attack and made descents on the coast, for then they would attract the Spanish troops to that side, who would thus leave the distant provinces without assistance. The French of St. Domingo would be more suited for these expeditions than for those which can be made with the assistance of savages, who would not fail to be offended from neglect of the civility which is necessary in order to obtain their good will, and from neglect of the reserve which ought to be maintained towards their wives, of whom they are very jealous—which causes of offense would render useless the greatest

LA SALLE

chances of success which the French might possess in this enterprise.

It is certain that France would draw from these mines greater benefits than Spain, from the facility of transport, although Spain obtains more than six millions (of *ecus*?) a year. We might also, perhaps, open a passage to the South Sea, which is not more distant than the breadth of the province of Culiacan, not to mention the possibility of meeting with some rivers near to the Seignelai, which may discharge themselves on that side.

The Sieur de la Salle would not think this affair so easy if, in addition to his knowledge of their language, he was not familiar with the manners of the savages, through which he may obtain as much confidence by a behavior in accordance with their practices, as he has impressed on them a feeling of respect in consequence of all that he has yet done in passing with a small number of followers through so many nations and punishing those who broke their word with him. After this he has no doubt that in a short time they will become good French subjects, so that, without drawing any considerable number of men from Europe, they will form a powerful colony, and will have sufficient troops to act in any

JOURNEYS OF

emergency and for the execution of the greatest enterprises. The missionaries of Paraguay and the English of Boston have succeeded so well that equal success may be expected by the adoption of measures similar to theirs.

Even if the peace of Europe should make it necessary to postpone the execution of this design as respects the conquest proposed, it would always be important to place ourselves in a position to succeed in them when the state of affairs shall change, taking immediate possession of this country in order not to be anticipated by other nations, who will not fail to take advantage of the information which they certainly have, since the Dutch published a statement of the discovery of this country in one of their newspapers more than a year ago.

If, also, the Spaniards should delay satisfying the King at the conclusion of a peace an expedition at this point will oblige them to hasten its conclusion, and to give to his Majesty important places in Europe in exchange for those which they may lose in a country of the possession of which they are extremely jealous. In order, also, to hasten them, some of their maritime places may be insulted *en passant*, the pillage of which

LA SALLE

may well repay the expenses of the expedition.

There never was an enterprise of such great importance proposed at so little risk and expense, since the *Sieur de la Salle* asks only for its execution a vessel of about thirty guns, the power of raising in France two hundred men whom he shall think proper for his purpose, and exclusive of the fitting out of the ship; provisions for six months, some cannon to mount at a fort, the necessary arms and supplies, and wherewith to pay the men for the period of a year. These expenses would be repaid in a short time by the duties which his Majesty might have levied on the articles which would enter into the commerce that would be carried on there, and respecting which a separate memoir has been delivered.

It would not require much time to bring this expedition to an end, since it is nearly certain that the savages can be assembled next winter and complete this conquest in the spring, in sufficient time to report the news of it by the time the first vessel returns to France.

The *Sieur de la Salle* does not ask for regular troops. He prefers the assistance of persons of different trades, or at least a majority of such first, because they will be-

JOURNEYS OF

come soldiers when it may be necessary for them to be so ; secondly, because, in enterprises of this kind success depends more on the experience of the commander than on the bravery of those who have only to obey, as was shown in what was done by those who previously accompanied the Sieur de la Salle, the greater part of whom had not seen service ; thirdly, this warfare is so different from that carried on in Europe that the oldest soldiers would be found to be still novices, so that fifty old soldiers to keep the others in order, together with fifty buccaneers, and those whom the Sieur de la Salle has in the country accustomed to such expeditions, will be sufficient to sustain the rest and to render them capable of any enterprise whatever ; fourthly, if only soldiers were taken it would require double expense to bring to the settlement the necessary laborers ; fifthly, the officers who would command the troops, finding a life of greater hardship than they had imagined, and unmixed with any pleasure, would soon be dissatisfied, and this feeling would easily communicate itself to the soldiers when they should discover that there was no relaxation of their fatigues in debauch and license ; sixthly, it would be the ruin of the settlement to commence it with idlers, such as

LA SALLE

most soldiers are. Far from contributing to the prosperity of a colony, they destroy its most favorable hopes by the disorders which they cause.

It may be objected that the River Seignelai (Illinois) is, perhaps, more distant from New Biscay than has been assumed. To answer this difficulty it is sufficient to mention that the mouth through which it enters the Mississippi is one hundred leagues west-northwest from the place where the latter river discharges itself into the Gulf of Mexico, and that it has been ascended more than sixty leagues, going always to the west, after which Monseigneur can judge of the truth of what has been put forth respecting the distance between this river and the province.

The second difficulty which may be raised may be that, peace being concluded, no advantage can be taken of that post. The answer is that peace is the most proper time to prepare for war when it shall become necessary. Even if peace should prevent us from deriving all the advantages which we may expect from this expense, we should be well remunerated if we choose to profit by the future, because we should have more leisure to conciliate and discipline the savages and to strengthen the colony, from

JOURNEYS OF

which circumstances we could obtain more important advantages and execute more glorious and profitable undertakings (*choses*). It may be feared that we may, at a future time, make an unavailing search for that which we might now abandon to strangers. The injury which the colonies of Hudson Bay and of New England, which were formerly disregarded, do to New France ought to serve as a warning on this subject.

The third objection respecting the insults which the Spaniards might inflict on the settlement has already been answered in describing the position, which makes it inaccessible by land and almost equally safe from an attack by water, in consequence of the danger a hostile fleet would incur if it should attempt to advance so far up a very narrow river.

Fourthly, those who do not know the policy of the savages, and the knowledge which they have of their true interests, will, perhaps, think it to be dangerous to arm them. But, besides the experience which we have of the contrary, not one of the French allies having yet abused the favor (*condescendance*) shown to them for these eighty years, it is certain that those nations which we call savage know too well the importance to them of having arms for their own defense

and for the conquest of their enemies to make use of them against those who supply them.

Fifthly, it may be said that should so small a force succeed in driving the Spaniards from this province, it would not be adequate to resist all the forces of Mexico, which they would unite to revenge this affront. The answer to this is that these forces are not so considerable as is supposed—that they cannot leave unprotected other places—that it will require much time to assemble them, the diversion which the buccaneers may cause compelling them to provide for the most urgent want—and that, finally, the Indians, Mulattoes and Negroes, armed and freed by this first success from the terror which they have of the Spaniards, would be able to dispute the advance of the largest army which could be raised in Mexico. Besides which, they would stake all, in order not to be again reduced to a state of slavery.

Sixthly, it is not believed that the expense will be an objection, since it is too inconsiderable in proportion to the great advantages to be hoped for, even if peace should delay their enjoyment. These advantages are of such importance as to make it profitable to incur it for some years rather than

JOURNEYS OF

to hazard their loss. The enterprise ought not to be delayed to a period when we should no longer have the mastery of it. It is also to be believed that the Spaniards, feeling themselves pushed so closely on that side, would assent to conditions of peace most advantageous to France, and, as has been already stated, the duties which his Majesty could levy on the merchandise which would be obtained from thence would repay with usury the expenses incurred.

Seventhly, the Sieur de la Salle would oblige himself, in case the peace should continue for three years, and thus prevent him from executing the proposed design, to repay to his Majesty all that may be advanced, or to forfeit the property and government which he shall have created—which he hopes his Majesty will be willing to confirm to him.

NOTE OF WHAT IS REQUISITE FOR THE EXPEDITION.

A vessel of thirty guns, armed and provided with everything necessary, and the crew paid and supported during the voyage; twelve other pieces of cannon for the two forts, of five or six pounds to the ball, and eight cannon of ten or twelve, with the gun

LA SALLE

carriages and train ; two hundred balls for each cannon, and powder in proportion.

A hundred picked men, levied at the expense of his Majesty, but selected by the Sieur de la Salle. Their pay for one year to be one hundred and twenty (?) a man, and, as the money would be of no avail to them in the colony, it shall be converted at the place of embarkation into goods (*denrées*) proper for them.

The pay, during six months, of one hundred (?) for the other men, enlisted by the Sieur de la Salle, to be paid by his Majesty during the time they shall be employed in the proposed conquests.

Victuals for all during six months ; six hundred muskets for arming four hundred savages, in addition to one thousand six hundred who are already armed, and the others for the two hundred Frenchmen.

A hundred pair of pistols proper to be worn in the girdle ; one hundred and fifty swords, and as many sabres, twenty-five pikes (*pertuisanes*), twenty-five halberds, twenty thousand pounds of gunpowder, four to five (?) of which to be given to each savage and the remainder left in the forts and for the use of the French during the expedition.

Musquet balls of the proper calibre in

JOURNEYS OF

proportion; gun-worms, powder-horns, rifle-flints, three hundred to four hundred grenades, six petards of the smallest and largest kind, pincers, pickaxes, hoes, hones, shovels, axes, hatchets and cramp-irons for the fortifications and buildings; five thousand to six thousand pounds of iron and four hundred pounds of steel of all sorts. A forge, with its appurtenances, besides the tools necessary for armorers, joiners, cooperers, wheelwrights, carpenters and masons.

Two boxes of surgery provided with medicine and instruments.

Two chapels and the ornaments for the almoners.

A barge of forty tons in pieces (*en fagots*), or built with its appurtenances.

Refreshments for the sick.

MEMOIR² OF THE SIEUR DE LA SALLE REPORT- ING TO MONSEIGNEUR DE SEIGNELAY THE DISCOVERIES MADE BY HIM UNDER THE ORDER OF HIS MAJESTY.

MONSEIGNEUR COLBERT was of opinion, with regard to the various propositions which were made in 1678, that it was important for the glory and service of the King

[¹ This is reprinted with minor textual variations in FRENCH, *Hist'l Coll'ns of La. and Fla.* Second Series (1875), page 1, ff.]

to discover a port for his vessels in the Gulf of Mexico.

The Sieur de la Salle offered to undertake the discovery, at his own expense, if it should please his Majesty to grant to him the seignory of the government of the forts which he should erect on his route, together with certain privileges as [and] an indemnification for the great outlay which the expedition would impose on him. Such grant was made to him by letters patent on the 12th of May, 1678.

In order to execute this commission he abandoned all his own pursuits which did not relate to it. He did not omit anything necessary for success, notwithstanding dangerous sickness, considerable losses and other misfortunes which he suffered, which would have discouraged any other person not possessed of the same zeal with himself and the same industry in the performance of the undertaking. He has made five voyages under extraordinary hardships, extending over more than five thousand leagues, most commonly on foot, through snow and water, almost without rest, during five years. He has traversed more than six hundred leagues of unknown country, among many barbarous and cannibal nations (anthropophages), against whom he was

JOURNEYS OF

obliged to fight almost daily, although he was accompanied by only thirty-six men, having no other consolation before him than a hope of bringing to an end an enterprise which he believed would be agreeable to his Majesty.

After having happily executed this design, he hopes Monseigneur will be pleased to continue him in the title (*propriété*) and government of the fort which he has had erected in the country of his discovery, where he has placed several French settlers—and has brought together many savage nations, amounting to more than eighteen thousand in number, who have built houses there and sown much ground—to commence a powerful colony.

This is the only fruit of an expenditure of one hundred and fifty thousand *écus*—the only means of satisfying his creditors who advanced to him the aid which he required after very considerable losses.

He believes that he has sufficiently established the truth of his discovery by the official instrument signed by all his companions, which was placed last year in the hands of Monseigneur Colbert by the Count de Frontenac, as also by a report drawn up by the Reverend Father Zenoble [Zenobe Membré], missionary, who accompanied

LA' SALLE

him during this voyage, and who is at this time Guardian of Bapaume; by the testimony of three persons who accompanied him, and whom he has brought with him to France, and who are now in Paris, and by the testimony of many other persons who came this year from Canada, and who have seen one Vital, sent by M. de la Barre to collect information respecting him on the spot, and who has confirmed the truth of the discovery.

All these proofs are sufficient to contradict whatever may have been written to the contrary by persons who have no knowledge of the country where the discovery was made, never having been there. But he hopes to remove all these prejudices by carrying into execution the design which he entertains, under the favor of Monseigneur, of returning to the country of his discovery by the mouth of the river in the Gulf of Mexico, since he must have lost his sense if, without being certain of the means of arriving where he proposes, he exposed not only his own fortune and that of his friends to manifest destruction, but his own honor and reputation to the unavoidable disgrace of having imposed on the confidence of his Majesty and of his ministers. Of this there is less likelihood, because he has no interest

JOURNEYS OF

to disguise the truth, since, if Monseigneur does not think it convenient to undertake any enterprise in that direction, he will not ask anything more from his Majesty until his return from the Gulf of Mexico confirms the truth of what he has alleged. With reference to the assertion that his voyage would produce no profit to France, he replies that if he proposed it as a thing to be done, and on that account sought for assistance to undertake the enterprise, or reward after having succeeded in it, its usefulness would deserve consideration; but, being here only in order to render an account of the orders he received, he does not think himself to be responsible for anything but their execution, it not being his duty to examine the intentions of Monseigneur Colbert. Having, however, observed great advantages which both France and Canada may derive from his discovery, he believes that he owes this detail to the glory of the King, the welfare of the kingdom, to the honor of the ministry of Monseigneur, and to the memory of him who employed him upon this expedition. He does this the more willingly as his requests will not expose him to a suspicion of self-interest; and as the influence which he has acquired over the people of that continent places him in a

LA SALLE

position to execute what he proposes, the things which he states will find greater credit in the minds of those who shall investigate them.

Firstly, the service of God may be established there by the preaching of the gospel to numerous docile and settled (*sedentaires*) nations, who will be found more willing to receive it than those of other parts of America upon account of their greater civilization. They have already temples and a form of worship.

Secondly, we can effect there for the glory of our King very important conquests, both by land and by sea ; or, if peace should oblige us to delay the execution of them, we might, without giving any cause of complaint, make preparations to render us certain of success whenever it shall please the King to command it.

The provinces which may be seized are very rich in silver mines—they adjoin the River Colbert (the Mississippi)—they are far removed from succor—they are open everywhere on the side on which we should attack them, and are defended only by a small number of persons, so sunk in effeminacy and indolence as to be incapable of enduring the fatigue of wars of this description.

JOURNEYS OF

The Sieur de la Salle binds himself to have this enterprise ripe for success within one year after his arrival on the spot, and asks only for this purpose one vessel, some arms and munitions, the transport, maintenance and pay of two hundred men during one year. Afterwards he will maintain them from the produce of the country, and supply their other wants through the credit and confidence which he has obtained among those nations and the experience which he has had of those regions. He will give a more detailed account of this proposal when it shall please Monseigneur to direct him.

Thirdly, the river is navigable for more than a hundred leagues for ships, and for barks for more than five hundred leagues to the north, and for more than eight hundred from east to west. Its three mouths are as many harbors, capable of receiving every description of ships; where those of his Majesty will always find a secure retreat and all that may be necessary to refit and re-victual—which would be a great economy to his Majesty, who would no longer find it necessary to send the things needed from France at a great expense, the country producing the greater part of them. We could even build there as many ships as we should desire, the materials for building and rig-

LA SALLE

ging them being in abundance, with the exception of iron, which may, perhaps, be discovered.

In the first place, we should obtain there everything which has enriched New England and Virginia, and which constitute the foundation of their commerce and of their great wealth—timber of every kind, salted meat, tallow, corn, sugar, tobacco, honey, wax, resin and other gums, immense pasturages, hemp and other articles with which more than two hundred vessels are every year freighted in New England to carry elsewhere.

The newly discovered country has, besides its other advantages, that of the soil, which, being only partly covered with wood,^a forms a campaign of great fertility and extent, scarcely requiring any clearing. The mildness of the climate is favorable to the rearing of a large number of cattle, which cause great expense where the winter is severe. There is also a prodigious number (*plus un nombre prodigieux*) of buffaloes, stags, hinds, roes, bears, otters, lynxes. Hides and furs [in the greatest abundance] are to be had there almost for nothing (*à vil prix*), the savages not yet knowing the

[^a The reprint by French (page 9) reads, "which being well timbered."]

JOURNEYS OF

value of our commodities. There are cotton, cochineal, nuts, turnsols, entire forests of mulberry trees, salt, slate, coal, vines, apple trees ; so that it would be easy to make wine, cider, oil of nuts, of turnsols, and of olives, also, if olive trees were planted there ; silk and dye-woods. It will not be necessary to import from Europe horses, oxen, swine, fowls or turkeys, which are to be found in different parts [every part] of the country, nor to import provisions for the colonists, who would quickly find subsistence.

Whilst other colonies are open and exposed to the descents of foreigners by as many points as their coasts are washed by the sea, whereby they are placed under a necessity of having many persons to watch these points of access, one single post, established towards the lower part of the river, will be sufficient to protect a territory extending from more than eight hundred leagues from north to south, and still farther from east to west, because its banks are only accessible from the sea through the mouth of the river, the remainder of the coast being impenetrable inland for more than twenty leagues, in consequence of woods, bogs, reeds and marshes (*terres tremblantes*), through which it is impossible

LA SALLE

to march; and this may be the reason why the exploration of that river has been neglected by the Spaniards, if they have had any knowledge of it. The country is equally well defended in the interior against the irruptions of neighboring Europeans by great chains of mountains stretching from east to west, from which branches of the river take their source.

It is true that the country is more open towards the southwest, where it borders on Mexico, where the very navigable river, the Seignelay,⁴ which is one of the branches of the Colbert (the Mississippi), is only separated by a forest of three to four days' journey in depth. But, besides that the Spaniards there are feeble and far removed from the assistance of Mexico, and from that which they could expect by sea, this place [country] is [likewise] protected from their insults by a great number of warlike savages, who close this passage to them, and who, constantly engaged with them in cruel wars, would certainly inflict greater evil when sustained by some French, whose more mild and more humane mode of governing will prove a great means for the preservation of the peace

⁴ The reprint by French, page —, reads, "the Sablonniere" ("Red River of Louisiana").

JOURNEYS OF

made between them and the Sieur de la Salle.

To maintain this establishment, which is the only one required in order to obtain all the advantages mentioned, two hundred men only are needed, who would also construct the fortifications and buildings and effect the clearings necessary for the sustenance of the colony, after which there would be no further expenditure. The goodness of the country will induce the settlers (*habitants*) to remain there willingly. The ease in which they will live will make them attend to the cultivation of the soil and to the production of articles of commerce, and will remove all desire to imitate the inhabitants of New France, who are obliged to seek subsistence in the woods, under great fatigues, in hunting for peltries, which are their principal resource. These vagrant courses, common in New France, will be easily prevented in the new country, because, as its rivers are all navigable, there will be a great facility for the savages to come to our settlement and for us to go to them in boats which can ascend all the branches of the river.

If foreigners anticipate us, they will deprive France of all the advantages to be expected from the success of the enterprise.

LA SALLE

They will complete the ruin of New France, which they already hem in through Virginia, Pennsylvania, New England and the Hudson's Bay. They will not fail to ascend the river as high as possible and to establish colonies in the places nearest to the savages who now bring their furs to Montreal; they will make constant inroads into the countries of the latter, which could not be repressed by ordinances of his Majesty. They have already made several attempts to discover this passage, and they will not neglect it now that the whole world knows that it is discovered, since the Dutch have published it in their newspapers upwards of a year ago. Nothing more is required than to maintain the possession taken by the Sieur de la Salle, in order to deprive them of such a desire and to place ourselves in a position to undertake enterprises against them glorious to the arms of his Majesty, who will probably derive the greatest benefits from the duties he will levy there, as in our other colonies.

Even if this affair should prove hurtful to New France, it will contribute to its security and render our commerce in furs more considerable.

There will be nothing to fear from the Iroquois when the nations of the south,

JOURNEYS OF

strengthened through their intercourse with the French, shall stop their conquests and prevent their being powerful by carrying off a great number of their women and children, which they can easily do from the inferiority of the weapons of their enemies. As respects commerce, that post will probably increase our traffic still more than has been done by the establishment of Fort Frontenac, which was built with success for that purpose, for if the Illinois and their allies were to catch the beavers, which the Iroquois now kill in their neighborhood in order to carry to the English, the latter, not being any longer able to get them from their own colonies, would be obliged to buy them from us, to the great benefit of those who have the privilege of this traffic.

These were the views which the Sieur de la Salle had in placing the settlement where it is. The colony has already felt its effects, as all our allies, who had fled after the departure of M. de Frontenac, have returned to their ancient dwellings, in consequence of the confidence caused by the fort, near which they have defeated a party of Iroquois, and have built four other forts to protect themselves from hostile incursions. The Governor, M. de la Barre, and the Intendant, M. de Meulles, have told the Sieur

LA SALLE

de la Salle that they would write to Monseigneur to inform him of the importance of that fort in order to keep the Iroquois in check, and that M. de Lagny had proposed its establishment in 1678. Monseigneur Colbert permitted Sieur de la Salle to build it and granted it to him as a property.^{5*} In order to prove to Monseigneur the sincerity of his intentions still more, and that he had no other motive in selecting this site than the protection of the men he has left there, and whom he did not think right to place in such small number within the reach of the Spaniards, and without cannon and munition, or to leave in so distant a country, where, in case of sickness, they could expect no assistance, nor to return home from thence without danger, he offers again to descend the river a hundred leagues lower down, and nearer the sea, and to establish there another fort, demolishing the first, in the expectation, however, that Monseigneur would consider the expenses incurred in its establishment.

It may be said, firstly, that this colony might injure the commerce of Quebec and cause the desertion of its inhabitants, but the answer is that by descending lower no beavers will be found. Thus the first diffi-

* The fort of St. Louis on the Illinois.

JOURNEYS OF

culty will be removed, which again would not have any foundation, even if Fort St. Louis were to remain. The Illinois will only kill the beaver, which, after their departure, would fall to the share of the Iroquois only, as no other nation dares to approach these districts. There is also no likelihood that deserters would choose a long and difficult route, at the end of which they would be still subject to be apprehended and punished, whilst they have another much shorter and easier one to New England, where they are quite secure, and which many take every year.

A second objection would be that the goodness of the country would attract so many people as to diminish the population of France, as it is said Mexico and Peru have depopulated Spain; but, besides that France is more peopled than Spain has ever been, and that the expulsion of one million eight hundred thousand Moors, added to the great wars she has had to sustain, is the real cause of its diminished population, it is certain that the number of the few Spaniards in those kingdoms, who are not above forty thousand, is not a number of emigrants sufficient to make any perceptible change in France, which already counts more than one hundred thousand settlers in

LA SALLE

foreign countries. It would be even desirable that, instead of peopling other foreign kingdoms, the riches of the country newly discovered should attract them to it. Moreover, this objection has already been answered, when it was said that the country can be defended by one or two forts, for the protection of which only from four hundred to five hundred men are required, a number comprising only one-half of the crew of a large vessel.**

Whatever has been imagined respecting the mud and breakers which are supposed to stop the mouth of the River (Mississippi) [Mechas-Cebi] is easily disproved by the experience of those who have been there [the Spaniards], and who found the entrances fine, deep and capable of admitting the largest vessels. It would appear that the land or *levées de terre* are covered in many parts with good [trees] growing along the channel of the river very far into the sea; and where the sea is deep they would not be suspected, because even the [outlets or] creeks of the sea are tolerably deep at that distance, and, besides, there is every appearance that the current of the river has formed these kind of dikes by

[* The matter included between the asterisks is omitted in the reprint by French of 1875.]

JOURNEYS OF

shoving on both sides the mud with which the winds fill the neighboring creeks, because those causeways are to be right and left of the river, forming for it a bed, as it were, by their separation. Nor can it be believed that these *levées*⁷ will ever change their position, since they consist of a hard soil, covered with pretty large trees following regularly the banks of the river, which form the bed of it for more than six leagues into the sea.⁸

In the memoir respecting New Biscay the difficulty has been dealt with respecting the inconstancy of the savages. They know too well how important it is to them to live on good terms with us, to fail in their fidelity, in which they have never been known to fail in New France. Such an event is still less to be apprehended from those who are obedient and submissive to their *caziques*, whose good will it is sufficient to gain in order to keep the rest in obedience.

⁷ This word is in local use at New Orleans, to describe both the great artificial embankment of the river and any natural embankment.

[⁸ This sentence omitted in FRENCH'S 1875 reprint.]

LA SALLE

CHAPTER IX.

ACCOUNT OF LA SALLE'S ATTEMPT TO REACH THE MISSISSIPPI BY SEA, AND OF THE ESTABLISHMENT OF A FRENCH COLONY IN ST. LOUIS BAY, BY FATHER CHRIS- TIAN LE CLERCQ.

THE first design of the Sieur de la Salle had been to find the long-sought passage to the Pacific Ocean, and although the River Colbert (Mississippi) does not lead to it, yet this great man had so much talent and courage that he hoped to find it, if it were possible, as he would have done had God spared his life.

The Illinois territory, and vast countries around, being the center of his discovery, he spent there the winter, summer and beginning of autumn, 1683, in establishing his posts. He at last left Monsieur de Tonty [in August] as commandant and resolved to return to France to render an account of his fulfilment of the royal orders. He reached Quebec early in November, and Rochelle, France, on the 23d of December.

His design was to go by sea to the mouth of the River Colbert, and there found pow-

JOURNEYS OF

erful colonies under the pleasure of the King. These proposals ¹ were favorably received by Monsieur de Seignelay, Minister and Secretary of State and Superintendent of Commerce and Navigation of France. His Majesty accepted them and condescended to favor the undertaking not only by new powers and commissions, which he conferred upon him, but also by the help of vessels, troops and money, which his royal liberality furnished him.

The first care of the Sieur de la Salle after being invested with these powers was to provide for the *spiritual*, to advance especially the glory of God in this enterprise. He turned to two different bodies of missionaries in order to obtain men able to labor in the salvation of souls and lay the foundations of Christianity in this savage land. He accordingly applied to Monsieur Tronçon, superior-general of the clergymen of the Seminary of St. Sulpice, who willingly took part in the work of God and appointed three of his ecclesiastics, full of zeal, virtue and capacity, to commence these new missions. They were Monsieur Cavelier, brother of the Sieur de la Salle; Monsieur

¹ See M. de la Salle's Memoir in *Hist. Coll. of Louisiana*, Vol. I., p. 25. [Also Vol. I., Chap. VIII. For a discussion of La Salle's object cf. *Quar. Texas Hist. Ass'n* V., 97-112.]

LA SALLE

Chefdeville, his relative, and Monsieur de Maïulle,³ all three priests.

As for nearly ten years the Recollects had endeavored to second the designs of the Sieur de la Salle for the glory of God and the sanctification of souls throughout the vast countries of Louisiana, depending on him from Fort Frontenac, and had accompanied him on his expeditions, in which our Father Gabriel was killed, he made it an essential point to take some of our fathers to labor in concert to establish the kingdom of God in these new countries. For this purpose he applied to the Rev. Father Hyacinth le Febvre, who had been twice provincial of our province of St. Anthony, in Artois, and was then, for the second time, provincial of that of St. Denis, in France, who, wishing to second with all his power the pious intentions of the Sieur de la Salle, granted him the religious he asked, namely, Father Zenobius Membré, superior of the mission, and Fathers Maximus Le Clercq and Anastasius Douay, all three of our province of St. Anthony, the first having been for four years the inseparable companion of the Sieur de la Salle during his discovery on land; the second had served

[¹ Father D'Esmanville, or Dainmaville, was sent instead.]

JOURNEYS OF

for five years with great edification in Canada, especially in the mission of the seven islands and Anticosti. Father Denis Morguet was added as a fourth priest; but that religious finding himself extremely sick on the third day after embarking, he was obliged to give up and return to his province.

The reverend father provincial had informed the Congregation de propagandâ fide of this mission to obtain necessary authority for the exercise of our ministry; he received decrees in due form, which we will place at the end of the chapter, not to interrupt the reader's attention here. His Holiness Innocent XI. added by an express brief authentic powers and permission in twenty-six articles, as the Holy See is accustomed to grant to missionaries whose remoteness makes it morally impossible to recur to the authority of the ordinary. It was granted against the opposition of the Bishop of Quebec, Cardinal d'Estrees having shown that the distance from Quebec to the mouth of the river was more than eight or nine hundred leagues by land.*

The hopes that were then justly founded on this famous expedition induced many

* Similar opposition compelled the first Jesuits in Louisiana to leave soon after their arrival with Iberville.

LA SALLE

young gentlemen to join the *Sieur de la Salle* as volunteers; he chose twelve who seemed most resolute, among them the *Sieur de Morangé* and *Sieur Cavelier*, his nephews, the latter only fourteen years of age.

The little fleet was fitted out at Rochelle, to be composed of four vessels—the *Joly*, a royal ship; a frigate called the *Belle*, a store-ship called the *Amiable* and a ketch called the *St. Francis*. The royal vessel was commanded by *Captain de Beaujeu*, a Norman gentleman, known for valor and experience and his meritorious services; his lieutenant was *M. le Chevalier d'Aire*, now captain in the navy, and son of the dean of the Parliament of Metz. The *Sieur de Hamel*, a young gentleman of Bruage, full of fire and courage, was ensign. Would to God the troops and the rest of the crew had been as well chosen! Those who were appointed while *M. de la Salle* was at Paris picked up a hundred and fifty soldiers, mere wretched beggars soliciting alms, many too deformed and unable to fire a musket. The *Sieur de la Salle* had also given orders at Rochelle to engage three or four mechanics in each trade; the selection was, however, so bad that when they came to the destination and they were set to work it was seen that they

JOURNEYS OF

knew nothing at all. Eight or ten families of very good people presented themselves and offered to go and begin the colonies. Their offer was accepted and great advances made to them, as well as to the artisans and soldiers.

All being ready, they sailed on the 24th of July, 1684. A storm which came on a few days later obliged them to put in at Chef-de-Bois to repair one of their masts broken in the gale. They set sail again on the 1st of August, steering for St. Domingo. But a second storm overtook them and dispersed them on the 14th of September. The *Amiable* and the *Belle*, alone remaining together, reached Petit Goave, in St. Domingo, where they fortunately found the *Joly*. The *St. Francis*, being loaded with goods and effects, and unable to follow the others, had put in at Port de Paix, whence she sailed after the storm was over to join the fleet at the rendezvous; but as during the night, while quite calm, the captain and crew, thinking themselves in safety, were perfectly off their guard, they were surprised by two Spanish *periaguas*, which took the ketch.

This was the first mishap which befell the voyage, a disaster which caused universal consternation in the party and much

LA SALLE

grief to the Sieur de la Salle, who was just recovering from a dangerous malady, which had brought him to the verge of the grave. They stayed, indeed, some time at St. Domingo, where they laid in provisions, a store of Indian corn, and of all kinds of domestic animals to stock the new country. M. de St. Laurent, Governor-General of the isles; Begun, intendent, and De Cussy, Governor of St. Domingo, favored them in every way, and even restored the reciprocal understanding so necessary to succeed in such undertakings; but the soldiers and most of the crew, having plunged into every kind of debauchery and intemperance, so common in those parts, were so ruined and contracted with dangerous disorders that some died in the island and others never recovered.

The little fleet, thus reduced to three vessels, weighed anchor November 25th, 1684, and pursued its way successfully along the Cayman Isles, and passing by the Isle of Peace (Pines), after anchoring there a day to take in water, reached Port San Antonio, on the Island of Cuba, where the three ships immediately anchored. The beauty and allurements of the spot and its advantageous position induced them to stay, and even land. For some unknown reason the Spaniards had abandoned there several kinds of

JOURNEYS OF

provisions and, among the rest, some Spanish wine,⁴ which they took, and, after two days' repose, left to continue the voyage to the Gulf of Mexico.

The *Sieur de la Salle*, although very clear-headed and not easily misled, had, however, too easily believed the advice given him by some persons in *St. Domingo*. He discovered, too late, that all the sailing directions given him were absolutely false; the fear of being injured by northerly winds, said to be very frequent and dangerous at the entrance of the gulf, made them twice lie to; but the discernment and courage of the *Sieur de la Salle* made them try the passage a third time, and they entered happily on the 1st of January, 1685, when *Father Anastasius* celebrated a solemn mass as a thanksgiving; after which, continuing the route, they arrived in fifteen days in sight of the coast of *Florida*, when a violent wind forced the *Joly* to stand off, the store-ship and frigate coasting along, the *Sieur de la Salle* being anxious to follow the shore.

He had been persuaded at *St. Domingo* that the gulf stream ran with incredible rapidity toward the *Bahama channel*. This

[⁴ This is contradicted by *Joutel*. Cf. *MARGRY* III., 113.]

LA SALLE

false advice set him entirely astray, for, thinking himself much further north than he was, he not only passed Espiritu Santa Bay (Appalachee [or Mobile]) without recognizing it, but even followed the coast far beyond the River Colbert, and would even have continued to follow it, had they not perceived by its turning south, and by the latitude, that they were more than forty or fifty leagues from the mouth, the more so as the river, before emptying into the gulf, coasts along the shore of the gulf to the west; and, as longitude is unknown to pilots, it proved that he had greatly passed his parallel lines.

The vessels at last, in the middle of February [January 19], met at Espiritu Santo Bay, where there was an almost continual roadstead. They resolved to return whence they came, and advanced ten or twelve leagues to a bay which they called St. Louis Bay (St. Bernard). As provisions began to fail, the soldiers had already landed, the Sieur de la Salle explored and sounded the bay, which is a league broad, with a good bottom. He thought that it might be the right arm of the River Colbert. He brought the frigate in without accident on the 18th of February. The channel is deep, so deep, in fact, that even on the sand bar, which

JOURNEYS OF

in a manner bars the entrance, there are twelve or fifteen feet of water at low tide.

The *Sieur de la Salle* having ordered the captain of the store-ship not to enter without the pilot of the frigate, in whom he put all confidence, to unload his cannon and water into the boats to lighten his cargo, and lastly, to follow exactly the channel staked out; none of his orders were executed, and the faithless man, in spite of the advice given him by a sailor who was at the maintop to keep off, drove his vessel on the shoals, where he touched and stranded, so that it was impossible to get off.⁵

La Salle was on the seashore when he saw this deplorable maneuver, and was embarking to remedy it, when he saw a hundred or a hundred and twenty Indians come. He had to put all under arms. The roll of the drum put the savages to flight; he followed them, presented the calumet of peace, and conducted them to their camp, regaled them, and even made them presents; and the *Sieur de la Salle* gained them so that an alliance was made with them. They brought meat to the camp the following days; he bought some of their canoes, and there was every reason to expect much from this necessary union.

[⁵ Cf. *MARGRY II.*, 556, 599.]

LA SALLE

Misfortune would have it that a bale of blanketing from the wreck was thrown on shore. Some days after a party of Indians seized it. The Sieur de la Salle ordered his men to get it out of their hands peaceably; they did just the contrary; the commander presented his musket as if about to fire. This so alarmed them that they regarded us only as enemies. Provoked to fury, they assembled on the night of the 6th and 7th of March and, finding the sentinel asleep, poured in a destructive volley of arrows. Our men ran to arms; the noise of musketry put them to flight, after they had killed on the spot the Sieurs Oris and Desloge, two cadet volunteers, and dangerously wounded the Sieur de Moranger, lieutenant, and nephew of the Sieur de la Salle, and the Sieur Gaïen, a volunteer. The next day they killed two more of our men, whom they found sleeping on the shore.

Meanwhile the store-ship remained more than three weeks at the place of its wreck, without going to pieces, but full of water; they saved all they could in periaguas and boats when a calm allowed them to reach it. One day Father Zenobius having passed in a boat, it was dashed to pieces against the vessel by a sudden gust of wind. All quickly got on board, but the good father,

JOURNEYS OF

who remained last to save the rest, would have been drowned had not a sailor thrown him a rope, with which he drew himself up as he was sinking.

At last Monsieur de Beaujeu sailed in the Joly, with all his party, on the 12th of March, to return to France, and the Sieur de la Salle, having thrown up a house with planks and pieces of timber, to put his men and goods in safety, left a hundred men under the command of the Sieur de Moranger and set out with fifty others, the Sieur Cavalier and Fathers Zenobius and Maximus intending to seek at the extremity of the bay the mouth of the river and a proper place to fix his colony.^a

The captain of the frigate had orders to sound the bay in boats and to bring his vessel in as far as he could. He followed twelve leagues along the coast, which runs from southeast to northwest, and anchored opposite a point to which the Sieur Hurier gave his name. He was appointed commander there, this post serving as a station between the naval camp and the one the Sieur de la Salle went, on the 2d of April, to form at the extremity of the bay, two leagues up a beautiful river called Cow

[^a SHEA, *Estab't of Faith* II., 218, note, gives an unfair picture of La Salle's actions at this time.]

LA' SALLE

River, from the great number of those wild animals they found there. Our people were attacked there by a party of Indians, but repulsed them.

On the 21st, holy Saturday, the *Sieur de la Salle* came to the naval camp, where the next day and the three following those great festivals were celebrated with all possible solemnity, each one receiving his Creator. The following days all the effects, and generally all that could be of service to the camp of the *Sieur de la Salle*, were transferred from those of the *Sieurs de Moranger* and *Hurier*, which were destroyed. For a month the *Sieur de la Salle* made them work in cultivating the ground ; but neither the grain nor the vegetables sprouted, either because they were damaged by the salt water or because, as was afterward remarked, it was not the right season. The fort,⁷ which was built in an advantageous position, was soon in a state of defense, furnished with twelve pieces of cannon, and a magazine underground, for fear of fire, in which all the effects were safely deposited. The maladies which the soldiers had contracted at *St. Domingo* were visibly carrying them off, and a hundred died in a few days, notwithstanding all the relief afforded by broths, pre-

[⁷ Cf. *SHEA, Ibid.*, 219.]

JOURNEYS OF

serves, treacle and wine which were given them.

On the 9th of August, 1685, three of our Frenchmen, being at the chase, which is plentiful in these parts in all kinds of game and deer, were surrounded by several troops of armed savages; but our men, putting themselves on the defensive, first killed the chief and scalped him. This spectacle terrified and scattered the enemy, who, nevertheless, some time after surprised and killed one of our Frenchmen.

On the 13th of October the Sieur de la Salle, seeing himself constantly insulted by the savages, and wishing, moreover, to have some of their canoes, by force or consent, as he could not do without them, resolved to make open war on them in order to bring them to an advantageous peace.

He set out with sixty men, armed with wooden corselets to protect them against arrows, and arrived where they had gathered. In different engagements, by day and night, he put some to flight, wounded several, killed some; others were taken, among the rest some children, one of whom, a girl, three or four years old, was baptized, and died some days after, as the first fruits of this mission and a sure conquest sent to heaven. The colonists now built houses and

LA SALLE

formed fields by clearing the ground, the grain sowed succeeding better than the first. They crossed to the other side of the bay in canoes, and found on a large river a plentiful chase, especially of cattle and turkeys. In the fort they raised all kinds of domestic animals, cows, hogs and poultry, which multiplied greatly.⁸ Lastly, the execution done among the Indians had rendered the little colony somewhat more secure, when a new misfortune succeeded all the preceding.

The *Sieur de la Salle* had ordered the captain of the frigate to sound the bay carefully as he advanced and to recall all his men on board at nightfall; but this captain and six of his strongest, stoutest and ablest men, charmed with the agreeableness of the season and the beauty of the country, left their canoe and arms on the sand at low water and advanced a gunshot on the plain to be dry. Here they fell asleep, and an Indian party, espying them, surprised them, aided by their sleep and the darkness, massacred them cruelly and destroyed their arms and canoe. This tragical adventure produced the greatest consternation in the camp.

After rendering the last honors to the murdered men the *Sieur de la Salle*, leaving

[⁸ This is denied by Joutel. See Vol. II., p. 61.]

JOURNEYS OF

provisions for six months, set out with twenty men and his brother, the *Sieur Cavalier*, to seek the mouth of the river (Mississippi) by land. The bay, which he discovered to be in latitude $27^{\circ} 45' N.$, is the outlet of a great number of rivers, none of which, however, seemed large enough to be an arm of the River Colbert. The *Sieur de la Salle* explored them in hope that a part of these rivers was formed further up by one of the branches of the said river, or, at least, that by traversing the country to some distance, he would make out the course of the Mississippi. He was longer absent than he had expected, being compelled to make rafts to cross the rivers and to intrench himself every night to protect himself against attacks. The continual rains, too, formed ravines and destroyed the roads. At last, on the 13th of February, 1686, he thought that he had found the river.* He fortified himself there, left a part of his men, and with nine others continued to explore a most beautiful country, traversing a number of villages and nations, who treated him very kindly. At last, returning to find his people, he arrived at the general camp on the 31st of May [March], charmed with the

*Of course, he was mistaken, but cf. MARGRY III., 545, and CAVELIER'S *Account*, Vol. I., page 276.

LA SALLE

beauty and fertility of the fields, the incredible quantity of game of every kind and the numerous tribes he had met on the way.¹⁰

The Almighty was preparing him a still more sensible trial than the preceding in the loss of his only remaining vessel, in which he hoped to coast along and then pass to St. Domingo, to send news to France and obtain new succor. This sad accident happened from want of precaution on the part of the pilot. All the goods were lost irrecoverably; the vessel struck on the shore, the sailors were drowned; the *Sieur de Chefdeville*, the captain, and four others, with difficulty, escaped in a canoe which they found almost miraculously on the shore. They lost thirty-six barrels of flour, a quantity of wine, the trunks, clothes, linen, equipage and most of the tools. We leave the reader to imagine the grief and affliction felt by the *Sieur de la Salle* at an accident which completely ruined all his measures. His great courage even could not have borne him up had not God aided his virtue by the help of extraordinary grace.

All these measures being thus discontinued and his affairs brought to extremes, he resolved to try to reach Canada by land.

¹⁰ For Tonty's movements during this same period cf. Vol. I., page 34.

JOURNEYS OF

He returned some time after and undertook a second, in which he lost his life by the cruelty of his men, some of whom, remaining faithful, continued their route and reached France, among the rest Father Anastasius Douay. Although the detail of his remarks was lost in his many wrecks, the following is an abridgment of what he could gather from them, with which, perhaps, the reader will be better pleased than if I gave it in my own style.

CHAPTER X.

NARRATIVE OF LA SALLE'S ATTEMPT TO ASCEND THE MISSISSIPPI IN 1687, BY FATHER ANASTASIUS DOUAY, RECOLLECT.¹

[PART I. TO THE DEATH OF LA SALLE.]

THE Sieur de la Salle, seeing no other resource for his affairs but to go by land to the Illinois, to be able to give in France

¹ Of Father Anastasius Douay we know little; Hennepin makes him a native of Quesnoy, in Hainault. He had never been in America before, but after being connected with La Salle's expedition from 1684 to 1688, he reached France, as we shall see, in safety. He was, says Hennepin, vicar of the Recollects of Cambray in 1697. Certain it is that he subsequently revisited America in 1699 with Iberville, but we can trace him no fur-

LA SALLE

tidings of his disasters, chose twenty of his best men, including Nika, one of our Shawnee Indians, who had constantly attended him from Canada to France, and from France to Mexico. Monsieur Cavelier, the Sieur de Morenget and I also joined them for this great journey, for which we made no preparation but four pounds of powder and four of lead, two axes, two dozen knives, as many awls, some beads and two kettles. After celebrating the divine mysteries in the chapel of the fort, and invoking together the help of heaven, we set out on the 22d [13th, 28th] of April, 1686, in a northeasterly direction.

On the third day we perceived in some of the finest plains in the world a number of people, some on foot, others on horseback; these came galloping toward us, booted and spurred and seated on saddles. They invited us to their town, but as they were six leagues to the northwest, out of our route, we thanked them, after learning in conversation that they had intercourse with the Spaniards. Continuing our march the rest of the day, we cabined at night in a ther. A man of observation and ability, he seems to have been quite sweeping in his charges, as we shall observe in the course of his narrative. The only point against him besides this, which was an excess of party feeling, was his share in the deception practiced on Tonty.

JOURNEYS OF

little intrenched stockade fort, to be beyond reach of insult; this we always after practiced, with good results.

Setting out the next morning, we marched for two days through continual prairies to the river which we called Robek,² meeting everywhere so prodigious a quantity of Cibola, or wild cattle, that the smallest herds seemed to us to contain two or three hundred. We killed nine or ten in a moment and dried a part of the meat, so as not to have to stop for five or six days. A league and a half further we met another and finer river, wider and deeper than the Seine at Paris, skirted by some of the finest trees in the world, set as regularly as though they had been planted by man. Among them were many mulberry and other fruit trees. On one side were prairies, on the other woods. We passed it on rafts, and called it La Maligne [Colorado?].

Passing through this beautiful country, its delightful fields and prairies, skirted with vines, fruit trees and groves, we, a few days after, reached a river, which we called Hiens [St. Bernard], after a German from Wittemburg, who got so fast in the mud that he could scarcely get out. One of our

[² The Colorado, Lavaca and St. Bernard have all been suggested.]

LA SALLE

men, with an axe on his back, swam over to the other side ; a second followed at once ; they then cut down the largest trees, while others on our side did the same. These trees were cut so as to fall on each side into the river, where, meeting, they formed a kind of bridge, on which we easily passed. This invention we had recourse to more than thirty times in our journeys, finding it surer than the Çajeu, which is a kind of raft formed of many pieces, and branches tied together, on which we passed over, guiding it by a pole.

Here the Sieur de la Salle changed his route from northeast to east, for reasons which he did not tell us, and which we could never discover.

After several days' march in a pretty fine country, crossing ravines on rafts, we entered a much more agreeable and perfectly delightful territory, where we found a very numerous tribe, who received us with all possible friendship, even the women coming to embrace our men. They made us sit down on well-made mats at the upper end, near the chiefs, who presented us the calumet adorned with feathers of every hue, which we had to smoke in turn. They served up to us, among other things, a sagamity, made of a kind of root called Toqué,

JOURNEYS OF

or Toquo. It is a shrub, like a kind of bramble without thorns, and has a very large root, which they wash and dry perfectly, after which it is pounded and reduced to powder in a mortar. The sagamity has a good taste, though astringent. These Indians presented us with some cattle skins, very neatly dressed, to make shoes; we gave them in exchange beads, which they esteem highly. During our stay the Sieur de la Salle so won them by his manners and insinuated so much of the glory of our King, telling them that he was greater and higher than the sun, that they were all ravished with astonishment.

The Sieur Cavelier and I endeavored here, as everywhere else, to give them some first knowledge of the true God. This nation is called Biskatrongé, but we called them the nation of weepers,^a and gave their beautiful river the same name, because at our arrival and entrance they all began to weep bitterly for a good quarter of an hour. It is their custom when they see any who come from afar, because it reminds them of their deceased relatives, whom they suppose on a long journey, from which they await their return. These good people, in

^a Cabeza de Vaca from the same circumstance gives a similar name to a tribe in that quarter. [See edition by Bandelier in this series, p. 72.]

LA SALLE

conclusion, gave us guides, and we passed their river in their periaguas.

We crossed three or four others the following days without any incident of note, except that our Shawnee, firing at a deer pretty near a large village, so terrified them all by the report that they took to flight. The Sieur de la Salle put all under arms to enter the village, which consisted of three hundred cabins. We entered the largest, that of the chief, where we found his wife still, unable to fly from old age. The Sieur de la Salle made her understand that we came as friends. Three of her sons, brave warriors, observed at a distance what passed, and, seeing us to be friendly, recalled all their people. We treated of peace, and the calumet was danced till evening, when the Sieur de la Salle, not trusting them overmuch, went and encamped beyond the canes, so that, if the Indians approached by night, the noise of the canes would prevent our being surprised.

This showed his discernment and prudence, for during the night a band of warriors, armed with arrows, approached; but the Sieur de la Salle, without leaving his entrenchment, threatened to thunder his guns; and, in a word, spoke so boldly and firmly that he obliged them to draw off.

JOURNEYS OF

After their retreat the night passed off quietly, and the next day, after reciprocal marks of friendship, apparent, at least, on the side of the Indians, we pursued our route to five or six leagues beyond. Here we were agreeably surprised to find a party of Indians come out to meet us with ears of corn in their hands and a polished, honest air. They embraced us, inviting us most pressing to go and visit their villages. The Sieur de la Salle, seeing their sincerity, agreed. Among other things, these Indians told us that they knew whites toward the west, a cruel, wicked nation, who depeopled the country around them. (These were the Spaniards.) We told them that we were at war with that people. When the news of this spread through the village, called that of the Kironas, all vied with each other in welcoming us, pressing us to stay and go to war with the Spaniards of Mexico. We put them off with fair words, and made a strict alliance with them, promising to return with more numerous troops. Then, after many feasts and presents, they carried us over the river in periaguas.

As we constantly held on our way to the east, through beautiful prairies, a misfortune befell us after three days' march. Our Indian hunter, Nika, suddenly cried out

LA SALLE

with all his might, "I am dead!" We ran up and learned that he had been cruelly bitten by a snake; this accident stopped us for several days. We gave him some orvietan and applied viper's salt on the wound, after scarifying it to let out the poison and tainted blood. He was at last saved.

Some days after we had many other alarms. Having reached a large and rapid river, which we were told ran to the sea, and which we called Misfortune ⁴ River we made a raft to cross. The Sieur de la Salle and Cavalier, with a part of our people, got on; but scarcely had they got into the current, when by its violence it carried them off with incredible rapidity, so that they disappeared almost instantly. I remained ashore with a part of our men; our hunter was absent, having been lost for some days. It was a moment of extreme anguish for us all, who despaired of ever again seeing our guardian angel, the Sieur de la Salle. God vouchsafed to inspire me constantly with courage, and I cheered up those who remained as well as I could. The whole day was spent in tears and weeping, when at nightfall we saw on the opposite brink La Salle with all his party. We now learned that by an interposition of Providence the

[⁴ Probably the Brazos.]

JOURNEYS OF

raft had been stopped by a large tree floating in the middle of the river. This gave them a chance to make an effort and get out of the current, which would otherwise have carried them out to sea. One of his men sprang into the water to catch the branch of a tree, and then was unable to get back to the raft. He was a Breton named Rut; but he soon after appeared on our side, having swam ashore.

The night was spent in anxiety, thinking how we should find means to pass to the other side to join the Sieur de la Salle. We had not eaten all day, but Providence provided for us by letting two eagles fall from a cedar tree. We were ten at his meal. ,

The next day we had to pass; the Sieur de la Salle advised us to make a raft of canes. The Sieur Moranget and I, with three others, led the way, not without danger, for we went under every moment, and I was obliged to put *our* breviary in *our* cowl, because it got wet in the sleeve. The Sieur de la Salle sent two men to swim out and help us push the canes in, and they brought us safely in. Those who remained on the other side did not at all like risking it, but they had to do it at last, on our making show of packing up and continuing

LA SALLE

our march without them; they then crossed at less hazard than we.

The whole troop, except the hunter, being now assembled, we for two days traversed a thick cane-brake, the *Sieur de la Salle* cutting his way with two axes, and the others in like manner, to break the canes. At last, on the third day, our hunter, *Nika*, came in, loaded with three dried deer and another just killed. The *Sieur de la Salle* ordered a discharge of several guns to show our joy.

Still marching east, we entered countries still finer than those we had passed, and found tribes that had nothing barbarous but the name; among others, we met a very honest Indian returning from the chase with his wife and family. He presented the *Sieur de la Salle* with one of his horses and some meat, invited him and all his party to his cabin, and, to induce us, left his wife, family and game as a pledge, while he hastened to the village to announce our coming. Our hunter and a servant of the *Sieur de la Salle* accompanied him, so that two days after they returned to us with two horses loaded with provisions, and several chiefs, followed by warriors very neatly attired in dressed skins adorned with feathers. They came on bearing the calumet ceremoniously and met us three leagues from the village; the

JOURNEYS OF

Sieur de la Salle was received as if in triumph and lodged in the great chief's cabin. There was a great concourse of people, the young men being drawn out and under arms, relieving one another night and day, and, besides, loading us with presents and all kinds of provisions. Nevertheless, the Sieur de la Salle, fearing lest some of his party might go after the women, encamped three leagues from the village. Here we remained three or four days and bought horses and all that we needed.

Caddo-

This village, that of the Cœnis [Sp. Asinais], is one of the largest and most populous that I have seen in America. It is at least twenty leagues long, not that it is constantly inhabited, but in hamlets of ten or twelve cabins, forming cantons, each with a different name. Their cabins are fine, forty or fifty feet high, of the shape of beehives. Trees are planted in the ground and united above the branches, which are covered with grass. The beds are ranged around the cabin, three or four feet from the ground; the fire is in the middle, each cabin holding two families.

We found among the Cœnis many things which undoubtedly came from the Spaniards, such as dollars and other pieces of money, silver spoons, lace of every kind,

LA SALLE

clothes and horses. We saw, among other things, a bull from Rome exempting the Spaniards in Mexico from fasting during summer.⁵ Horses are common; they gave them to us for an axe; one Cœnis offered me one for our cowl, to which he took a fancy.

They have intercourse with the Spaniards through the Choûmans [Comanches], their allies, who are always at war with New Spain. The Sieur de la Salle made them draw on bark a map of their country, of that of their neighbors, and of the River Colbert, or Mississippi, with which they are acquainted. They reckoned themselves six days' journey from the Spaniards, of whom they gave us so natural a description that we no longer had any doubts on the point, although the Spaniards had not yet undertaken to come to their villages, their warriors merely joining the Choûmans to go war on New Mexico. The Sieur de la Salle, who perfectly understood the art of gaining the Indians of all nations, filled these with admiration at every moment. Among other things, he told them that the chief of

Comanche

⁵ Certain Mexican writers used these statements and those of similar import given by Cavelier (Chap. XII., XIII.) as evidence to strengthen Spanish claims to Texas. Cf. *Historia* 43. *Opusculo Cubo* VI., *Archive General*.

JOURNEYS OF

the French was the greatest chief in the world, as high as the sun, and as far above the Spaniard as the sun is above the earth. On his recounting the victories of our monarch they burst into exclamations, putting their hand on their mouth as a mark of astonishment. I found them very docile and tractable, and they seized well enough what we told them of the truth of God.

There were then some Choüman ^{ceremonial} ambassadors among them, who came to visit us. I was agreeably surprised to see them make the sign of the cross, kneel, clasp their hands, and raise them from time to time to heaven. They also kissed my habit, and gave me to understand that men dressed like us instructed tribes in their vicinity, who were only two days' march from the Spaniards, where our religious had large churches, in which all assembled to pray. They expressed very naturally the ceremonies of the mass; one of them sketched me a painting that he had seen of a great lady, who was weeping because her son was upon a cross. He told us that the Spaniards butchered the Indians cruelly, and, finally, that if we would go with them, or give them guns, they could easily conquer them, because they were a cowardly race, who had no courage, and made people walk before

LA SALLE

them with a fan to refresh them in hot weather.

After remaining here four or five days to recruit, we pursued our route through the Nassonis, crossing a large river which intersects the great Cœnis village.* These two nations are allies and have nearly the same character and customs.

- Cœnis -

Four or five leagues from there we had the mortification to see that four of our men had deserted under cover of night and retired to the Nassonis; and, to complete our chagrin, the Sieur de la Salle and his nephew, the Sieur de Moranget, were attacked with a violent fever, which brought them to extremity. Their illness was long and obliged us to make a long stay at this place, for when the fever, after frequent relapses, left them at last, they required a long time to recover entirely.

The length of this sickness disconcerted all our measures, and was eventually the cause of the last misfortunes which befell us. It kept us back more than two months, during which we had to live as we could; our powder began to run out; we had not advanced more than a hundred and fifty leagues in a straight line, and some of our people had deserted. In so distressing a

[* Perhaps the Trinity or Neches.]

JOURNEYS OF

crisis the Sieur de la Salle resolved to retrace his steps to Fort [St.?] Louis; all agreed, and we straightway resumed our route, during which nothing happened worth note but that, as we repassed the Maligne, one of our men was carried off with his raft by a crocodile of prodigious length and bulk.

After a good month's march, in which our horses did us good service, we reached the camp on the 17th of October [or August], in the same year, 1686, where we were welcomed with all imaginable cordiality, but, after all, with feelings tinged alike with joy and sadness as each related the tragical adventures which had befallen both since we had parted.

It would be difficult to find in history courage more intrepid or more invincible than that of the Sieur de la Salle; in adversity he was never cast down, and always hoped with the help of heaven to succeed in his enterprises, despite all the obstacles that rose against it [them].

He remained two months and a half at Saint Louis Bay, and we visited together all the rivers which empty into it. To my own knowledge, I am sure that there are more than fifty, all navigable, coming from the west and northwest; the place where the

LA SALLE

fort stands is somewhat sandy; everywhere else the ground is good. On every side we saw prairies on which the grass is, at all seasons of the year, higher than wheat with us. Every two or three leagues is a river skirted with oaks, thorn, mulberry and other trees. This kind of country is uniform until within two days' march of the Spaniards.

The fort is built on a little eminence which runs north and south; it has the sea on the southwest, vast prairies to the west, and on the southwest [?] two small lakes and woods a league in circuit; a river flows at its foot. The neighboring nations are the Quoanquis, who raise Indian corn and have horses cheap; the Bahamos [Bracamos, Ebahamos] and the Quinets, wandering tribes, with whom we are at war. During this time the Sieur de la Salle forgot nothing to console his little infant colony, in which the families began to increase by births. He advanced greatly the clearing of land and the erection of buildings; the Sieur de Chefdeville, priest; the Sieur Cavelier and we three Recollects laboring in concert for the edification of the French and of some Indian families who withdrew from the neighboring nations to join us.⁷ Dur-

[⁷ Joutel denies that Indians joined them. See Vol. II., page 88.]

JOURNEYS OF

ing all this time the Sieur de la Salle did his utmost to render the Indians less hostile, peace with them being of the utmost consequence for the establishment of the colony.

At last Monsieur de la Salle resolved to resume his Illinois voyage, so necessary for his plans. He made an address full of eloquence, with that engaging way so natural to him; the whole colony was present, and were almost moved to tears, persuaded of the necessity of his voyage and the uprightness of his intentions. Would to God that all had persevered in these sentiments! He completed the fortification of a great enclosure, encircling all the habitations and the fort, after which he chose twenty men—the Sieur Cavelier, his brother, the Sieurs Moranget and Cavelier, his nephews, with the Sieur Joutel,⁸ pilot and myself. After public prayers, we set out on the 7th of January, 1687.⁹

The very first day we met an army of Bahamos going to war with the Erigoanna,^{possibly a Naranbaha band, H.B., 432} the Sieur de la Salle made an alliance with

⁸ Joutel was not in the previous excursion of the Ceniz, of which the missionary's is the only account.

[⁹ For the fate of those colonists left at Ft. St. Louis cf. MARGRY III., 609-622. *Quar. Tex. Hist. Ass'n* II., 253-312; V., 171-205. BANDELIER, A. F., *Expedition of Pedro de Villazur in Papers of the Archaeological Institute of America*, Series V.]

LA SALLE

them. He wished, also, to treat with the Quinets, who fled at our approach; but, having overtaken them by means of our horses, we treated them so kindly that they promised an inviolable peace.

The fourth day, three leagues further to the northeast, we came to the first Cane River. Our route lay through prairies, with scattered groves; the soil is so good that the grass grows ten or twelve feet high. There are on this river many populous villages; we visited only the Quaras [Kouaras] and the Anachoremas.

In the same direction, three leagues further, we came to the second Cane River [Colorado?], inhabited by various tribes; here we found fields of hemp.

Five leagues further we passed the Sandy River [La Sablonniere], so called from the sandy strip along it, though all the rest is good land and vast prairies.

We marched seven or eight leagues to Robec River [see note 2, page 224] passing through prairies and over three or four rivers, a league from one another. Robec River has many populous villages, where the people have a language so guttural that it would require a long time to form ourselves to it. They are at war with the Spaniards, and pressed us earnestly to join their war-

LA SALLE

hills and numerous springs. Here we found three large villages, the Taraha, Tyakappa and Palona, who have horses. Some league further on we came to the Palauquesson,²¹ composed of ten villages, allies of the Spaniards.

After having passed these nations the most disheartening of all our misfortune overtook us. It was the murder of Monsieur de la Salle, of the Sieur de Morange and of some others. Our prudent commander, finding himself in a country full of game, after all the party had recruited and lived for several days on every kind of good meat, sent the Sieur Moranget, his lackey, Saget, and seven or eight of his people to a place where our hunter, the Shawnee Nika, had left a quantity of buffalo meat (*bœuf*) to dry, so as not to be obliged to stop so often to hunt.

The wisdom of Monsieur de la Salle had not been able to foresee the plot which some of his people would make to slay his nephew, as they suddenly resolved to do, and actually did on the 17th of March by a blow of an axe, dealt by one whom charity

²¹ According to Joutel, *Hist. Coll. of Louisiana*, Vol. I., p. 147, [Vol. II., page 107], Palaquechaune was an Indian, whose tribe were allies of the Cenis, and who knew the Choumans, the friends of the Spaniards.

JOURNEYS OF

riors, but there was no hope of keeping us. We stayed, however, five or six days with them, endeavoring to gain them by presents and Christian instruction, a thing they do not get from the Spaniards.

Continuing our route, we crossed great prairies to the Maligne [Brazos?]. This deep river, where one of our men had been devoured by a crocodile, comes from a great distance, and is inhabited by forty populous villages, which compose a nation called the Quanoatinno; they make war on the Spaniards and lord it over the neighboring tribes. We visited some of these villages.¹⁰ They are a good people, but always savage, the cruelty of the Spaniards rendering them still more fierce. As they found us of a more tractable nature, they were charmed with our nation; but after these mutual presents we had to part. They gave us horses cheap and carried us over their river in hide canoes.

In the same direction, after four leagues of similar land, extremely fertile, we crossed Hiens River on rafts; then turning north-northeast, we had to cross a number of little rivers and ravines, navigable in winter and spring. The land is diversified with prairies,

¹⁰ Joutel says they merely heard of the Canohatino, and calls them afterward enemies of the Cenis.

LA SALLE

hills and numerous springs. Here we found three large villages, the Taraha, Tyakappan and Palona, who have horses. Some leagues further on we came to the Palaquesson,¹¹ composed of ten villages, allies of the Spaniards.

Canadian tribe*

After having passed these nations the most disheartening of all our misfortunes overtook us. It was the murder of Monsieur de la Salle, of the Sieur de Moranget and of some others. Our prudent commander, finding himself in a country full of game, after all the party had recruited and lived for several days on every kind of good meat, sent the Sieur Moranget, his lackey, Saget, and seven or eight of his people to a place where our hunter, the Shawnee Nika, had left a quantity of buffalo meat (*bœuf*) to dry, so as not to be obliged to stop so often to hunt.

The wisdom of Monsieur de la Salle had not been able to foresee the plot which some of his people would make to slay his nephew, as they suddenly resolved to do, and actually did on the 17th of March by a blow of an axe, dealt by one whom charity

¹¹ According to Joutel, *Hist. Coll. of Louisiana*, Vol. I., p. 147, [Vol. II., page 107], Palaquechaune was an Indian, whose tribe were allies of the Cenis, and who knew the Choumans, the friends of the Spaniards.

JOURNEYS OF

does not permit me to name (Liotot). They also killed the valet of the Sieur de la Salle and the Indian Nika, who, at the risk of his life, had supported them for more than three years. The Sieur de Moranget lingered for about two hours, giving every mark of a death precious in the sight of God, pardoning his murderers and embracing them, and making acts of sorrow and contrition, as they themselves assured us, after they recovered from their unhappy blindness. He was a perfectly honest man and a good Christian, confessing every week or fortnight on our march. I have every reason to hope that God has shown him mercy.

The wretches resolved not to stop here, and, not satisfied with this murder, formed a design of attempting their commander's life, as they had reason to fear his resentment and chastisement. We were full two leagues off. The Sieur de la Salle, troubled at the delay of the Sieur de Moranget and his people, from whom he had been separated now for two or three days, began to fear that they had been surprised by the Indians. Asking me to accompany him, he took two Indians and set out. All the way he conversed with me of matters of piety, grace and predestination, expatiating on all his obligations to God for having saved him

LA SALLE

from so many dangers during the last twenty years that he had traversed America. He seemed to be peculiarly penetrated with a sense of God's benefits to him. Suddenly I saw him plunged into a deep melancholy, for which he himself could not account; he was so troubled that I did not know him any longer. As this state was far from being usual, I roused him from his lethargy. Two leagues after we found the bloody cravat of his lackey; he perceived two eagles flying over his head, and at the same time discovered some of his people on the edge of the river, which he approached, asking them what had become of his nephew. They answered us in broken words, showing us where we should find him. We proceeded some steps along the bank to the fatal spot, where two of these murderers were hidden in the grass, one on each side, with guns cocked; one missed Monsieur de la Salle, the one [other] firing at the same time, shot him in the head. He died an hour after, on the 19th of March, 1687.

I expected the same fate, but this danger did not occupy my thoughts, penetrated with grief at so cruel a spectacle. I saw him fall a step from me, with his face full of blood. I watered it with my tears, exhorting him, to the best of my power, to die

JOURNEYS OF

well. He had confessed and fulfilled his devotions just before we started. He had still time to recapitulate a part of his life, and I gave him absolution. During his last moments he elicited all the acts of a good Christian, grasping my hand at every word I suggested, and especially at that of pardoning his enemies. Meanwhile his murderers, as much alarmed as I, began to strike their breasts and detest their blindness. I could not leave the spot where he had expired without having him buried as well as I could, after which I raised a cross over his grave.¹²

Thus died our wise commander, constant in adversity, intrepid, generous, engaging, dexterous, skillful, capable of everything. He who for twenty years had softened the fierce temper of countless savage tribes, was massacred by the hands of his own domestics, whom he had loaded with caresses. He died in the prime of life, in the midst of his course and labors, without having seen their success.

Occupied with these thoughts, which he

¹² This and the circumstances of Moranget's death are denied by Joutel. [See Vol. II., page 118. The spot where La Salle was murdered is usually supposed to be a southern branch of the Trinity. HENNEPIN, *New Disc'y* (TWA TES, ed.), II., 426.]

LA SALLE

had himself a thousand times suggested to us while relating the events of the new discoveries, I unceasingly adored the inscrutable designs of God in this conduct of His providence, uncertain still what fate He reserved for us, as our desperadoes plotted nothing less than our destruction. We at last entered the place where Monsieur Cavalier was; the assassins entered the cabin unceremoniously and seized all that was there. I had arrived a moment before them; I had no need to speak, for as soon as he beheld my countenance, all bathed in tears, the Sieur Cavalier exclaimed aloud, "Ah! my poor brother is dead!" This holy ecclesiastic, whose virtue has been so often tried in the apostolic labors of Canada, fell at once on his knees; the nephew, the Sieur Cavalier, myself and some others did the same, to prepare to die the same death; but the wretches, touched by some sentiments of compassion at the sight of the venerable old man, and, besides, half penitent for the murders they had committed, resolved to spare us, on condition that we should never return to France; but as they were still undecided, and many of them wished to return home, we heard them often say that they must get rid of us; that otherwise we would accuse

JOURNEYS OF

them before the tribunals if we once had them in the kingdom.

They elected as chief, the murderer of *Sieur de la Salle* (*Duhaut*), and at last, after many deliberations, resolved to push on to that famous nation of the *Cœnis*. Accordingly, after marching together for several days, crossing rivers and rivers, everywhere treated by these wretches as servants, having nothing but what they left, we reached the tribe without accident.

Meanwhile the justice of God accomplished the punishment of these men, in default of human justice. Jealousy and desire of command arose between *Hiens* and the *Sieur de la Salle's* murderer; each one of the guilty band sided on one side or the other. We had passed the *Cœnis*, after some stay there, and were already at the *Nassonis*, where the four deserters, whom I mentioned in the first expedition, rejoined us. On the eve of *Ascension*, seeing all together, and our wretches resolved to kill each other, I made them an exhortation on the festival, at which they seemed affected, and resolved to confess; but this did not last. Those who most regretted the murder of their commander and leader had sided with *Hiens*, who, seeing his opportunity two days after, sought to punish crime by

LA SALLE

crime. In our presence he shot the murderer of La Salle through the heart with a pistol. He died on the spot, unshriven, unable even to utter the names of Jesus and Mary. Another who was with Hiens shot the murderer of the Sieur de Moranget (Liotot) in the side with a musket ball. He had time to confess, after which a Frenchman fired a blank cartridge at his head. His hair, and then his shirt and clothes took fire and wrapped him in flames, and in this torment he expired. The third author of the plot and murder fled. Hiens wished to make way with him and thus completely avenge the death of the Sieur de la Salle, but the Sieur Joutel conciliated them and it stopped there.¹³

By this means Hiens remained chief of the wretched band. We had to return to Cœnis, where they had resolved to settle, not daring to return to France for fear of punishment.

¹³ This was Larcheveque, *Hist. Coll. of Louisiana*, Vol. I., p. 158. With Grollet, who had deserted from La Salle on his first excursion, he surrendered to a Spanish party under Don Alonzo de Leon. See extract from the *Ensayo Cronologico*. SHEA, *Disco'y and Explo. of the Miss.*, 208, note.

JOURNEYS OF

CHAPTER XI.

DOUAY'S NARRATIVE, PART II. THE RETURN TO FRANCE.

A Cœnis army was ready to march against the Kanoatino, a hostile tribe, cruel to their enemies, whom they boil alive. The Cœnis took our Frenchmen with them, after which Hiens pressed us strongly to remain with them, but we would not consent. Six of us, all French, accordingly set out from the Cœnis, among whom were the Sieurs Cavelier, uncle and nephew, and the Sieur Joutel. They gave us each a horse, powder and lead, and some goods to pay our way. We stopped at the Nassonis to celebrate the octave of Corpus Christi. They spoke to us daily of the cruelty of the Spaniards to the Americans, and told us that twenty Indian nations were going to war against the Spaniards, inviting us to join them, as we would do more with our guns than all their braves with their war clubs and arrows; but we had very different designs. We only took occasion to tell them that we came on behalf of God to instruct them in the truth and save their souls. In this we spent ten or twelve days, till the 3d of June, the

LA SALLE

feast of St. Anthony of Padua, whom the Sieur de la Salle had taken as patron of his enterprise.

Having received two Indians to guide us, we continued our way north-northeast, through the finest country in the world. We passed four large rivers and many ravines, inhabited by many different nations; we reconnoitred the Haquis, on the east; the Nabiri and Naansi, all numerous tribes, at war with the Cœnis, and at last, on the 23d of June, we approached the Caddodacchos.¹ *Caddo*
One of our Indians went on to announce our coming; the chiefs and youth, whom we met a league from the village, received us with the calumet, which they gave us to smoke; some led our horses by the bridle; others, as it were, carried us in triumph,

¹ These were doubtless the Caddoes, a tribe which is not yet extinct. According to Joutel, *Hist. Coll. of Louisiana*, Vol. I., p. 168, the tribe consisted of four allied villages—Assony, Nathos, Nachitos and Cadodaquio. Tonty describes them as forming three villages, Cadodaquis, Nachitoches and Nasoui, all on the Red River, and speaking the same language. Two of these tribes, the Nasoui and Nachitoches, bear a strong resemblance to the tribes found by Muscoso, the successor of De Soto, in the same vicinity, and called by Biedma, Nissione (*Hist. Coll. of Louisiana*, Vol. III., p. 107), and by the gentleman of Elvas, Nissoone and Naquiscoza, while the Daycao, as their river is called, is not incompatible with Cado-Daquio.—*Hist. Coll. of Louisiana*, Vol. III., p. 201. [Cf. BOURNE, *De Soto* I., 175, 178, 180; II., 36.]

JOURNEYS OF

taking us for spirits and people of another world.

All the village being assembled, the women, as is their wont, washed our head and feet with warm water, and then placed us on a platform covered with a very neat, white mat; then followed banquets, calumet-dances and other public rejoicings, day and night. The people knew the Europeans only by report; like other tribes through which we had passed, they have some very confused ideas of religion and adore the sun; their gala dresses bear two painted suns; on the rest of the body are representations of buffalo, stags, serpents and other animals. This afforded us an opportunity to give them some lessons on the knowledge of the true God and on our principal mysteries.

At this place it pleased God to traverse us by a tragical accident. The *Sieur de Marne*, in spite of all that we could say, went to bathe on the evening of the 24th; the younger *Sieur Cavelier* accompanied him to the river side, quite near the village. *De Marne* sprang into the water and immediately disappeared. It was an abyss, where he was in a moment swallowed up. A few hours afterward his body was recovered and brought to the chief's cabin. All the village

LA SALLE

mourned his death with all ceremony; the chief's wife herself neatly wound him in a beautiful cloth, while the young men dug the grave, which I blessed the next day, when we buried him with all possible solemnity. The Indians admired our ceremonies, from which we took occasion to give them some instruction during the week that we remained in this fatal place. Our friend was interred on an eminence near the village and his tomb surrounded by a palisade, surmounted by a large cross, which we got the Indians to raise, after which we started on the 2d of July.

This tribe is on the banks of a large river, on which lie three more famous nations, the Natchoos, the Natchites, [and?] the Ouidiches, where we were very hospitably received. From the Cœnis River, where we began to find beaver and otter, they became very plentiful as we advanced. At the Ouidiches we met three warriors of two tribes called the Cahinnio and the Mentous, twenty-five leagues further east-northeast, who had seen Frenchmen. They offered to guide us there, and on our way we passed four rivers on rafts. We were received with the calumet of peace and every mark of joy and esteem.²

² Joutel calls this village Cahaynahoua. See Joutel's journal published in French's *Hist. Coll.*

JOURNEYS OF

Many of these Indians spoke to us of a great captain, who had only one arm (this was Monsieur de Tonty), whom they had seen, and who told them that a greater captain than he would pass through their village. This was Monsieur de la Salle.

The chief lodged us in his cabin, from which he made his family retire. We were here regaled for several days on every kind of meat; there was a public feast, where the calumet was danced for twenty-four hours, with songs made for the occasion, which the chief intoned with all his might, treating us as people of the sun, who came to defend them from their enemies by the noise of our thunder. Amidst these rejoicings the younger Cavelier fired his pistol three times, crying "*Vive le roi!*" which the Indians repeated loudly, adding, "*Vive la soleil!*" These Indians have prodigious quantities of beaver and otter skins, which could be easily transported by a river near the village. They wished to load our horses with them, but we refused, to show our disinterestedness. We made them presents of axes and knives, and set out with two Cahinnio to act as guides, after having received embassies from Analao and Tanico and other

of *Louisiana*, Vol. I., pp. 85-193. [Also Vol. II., p. 170.]

LA SALLE

tribes to the northwest and southeast. It was delightful to traverse for several days the finest country, intersected by many rivers, prairies, little woods and vine-clad hills. Among others, we passed four large navigable rivers, and at last, after a march of about sixty leagues, we reached the Osoteoz, who dwell on the great river which comes from the northwest, skirted by the finest woods in the world. Beaver and otter skins and all kinds of peltries are so abundant there that, being of no value, they burn them in heaps. This is the famous river of the Achansa, who here form several villages. At this point we began to know where we were, and finding a large cross, bearing below the royal arms, with a French-looking house, our people discharged their guns. Two Frenchmen at once came forth, and the one in command, by name Coutûre, told us that the Sieur de Tonty had stationed them there to serve as an intermediate station to the Sieur de la Salle, to maintain an alliance with those tribes and to shield them against attacks by the Iroquois. We visited three of these villages, the Torimans, the Doginga and the Kappa; everywhere we had feasts, harangues, calumet-dances, with every mark of joy. We lodged at the French house,

JOURNEYS OF

where the two gentlemen treated us with all desirable hospitality, putting all at our disposal. Whenever any affairs are to be decided among these nations they never give their resolution on the spot; they assemble the chiefs and old men and deliberate on the point in question. We had asked a periagua and Indians to ascend the River Colbert, and thence to push on to the Illinois by the River Seignelay, offering to leave them our horses, powder and lead. When the council was held it was said that they would grant us the periagua and four Indians, to be selected one from each tribe, in token of a more strict alliance. This was faithfully executed, so that we dismissed our Cahinnio with presents which perfectly satisfied them.

At last, after some time stay, we embarked on the 1st of August, 1687, on the River Colbert, which we crossed the same day in our periagua, forty feet long; but, as the current is strong, we all landed to make the rest of our journey on foot, having left our horses and equipage at the Akansa. There remained in the canoe only the Sieur Cavelier, whose age, joined to the hardships he had already undergone on the way, did not permit him to accomplish on foot the rest of our course (at least four hundred leagues) to the Illinois. One Indian

LA' SALLE

was in the canoe to perch it along, one of his comrades relieving him from time to time. As for the rest of us, we used the periagua only when necessary to cross some dangerous passages or rivers. All this was not without much suffering, for the excessive heat of the season, the burning sand, the broiling sun, heightened by a want of provisions for several days, gave us enough to endure.

We had already traveled two hundred and fifty leagues across the country from St. Louis Bay, viz. : one hundred leagues to the Cœnis (sixty north-northeast, the last forty east-northeast) ; from the Cœnis to the Nassonis, twenty-five to the east-northeast ; from the Nassonis to the Cadodacchos, forty to the north-northeast ; from the Cadodacchos to the Cahinnio and Mentous, twenty-five to the east-northeast ; from the Cahinnio to the Akansa, sixty to the east-northeast.

We then continued our route, ascending the river through the same places which the Sieur de la Salle had previously passed when he made his first discovery, of which I have heard him frequently speak, except that we went to the Sicacha, where he had not been. The principal village is twenty-five leagues east of the Akansa. This na-

Chickasaw

JOURNEYS OF

tion is very numerous; they count at least four thousand warriors; have an abundance of every kind of peltry. The chiefs came several times to offer us the calumet, wishing to form an alliance with the French and put themselves under their protection, offering even to come and dwell on the River Oüabache (Ohio), to be nearer to us.

We crossed the Oüabache, then, on the 26th of August, and found it full sixty days' good march.

This famous river is full as large as the River Colbert, receiving a quantity of others by which you can enter it. The mouth, where it empties into the River Colbert, is two hundred leagues from the Akansa, according to the estimate of the Sieur de la Salle, as he often told me; or two hundred and fifty, according to Monsieur de Tonty and those who accompanied him in his second voyage to the sea; not that it is that distance in a straight line across the prairies, but following the river, which makes great turns and winds a great deal, for by land it would not be more than five leagues to the mouth of the River Illinois, still ascending the Colbert. About six leagues above this mouth there is on the northwest the famous river of the Massourites, or Osages, at least as large as the

LA SALLE

river into which it empties; it is formed by a number of other known rivers, everywhere navigable, and inhabited by many populous tribes—as the Panimaha, who had but one chief and twenty-two villages, the least of which has two hundred cabins; the Pancassa, the Pana, the Paneloga [Pawnees?] and the Matotantes [Ottoes?], each of which, separately, is not inferior to the Panimaha. They include, also, the Osages, who have seventeen villages on a river of their name, which empties into that of the Massourites, to which the maps have also extended the name of Osages. The Akan-sas were formerly stationed on the upper part of one of these rivers [the Ohio], but the Iroquois drove them out by cruel wars some years ago, so that they, with some Osage villages, were obliged to drop down and settle on the river which now bears their name, and of which I have spoken.

About midway between the River Oüa-bache and that of the Massourites is Cape St. Anthony. It was to this place only, and not further, that the Sieur Joliet descended in 1673; they were there taken, with their whole party, by the Mansopela. These Indians having told them that they would be killed if they went further, they turned back, not having descended lower than

JOURNEYS OF

thirty or forty leagues below the mouth of the Illinois River.³

I had brought with me the printed book of this pretended discovery, and I remarked all along my route that there was not a word of truth in it. It is said that he went as far as the Akansa, and that he was obliged to return for fear of being taken by the Spaniards; and yet the Akansa assured us that they had never seen any Europeans before Monsieur de la Salle. It is said that they saw painted monsters that the boldest would have difficulty to look at, and that there was something supernatural about them. This frightful monster is a horse painted on a rock with matachia,⁴ and some other wild beasts made by the Indians. It is said that they cannot be reached, yet I touched them without difficulty. The truth is that the Miamis, pursued by the Matsigamea, having been drowned in the river, the Indians ever since that time present tobacco to these grotesque figures whenever they pass, in order to appease the Manitou.

I would not be inclined to think that the Sieur Joliet avowed the printed account of that discovery, which is not, in fact, under his name, and was not published till after

[³ No authority for this statement.]
⁴ An old term for paint used by the Indians.

LA SALLE

the first discovery made by the *Sieur de la Salle*. It would be easy to show that it was printed only on false memoirs, which the author, who had never been on the spot, might have followed in good faith.⁵

⁵In this short passage a heavy charge is brought against the narrative of *Father Marquette*, although it is amusing to see how they all, in denying it, seem to have dreaded to mention his name, as though his injured spirit would have been evoked by the word.

As *Father Anastasius* says expressly that there is not a word of truth in it, we may examine the grounds which he adduces.

1st. It was not published till after the discovery made by *La Salle*. This is incorrect. *Theve* not published *Marquette's* journal from a mutilated copy in 1681, and *La Salle* reached the mouth of the *Mississippi* only in April, 1682, while his discovery was not known in France before January, 1683.

2d. *The Arkansas* said that they had never seen any European before *La Salle*. Making every allowance for the difficulty of conversing with a tribe whose language was utterly unknown to him, and admitting the fact, it remains to show that the *Arkansas* whom he met were the same as those visited by *Marquette*. This does not appear to be certain, as they were on different sides of the *Mississippi*.

3d. The painted rock, of which he exaggerates and refutes *Marquette's* account. Now, though *Father Anastasius* had the book of the pretended discovery in his hand, he did not read it carefully. *Marquette* describes a rock above the mouth of the *Missouri*, *Anastasius* saw another below the mouth, and halfway between it and the *Ohio*, and, as it did not answer *Marquette's* account, there is not a word of truth in his book! *Joutel*, whose work appeared only in 1713, avoids this difficulty; whether conscious of *Douay's* error,

JOURNEYS OF

At last, on the 5th of September, we arrived at the mouth of the Illinois River, whence they reckon at least a hundred we do not know. From the words of Father Anastasius I am inclined to think that they never saw Marquette's rock, but, deceived by Thevenot's map, which gives a figure and the word Manitou at the place below the Missouri, which Marquette mentions as the demon of the Illinois, mistook it for the painted rock. Here, as Father Anastasius tells, some Indians actually perished, and their countrymen, supposing them engulfed by some demon, propagated the belief in the existence of one there. This worshipping of rapids was common, and several cases are mentioned in the narratives of the time. As to the exaggerations made of Marquette's account, a moment's examination will show that he represented the figures he saw as terrible to superstitious Indians, and so high up on the rock that it was not easy to get up there to paint them. His estimate of the skill displayed is, indeed, too high; but there is nothing, beyond this, strange in his account.

4th. Last of all comes his positive assertion that Marquette and Joliet went only as far as Cape St. Anthony, thirty or forty leagues below the mouth of the Illinois. For this he gives no authority; but it may be inferred that he found the Mansopelas there, and, from his little knowledge of the Indians, concluded that, being there in 1687, they must have been there in 1673, and, consequently, that Marquette went no further.

Enough, however, is here admitted to convict the author of the *Établissement de la Foi* of injustice to Marquette, whom he never names, but who, even by their own statements, descended the Mississippi to the Mansopelas many years before La Salle's expedition. Yet in the previous part of the work no mention at all is made of this voyage, and no opportunity passed to treat it as pretended in the accounts of their own.

Joutel, whose narrative was published subse-

LA SALLE

leagues to Fort Crèvecoeur, the whole route presenting a very easy navigation. A Shawnee named Turpin, having perceived us from his village, ran on to the fort to carry the news to the Sieur de Belle Fontaine, the commander, who would not credit it; we followed close on the Indian and entered the fort on the 14th of September. We were conducted to the chapel, where the *Te Deum* was chanted in thanksgiving, amid the noise and volleys of the French and Indians, who were immediately put under arms. The Sieur de Tonty, the governor of the fort, had gone to the Iroquois to conciliate the minds of those Indians; we, nevertheless, received a very cordial welcome, the commandant neglecting nothing to show his joy at our arrival, to console us in our misfortunes and restore us after our hardships.

Although the season was advanced, we had, nevertheless, set out in hopes of reaching Quebec soon enough to sail for France; but, head winds having detained us a fortnight at the entrance of Lake Dauphin, we had to give it over and winter at the fort, quently to this, mentions (see *Hist. Coll. of Louisiana*, Vol. I., p. 182) Father Marquette, and, though he saw nothing extraordinary in the painted figures, does not make any of the charges here brought by his companion on the voyage, whom he contradicts directly on two other points.

JOURNEYS OF

which we made a mission till the spring of 1688.

The Sieur de Tonty arrived there at the beginning of winter with several Frenchmen. This made our stay much more agreeable, as this brave gentleman was always inseparably attached to the interests of the Sieur de la Salle, whose lamentable fate we concealed from him, it being our duty to give the first news to the court.

He told us that at the same time that we were seeking the River Mississippi by the sea he had made a second voyage, descending the river with some French and Indians to the mouth, hoping to find us there; that he remained there a week, visited all the remarkable points, and remarked that there was a fine port, with a beautiful entrance and wide channel, and also places fit for building forts, and not at all inundated, as he had supposed when he descended the first time with the Sieur de la Salle, adding that the lower river is habitable and even inhabited by Indian villages; that ships can ascend the river a hundred leagues above the gulf; that, besides the tribes which he had discovered when descending the first time, he had seen several others on the second, as the Picheno, the Ozanbopus, the Tangibao, the Otonnica, the Mausopelea, the Mouisa,

LA SALLE

and many others which I do not remember.

Our conversations together confirmed me in the opinion of the Sieur de la Salle, that St. Louis Bay could not be more than forty or fifty leagues from the mouth of one of the arms of the River Colbert in a straight line, for, though we struck the river only at the Akansa, it was because we took the Illinois route across the country, God having led us through these parts to enable us to discover all those tribes which dwell there.

I had remarked one hundred and ten populous nations on my route, not including a great many others of which I heard in those through which we passed, who knew them either in war or in trade. The greatest part of these tribes are unknown to Europeans.

These are the finest and most fertile countries in the world, the soil, which there produces two crops of every kind of grain a year, being ready to receive the plow. From time to time there are vast prairies where the grass is ten or twelve feet high at all seasons; at every little distance there are rivers entering larger ones, everywhere navigable and free from rapids. On these rivers are forests full of every kind of trees, so distributed that you can everywhere ride through on horseback.

JOURNEYS OF

The chase is so abundant and easy, especially for wild cattle, that herds of thousands are discovered; there are deer and other animals of the stag kind in numbers, as well as turkeys, bustards, partridges, parrots, rabbits and hares. Poultry are common there, and produce at all seasons, and swine several times a year, as we observed at the settlement, where we left more than two hundred.

The rivers are unusually abundant in all kinds of fish, so much so that we took them at the foot of the fort with our hands, without basket or net. Our people one day took away from the Indians a fish-head which was alone a load for a man. No settler arriving in the country will not find at first enough to support plenteously a large family, or will not in two years' time be more at his ease than in any place in Europe. I have already remarked that horses for every use are there very common, the Indians thinking themselves well paid when they get an axe for a horse.

The commerce might be very great there in peltries, tobacco and cotton. Hemp grows very fine, and as the fields are full of mulberry trees, which also line the rivers, silk might be raised in abundance. Sugar canes would succeed there well, and could be eas-

LA SALLE

ily got by trade with the West Indies, as the European nations have done in Terra-firma, where they are neighbors to Louisiana.* Besides, the great quantity of wool with which the cattle of the country are loaded, the vast prairies everywhere afford means of raising flocks of sheep, which produce twice a year.

The various accidents that befell us prevented our searching for the treasures of this country: we found lead quite pure and copper ready to work. The Indians told us that there were rivers where silver mines are found; others wished to conduct us to

*These observations from which Coxe (*Hist. Coll. of Louisiana*, Vol. II., pp. 262-'65) doubtless took a hint, entitle Father Douay to the credit of pointing out sources of wealth to Louisiana. Cotton and sugar are already staple products, and silk may soon be. The valley of the Mississippi owes the introduction of the sugar-cane to the Catholic missionaries, for the Jesuits brought in some plants from which the colony was supplied, after they had shown in their gardens at New Orleans how successfully it could be raised. The same missionaries were also the first to raise wheat in Illinois, and engage others to do so, as one of their lay-brothers was the first to work the copper mines of Lake Superior, to make articles for the church of Sault St. Mary's. In the East they deserve no less a place even in commercial history; they not only called the attention of New York to her salt springs, and brought about a commercial intercourse between the French of Canada and the English and Dutch in their colonies, but, by showing the identity of our ginseng with that of Tartary, enabled France for some time to carry on a very lucrative trade with China

JOURNEYS OF

a country known to the Spaniards, abounding in gold and silver mines. There are also some villages where the inhabitants have pearls, which they go to seek on the sea-coast, and find, they say, in oysters.

We found few nations within a hundred and fifty or two hundred leagues of the sea who are not prejudiced against the Spaniards on account of their great cruelty. These tribes are all populous, and there is one which, in war, would furnish as many as five thousand men.

The shortness of our stay among these tribes gave us no time to lay solid foundations of Christianity, but we remarked good dispositions for the faith; they are docile, charitable, susceptible of good impressions; there is even some government and subordination, savage though it always be. By the help of God religion might make progress there. The sun is their divinity, and they offer it in sacrifice, the best of their chase, in the chief's cabin. They pray for half an hour, especially at sunrise; they send him the first whiff of their pipes, and then send one to each of the four cardinal points.

I left St. Louis Bay on the second voyage, to remain among the Cœnis and begin a mission there. Here Father Zenobius was to join me, to visit the neighboring tribes,

LA SALLE

while awaiting from France a greater number of gospel laborers; but the melancholy death of the Sieur de la Salle having compelled me to proceed, Father Zenobius no doubt went there to meet me, and is, perhaps, there yet with Father Maximus (Le Clercq), having left M. de Chefdeville at the mission in the fort, to which he was destined at our departure. There were there nine or ten French families, and, besides, several of our people had gone to get and had actually married Indian women to multiply the colony. What has befallen them since I do not know.

This, adds Le Clercq, is a faithful extract of what Father Anastasius could remember of his toilsome voyage. He left the Illinois in the spring of 1688 with M. Cavelier, his nephew, the Sieur Joustel, and an Indian now domiciled near Versailles. They arrived at Quebec on the 27th [29th] of July and sailed for France on the 20th [21st] of August, where, God enabling them to be still together, after having passed through so many perils, they presented an account of all to the late Marquis of Seignelay.

JOURNEYS OF

CHAPTER XII.

I.

CAVELIER'S ACCOUNT OF LA SALLE'S VOYAGE
TO THE MOUTH OF THE MISSISSIPPI,
HIS LANDING IN TEXAS AND MARCH TO
THE MISSISSIPPI.

[PART I. TO APRIL, 1686.]

RELATION OF M. CAVELIER.

MONSEIGNEUR:

July, 1684.—You have here the relation of the voyage undertaken by my brother to discover in the Gulf of Mexico the mouth of the Mississippi. An unexpected and tragical death having prevented his completing it and reporting to your lordship, you will, I trust, approve of my taking his place.

In the month of July, 1684, we left La Rochelle in four vessels, with very fine weather. The season seemed to promise us a continuance thereof, and should not, in all probability, lead us to fear either a calm or great heats. Nevertheless, the close of the month brought a storm, which dismayed the vessel my brother was in and compelled us all to put back to the port from which

LA SALLE

we had started. We set sail again, and a few days after a second storm dispersed our little fleet; the St. Francis was taken by Spanish cruisers and the other three got together only in Petit Goave, in St. Domingo. I will not give your lordship the detail of our course or manœuvres to that point, as that is not my profession.

If these unfortunate accidents dampened the ardor of our adventurers, the conduct of M. de Beaujeu, captain of a ship of the line, who commanded one of the ships of the fleet, did so no less; and if your lordship takes pains to examine, you will find that that officer, jealous of my brother's having the principal authority and the direction of the enterprise, so traversed it that the failure may be attributed to him.¹

July, 1684.—We made some stay at Petit Goave to give our crew a little refreshment and to prepare to carry out the project conveniently. There M. de Beaujeu began to employ all means that he could invent to prevent my brother from going further. Nevertheless, we set sail towards the latter part of November, intending to reconnoitre the land ten or twenty leagues north of the river; but, head winds having forced us

[¹ The documents published by Margry present a more favorable view of Beaujeu.]

JOURNEYS OF

back several times, my brother at last determined to explore Florida, whatever point we made; but M. de Beaujeu did not follow him. He abandoned us, under pretext of having been surprised by a squall.

1685.—On the 6th of January² we made the coast of Florida, and, supporting ourselves north of the mouth of the river, we sailed southerly along the coast, crowding sail, for fear of being forced by the currents into Bahama channel. Some days after, on taking the altitude, we found ourselves fifty leagues south, which obliged us to turn back and retrace our steps. Still coasting along, we discovered Espiritu Santo Bay Feb. 4 [February 8th], where we found M. de Beaujeu. My brother had a long conference with him there, at the close of which the three vessels set sail to pursue the search.

Feb. 1685.—The next morning M. de Beaujeu sent his long boat to my brother to tell him that he had sailed fifty leagues since he left Espiritu Santo Bay, and that, discovering inland a kind of gulf or river; it might be the Mississipy, and that he had no orders to go any further. My brother allowed himself to be persuaded that this might be one of the arms of that river, and, having sent

[² Cf. FRENCH, *Hist. Coll'ns La. I.*, 94. Also Vol. II., page 22.]

LA SALLE

out his boat to sound, he found three and a half fathoms of water in the shallowest part of the channel and entered with his vessel. He ordered the pink to unload as much as possible and to wait till he sent a pilot to bring her in; but this was so badly done that she struck on a sand-bar and could not get off.

Meanwhile M. de Beaujeu, who had anchored off, wrote to my brother and sent the letter by his lieutenant. He told him that, having reached the mouth of the Mississippi, he believed that he had sufficiently fulfilled his duty; that, having seen the pink perish before his eyes, he did not think it proper to risk entering the river with his ship, for fear of a like mishap; that, having no more provisions or refreshments, he was determined to return to France, and he begged him to send his letters for the Court, with his exoneration from all accidents that had happened or might thereafter happen. My brother most generously granted all.

March 14, 1685.—Monsieur de Beaujeu having accordingly hoisted sail for France, my brother undertook to do three things at once: One was to make a storehouse on shore to lay up his ammunition and provisions, merchandise and other things; the other was to go himself with thirty or forty

JOURNEYS OF

men to select a suitable place for a settlement at the end of the bay, and the other to bring his vessel as far as he could into the bay. All this was executed, for the vessel was brought up to the mouth of a river to which the name of *Vache* (Cow)³ was given, on account of the number of that animal found there, and here he built a little fort of fourteen guns, with small but pretty convenient houses and storehouses sufficient to contain all that he had.

Meanwhile my brother, originally under the idea that the river we were in was one of the arms of the Mississippi, on account of the quantity of reeds it bore down to the sea, at last saw his error and formed the design of discovering it by land; but unable to leave his fort without exposing it to the insults of the nearest Indians, who were waging a cruel war on us⁴ (believing us Spaniards), he endeavored to gain their confidence and friendship. Your Lordship knows that he has an admirable tact for that. He employed it so adroitly in this conjuncture that before the close of July we mutually visited each other. We often went to their village,⁵ which was quite near

[³ Later called by its Spanish equivalent *La Vaca*, a name which it still bears.]

⁴ They killed ten men with arrows.

⁵ These Indians are called the Bracamos.

LA SALLE

our fort (which we will in future call Fort of St. Louis Bay)⁶, and one day they offered to guide my brother to a neighboring nation, their ally, only about fifteen leagues off, to show him, they said, curious things. My brother accepted their offer, thanked them for the friendship they testified and made them some presents; after which, setting out to the number of twenty-four,⁷ accompanied by a troop of Indians, we arrived at a large village, surrounded by a kind of wall made with potter's clay and sand, fortified with little towers at intervals, where we found fastened to a post the arms of Spain engraved on a copper plate, dated 1588.

The people welcomed us and showed us some hammers and an anvil, two small pieces of iron cannon, a small bronze culverine, spearheads, old sword blades and some volumes of Spanish comedies; and leading us thence to a little fishing hamlet about two leagues off, they showed us a second post, also bearing the arms of Spain and some old chimneys.⁸ All this convinced

[⁶ Now the Matagorda.]

[⁷ La Salle made a brief excursion in the spring of 1685 and a more extended one in the fall of that year. Cf. Vol. II., Chap. III.]

⁸ There is no known authority for any such early occupation of Texas.

JOURNEYS OF

us that the Spaniards had been there before. They also gave us to understand by signs that the Mississippi River was very difficult to find, because its mouth could not be perceived a league off. They then drew vessels with coal, and gave us to understand that many passed along their coast.

Having taken leave of these Indians, to whom we made some presents and courtesy for courtesy, we returned to our fort at St. Louis Bay, where we made some stay to cultivate more and more the confidence and friendship of our Bracamos (so is the Indian nation called that dwells near our fort), in order to leave protectors to the people whom we would have to leave in the fort while we went overland to seek the Mississippi.

We observed during our stay that the east winds generally prevail by day and west winds by night; that the least speck of cloud forebodes a violent gale, which will last an hour at most; that the north winds (which the Spaniards there dread immensely) are not so violent as the west winds which the fishing smacks stand in winter time on the Banks of Newfoundland; and lastly, that the tide rises here very slightly. We saw quantities of salt, formed naturally in various spots, which led us to

LA SALLE

infer that it would be easy to make successful salt works.

Having, then, provided for the security of the fort by the friendship of the neighboring Indians, by arms and ammunition, and for the subsistence of the people whom we left there by the provisions and goods which remained, and after my brother had recommended vigilance, patience and devotion to the King's service, we set out on the first of November,⁹ accompanied by thirty men, carrying only our arms, ammunition for game, and some trifling articles for the Indians.

Ten or twelve days after we found a very populous village, where the men and women wore large pearls hanging from the cartilage between the two nostrils. I bought a few in order to show your Lordship. I have already shown them to Catillon, lapidary at Paris, who assured me that they were of the finest water in the world, but imperfect in shape. We tried to learn from these Indians the place whence they drew this precious merchandise, but, being able to understand us only by signs, we could only presume that they got them from the sea when they went to catch fish, for they

⁹ Nov. 1, departure of M. de la Salle to discover the mouth of the river by land.

JOURNEYS OF

showed us large pirogues and nets which apparently were solely for this use. We have since learned that many small rivers which pass through their country empty into St. Louis Bay.

December and January.—Having left this nation, we ran for two months in search of our river, with no hope of finding it, finding only Indians, whose manners kept us in perpetual distrust; we did not dare to make any stay in any place for fear of some surprise. *February, 1688 [1686.]* The continual marching, the rigor of the season and the fears that we had conceived from the reserved and distrustful manners of the Indians made us undergo hardships that it would be difficult for me to express.

In the beginning of February we came to a pretty large river, which my brother thought might be the Mississippi, although its course was just the opposite. Our sentiments were different; we followed its banks for two days, without meeting man or beast.

Some days after, having perceived a village, we deemed proper to fire a volley before entering, in order to alarm the Indians and put them to flight, so as to take from their cabins what Indian corn we needed. This having been executed, we left them

LA SALLE

payment on the spot, after which we left to continue our search.

We had scarcely made a league when we perceived two Indians running after us. We first thought the villagers, charmed with the beauty of the knives, scissors and needles that we had left in payment, had deputed them to bring us back; but we were greatly surprised when we saw these Indians fall on my brother and almost stifle him by their embraces in the transport of pleasure which they experienced on seeing him again. They were two Shawnees of three whom my brother lost when he descended to the mouth of the Mississippi by the Illinois River.¹⁰ They told us that their comrade was sick in the village, to which they begged us to return, assuring us of the humanity and good faith of the people. My brother was sincerely pleased to find them again, and, in hopes of learning from them what he desired, he made no difficulty of resolving to follow them. They took us first to their cabin, where we found their comrade. They made us take up our quarters there while a larger cabin was preparing for us nearby.

They told us that, having gone out to hunt while in my brother's service, they

¹⁰ It was in 1682.

JOURNEYS OF

were surrounded and taken by thirty or forty warriors of the village where we were, who carried them there without binding them; that the whole nation, and even their allies, had greatly honored them and held them for something more than men on account of the power of their guns; that they wondered to see them kill a bison a hundred paces off, and several turkeys at a single shot, but that when their ammunition failed these people pressed them to make more and ridiculed them because they had not the secret of making it. They also told us that they had married in this village, and that they had no difficulty in learning the language. They then took us to a large cabin, where we were conveniently lodged.

It was from these three Indians that we learned that we were only forty leagues from the sea; that the Indians among whom we were made war on others who had intercourse with the Spaniards, distant about one hundred and thirty leagues from the sea; that there was a river [30] leagues from us more beautiful than the Mississippi,¹¹ and two others, fifteen or twenty leagues, in which gold was found in large grains and in dust; that the Indians used it only to make collars and bracelets, but that they valued it

¹¹ 30 L. They meant the Rio Bravo.

LA SALLE

less than certain red stones which they put to the same use.

They¹² added: We have been to war against the nation that has intercourse with the Spaniards and took some prisoners, who were neatly dressed in silk. They told us that the Spaniards furnished them their clothes and many other things in exchange for certain stones which they prized highly. They directed us to the spot whence they took these precious stones, and, as we could pass by it without deviating much from the route we had to take back to our village, we easily persuaded our troops, as curious as ourselves, to go there. The prisoners acting as guides, we reached a hill which may be two leagues long, where they showed us some holes made by the Indians, from which we took some specimens of stone¹³ which we have kept. This hill lies about forty leagues from our village and is near a little river which empties in a larger one,¹⁴ which, coming a great distance and passing between two ranges of hills, empties into the Gulf of Mexico. The Spaniards have several villages on the southern part of this river, and

¹² It is the Shawnees that speak.

¹³ M. Cavelier took some to Paris, where the body of goldsmiths assayed them by the King's order and found that it was gold ore, which had only half waste.

¹⁴ Rio Bravo.

JOURNEYS OF

the Indians who make war on them cross over and make captures along the road,¹⁸ which they frequent with little precaution.

February, 1688 [1686].—They assured us that there was not a nation for a hundred leagues around but feared the inroads of the Spaniards; that they dreaded them on account of the frightful stories told of their firearms; that this consideration alone had prevented their leaguings together to undertake to carry a town, lacking neither desire, courage nor means of uniting; that for this purpose they could bring together one hundred thousands warriors and ten thousand horses, without going fifty leagues from their village; that this army could subsist, even without supplies of provisions, by the quantity of bison, small game and fish found everywhere by merely dividing into troops of ten thousand men and giving two leagues of land to each troop, and always camping in beautiful prairies with which the country abounds; that even if we wished to lay up provisions of Indian corn, peas or beans, it could easily be done, as the earth produces plentifully without being sowed or cultivated; and, finally, that the country is full of all sorts of excellent fruit, which would

¹⁸ Apparently the road from Old to New Mexico.

LA SALLE

also be a great help. They convinced us that they needed only good leaders and some regular troops to instruct them, arms, saddles, bridles and ammunition. On this my brother having asked them on which side they would attack the Spaniards, they replied that it was beyond that great river¹⁶ of which they had spoken to us, where there were several cities and villages, some open and others fortified merely by palisades, which it would be easy to force, the more easily as the Indians had often got the upper hand of them; that the year before they had killed or taken over two thousand persons and forced them to send religious to exhort them to peace.

They told us, moreover, that the Spaniards had more than thirty gold and silver mines in different parts of the country which they durst not work on account of the proximity of nations that they were at war with.

That the climate of the country northward and eastward of the great river¹⁷ was perfectly beautiful, and so healthy that men died there only of old age or smallpox; the land so fertile that, unsown, untilled, it produced two crops of Indian corn and three of

¹⁶ Rio Bravo.

¹⁷ Rio Bravo.

JOURNEYS OF

peas or beans a year; that they were told that the other side of the river was neither fertile nor healthy.

That there was near by a nation that made cloth of nettles, wild flax and the bark of trees, and who manufactured cloth of buffalo wool; that they give the finest colors in the world to all their fabrics; in fact, they gave us earth¹⁸ of all colors, which we took to France that there were other nations¹⁹ to the northwest who had kings and chiefs and observed some forms of government, honoring and respecting their kings as Europeans do theirs.

That there were some on the east²⁰ so fierce that it never had any communications with the others and so cruel that they devoured each other.

That about fifty leagues from the spot where we were, were two or three mountains on the banks of a river, from which were taken red stones as clear as crystal. They gave us some of it and some gold ore, which we took to France.

February, 1685 [1686].—After they had related all this my brother wished to induce

¹⁸ The Paris dyers were amazed to see the quality of this earth.

¹⁹ These were the Panismahans [Pawnee-Mahas] and the Ontotonta [Ottoes].

²⁰ Florida, apparently.

LA SALLE

them to follow him, to return to their own country; but they answered him that they were not unnatural enough to abandon their wives and children; that, moreover, being in the most fertile, healthy and peaceful country in the world, they would be devoid of sense to leave it and expose themselves to be tomahawked by the Illinois or burnt by the Iroquois on their way to another where the winter was insufferably cold, the summer without game, and ever in war, but that if the French built or established any colony in the Mississippi that they would approach it, and that they would have the pleasure of rendering them considerable services.

Towards the close of January we parted from our honest Shawnees, who could not accompany us to the Mississippi for fear of being suspected of wishing to follow us, but they induced ten or twelve warriors to lead us. On the 10th of March we descried the River Mississippi,²¹ where we left some men in a little redoubt of pickets, which we made ourselves, and, retracing our steps, we passed again through the village of our Shawnees, where we were regaled as well as these good people could regale us, and, continuing our march, we reached St. Louis

²¹ It is not at all probable that La Salle reached the Mississippi. Cf. Joutel, *Preface to 1714 Edition*.

JOURNEYS OF

Bay on the 30th of the month of March,
1685 [1686].

Return of M. de la Salle.

Our people received us with all possible joy, and we experienced much pleasure to find them all in good health; but our joy was soon marred by the most distressing accident in the world, for our frigate, eight or ten days after our arrival, struck and perished with all on board, except eight men. The loss which we had sustained of ten men, the best sailors we had on board, who were killed with arrows by the Bracamos at the time they made war on us, supposing us to be Spaniards, was surely the cause of the loss of the vessel, which, perhaps, lacked experienced people. In fine, the chagrin which my brother experienced at the loss joined to the hardships which we had undergone during our painful march, brought on a malady which nearly took him out of the world and overwhelmed our little party with despair. In fact, my Lord, after the loss of the vessel, which deprived us of our only means of returning to France, we had no resource for our subsistence except my brother's good management and firmness, and each of us regarded his death as his own, for we beheld ourselves cast

LA SALLE

away in a savage country, without assistance and cut off by immense distances from every Christian nation.

My brother recovered at last, and when his health was perfectly restored he proposed to undertake to reach Canada by land, so as to come to France to report what he had done. The way is long, painful and dangerous beyond all that can be expressed to the contrary, so the least hardy durst not undertake it. These my brother left in charge of the fort, with necessary provisions, commending them to remain strongly attached to the King's service. He formed a party of those who were disposed to follow him. Father Athanasius [Anastasius Douay], my nephew, Moranget; my brother's godson, two Shawnee Indians, who had followed my brother to France, and I were of the party.

CHAPTER XIII.

[CAVELIER'S ACCOUNT, PART II. LA SALLE'S
LAST TWO JOURNEYS.]

WE started on the 13th of April, 1685¹ [1686], and laid our route so as to pass by

¹ April 13, 1685—First departure of M. de la Salle for Canada by the Illinois.

JOURNEYS OF

the Illinois, where we had resolved to rest. It seems to me unnecessary to speak here of the minutiae of our march, and I will merely say in general the most remarkable things that we saw and observed. We were very kindly and affectionately received by all the nations that we passed through; we had plenty everywhere; we received presents and were supplied with guides and horses. Among these nations, the Senis² [Cenis]³ seem to us the most numerous and polished; it is governed by a king, or cacique, and the subordination that we remarked among them made us infer that they had officers; the houses are built with order and very prettily, and they have the art of making a cloth of feathers and the hair of animals. We found there silver lamps, old muskets and Spanish sword-blades. Having asked them by signs where they got them, they took a coal and depicted a Spaniard, houses, steeples, and showed the part of the heaven under which New Mexico would lie.

M. de la Salle Arrives at the Fort of St. Louis Bay.

On leaving this village my brother, our nephew and three soldiers were greatly

² Senis, a very civilized nation of Indians.

³ The "Texas" Indians of the Spaniards.

LA SALLE

troubled by certain strange fruits which they had eaten too freely. They all took the fever, which did not leave them till two months afterward. My brother was so affected and weakened by it that we did not dare to proceed, but, retracing our steps, returned after forty days to the fort in St. Louis Bay,⁴ where we were received with all possible joy by our people and by the Bracamos, who came first to visit us and brought us a quantity of deer.

The attempts which we had made to go to Canada not having succeeded, we turned our hopes to the aid that the King might send us from France, and we patiently awaited it till the close of the year 1686; but at last, weary of being deprived of the society of our countrymen, and banished, as it were, to the uttermost parts of the earth, we regarded this agreeable country only as a tedious resting place and a perpetual prison, feeling satisfied that had not the King deemed us lost he would have had the goodness to send some one to continue the exploration which we had undertaken or to carry us back to France. We often made vague conjectures, which served only to afflict us, and at last, when the beginning of

[⁴ In October, 1686. For details of this journey see Vol. I., Chap. X.]

JOURNEYS OF

1686 [1687] came, my brother proposed to make a second attempt. As all minds were full of the desire of again beholding France, his eloquence was required only to persuade some of our people to remain in the fort. He portrayed to them the hardships and dangers to be encountered, the impossibility of subsisting if they all went together on so long a march, with no resource but hunting. He succeeded so well that a part determined to keep the fort, and my brother took only twenty-eight⁵ of the most vigorous, among them Father Athanasius, our nephews, Cavelier and Moranget my brother's godson, the pilot of his vessel and myself.

Second Attempt to Reach Canada by Land.

We started on the 6th [or 12th] of January (after hearing mass and performing our devotions, and exhorting the people who remained to watch the safekeeping of the fort, promising soon to return with help from France) and went to sleep at the village of the Bracamos.

The 7th we made five or six leagues' progress through canes and reeds.

The 8th we made also five or six leagues in more clear and level country.

⁵ Others give 20 and 17.

LA SALLE

The 9th we arrived at the village of the Kouraras, where we tarried two days. There we saw a party of seven or eight hundred warriors, who were bringing in one hundred and fifty prisoners in triumph. We saved some who were going to be cast into the water, bound hand and foot.

The 12th we crossed a river on a raft with much risk. The fear that we had experienced was not yet dissipated, when all at once a band of Indians, rushing desperately on us, revived it in a still more intense degree; but these good people, far from harming us, took us to their cabins, where they gave us several kinds of meat to eat and offered us pipes and tobacco. While we were engaged in smoking they began to sing and dance in a very curious manner, and stopped only when we departed. We made six leagues that day.

The 15th we resumed our march, although our good and honest hunters made every effort to keep us at least till next day. They gave us an escort of twelve men, who accompanied us four leagues from the village and confided us to other hunters, who treated us in the same manner as the first during the two days that we were in company.

The 16th we marched six or seven leagues

JOURNEYS OF

in beautiful prairies, studded with little groves at intervals, and at evening we encamped on the banks of a little stream.

The 17th, in the morning, when about to march, we perceived one hundred and fifty Indians, all on horseback, armed with lances tipped with sharpened bone, well tied and encased, each of whom attacked a bull. No sooner had they perceived us when some of them left the party and came to welcome us, after dismounting. They at first regarded us with astonishment, and, after having examined us, they uttered extraordinary exclamations. They then made us mount, the more conveniently to witness the close of the bull-fight, which seemed to us the most diverting thing imaginable, and I am convinced that there is no chase as curious in Europe. When the combat was ended by the death of several animals the combatants came galloping to us and, giving many tokens of surprise and joy at meeting us, they led us away to their village. Their frank and cordial manners made us follow them without repugnance. They often uttered the word Kanoutinoa,* pointing to themselves; this made us suppose that it was the name of the nation. They took us straight to the cabin of their great chief, or

* Cf. SHEA, *Early Voyages*, 36, note.

LA SALLE

captain, where they first washed our heads, hands and feet with warm water, after which they presented us boiled and roast meat to eat and an unknown fish, cooked whole, that was six feet long, laid in a dish of its length. It was of a wonderful taste and we preferred it to meat. They told us by signs that they were abundant and came from a distance, ascending the river.

We bought at this place thirty horses, which mounted us all and carried our baggage. They cost us thirty knives, ten hatchets and six dozen needles. On the 19th we crossed the river on their boats and our horses swam over. We made that day four or five leagues and encamped on a spot where there was grass to pasture our horses, which we tied to good stakes.

On the 20th, about two leagues from the spot where we had passed the night, we found quite a well-beaten path; we followed it because it ran in the direction in which we had resolved to go. We saw there four old women and four young girls, who passed by us weeping and tearing their hair, without having curiosity enough to look at us. This seemed to us an ill omen, but we paid no great attention to it. The next moment we saw a crowd coming towards us; we first put ourselves in a state of defense,

JOURNEYS OF

prepared for all hazards; but these people, instead of approaching us, fled, and we pursued our way, and in the evening reached a village, the cabins of which were made of canes interlaced and whitened with very fine plaster. The Indians, in alarm, took flight, but, seeing that we encamped near their village, without doing them any harm, and that we made them signs to return, they gradually approached us, and finally ventured to enter our tents of grass and branches of trees. We made them some little presents. The next day they took us to their village. It seems to me that they said they were called Ticapanas [Tyakappan].

Indians Speaking Spanish.

They brought us one of their number who spoke Spanish, and, some boys whom we had in our party acting as interpreters, we learned many things from him which I will relate to your Lordship in the collection of memoirs of my brother.

On the 22d we continued our march, and after fording the river, led by five Indians, we entered a valley (five leagues from our starting point), which, though it was mid-winter, was full of fruit trees, flowers and a prodigious quantity of birds of various

LA SALLE

kinds. We encamped there in a favorable position to pass the night, while our Indians came back from the hunt loaded with turkeys. They gave us a long account of this valley, but we could not understand a word of it.

On the 23d they took us to the great village of the Palomas [Palonas]; which is ^{partially a} ~~surrounded~~ ^{cañado built} by palisades of cane. Our guides were there questioned about us. We inferred that they answered that we had not the air of being Spaniards; we do not know what they believed, for they lodged us in a great cabin outside the village, where they brought us more than thirty handsome maidens of their village. We pointed up to heaven, making signs that it was an execrable custom, but, not understanding us, they thought that we were talking of the sun, for they instantly placed their hands on their foreheads and fell flat on the ground, looking up to it, and the young men uttered fearful cries; seeing that, we fled from the persecution of these wantons. This nation seemed to us more gross and ill made than the others.

On the 24th we left it and wished their canoes to cross a large river that ran at the foot of their village, but they advised us to ascend the river, giving us to understand

JOURNEYS OF

by signs that we would infallibly be killed on the other side if we crossed the river. We could not learn whether they were beasts or men that we had to fear. They gave us a periagua, in which we put twenty men, and the eight others took the horses by land. After five days' sailing and marching we saw some Indians fishing, and, although there were only seven or eight of them, instead of fleeing they ran up to receive us. We recognized them as a nation called Alakea, among whom we had passed the first time we were in the nation of the Senis. They took us to their village, where we were received with all possible affection. They kept us among them six days, and then, having aided us to cross the river in little boats of buffalo skins sewed together, they took us to the village of the Akafquy [Palaquesson, Palachechaune], who, knowing us by reputation, were glad to have us pass by their village. At this place we saw about sixty hermaphrodites, for the most of them go entirely naked after sunset. We there also saw them make cloth with buffalo wool, and a stuff which seemed to us the richest in the world, so singular was it, for it is made of birds' feathers and the hair of animals of every color.

On the 27th we started from Akafquy to

LA SALLE

go to the Penoy, where we arrived on the 29th.

On the 30th we went to sleep at the village of Saffory [Assonis?], where we were received with the same friendship as in the others. We remained there one day, and we had the pleasure of seeing an alligator twelve feet long captured. The Indians employed a hook made of a buffalo bone tied to the end of a cord, studded with small bones, so that he cannot bite through, and they use no bait but a piece of meat on the hook. The Indians, who wished to amuse themselves with it, put out its eyes and led it into a prairie, after tying its head to its tail and tying it around the body with three different cords, made of bark of trees, and passed around in slip-knots, and after tormenting it in various ways for full four hours they turned it belly up and confined it from head to tail by eight stakes, planted so that the animal could not move in any direction. In this condition they flayed him, and then gave him liberty to run, to have the pleasure of tormenting him more. This sport lasted all day, and ended with the death of this frightful beast, which they killed and gave to their dogs. We saw many skins of this animal thrown about, which made us infer that there were many

JOURNEYS OF

in that river. We crossed it, however, by the help of the Indians, who, having led us to the river bank and yelled for half an hour to frighten and drive off these animals, swam over, after putting us in a canoe; our horses, accustomed to follow us everywhere like dogs, also swam over.

On the evening of the 1st of February we reached the village of Tipoy, where the people, otherwise well made, have the top of the head quite flat, caused by the mothers putting on their children's heads flat pieces of wood lined with wool, which by a gentle pressure give them this shape.

On the 2d, Candlemas Day, we left this village, led by a Tipoy Indian, and on the 3d we reached the village of our good friends, the Anamis, who had hospitably received us on our previous excursion. We had the chagrin to find their village half-burnt down. They gave us to understand by signs that a hostile party which surprised them had spread this desolation, and that they would have burnt it all had they not alarmed them by firing on them with two guns and some ammunition that we had left them; that, never having seen or heard of such arms, the fear they inspired put them to flight.

On the 4th we set out, and on the 8th we

LA SALLE

arrived at the great village of the Senis.[†] (*Castile*) This is a nation that occupies a territory eighteen leagues long. We were received at the entrance of the village and conducted to a large and beautiful cabin, where we were at first entertained with a right curious symphony. The chiefs supped with us, and we reposed more tranquilly than we had anywhere else.

On the 9th, after a crowd of young men had danced a dance of joy in our cabin, we were taken to that of the prince, for whom they have all possible veneration, submission and respect, for when he went abroad he was borne by eight men on a platform, all the tribe ranged in two lines, both hands on the forehead, uttering a cry of joy or humility; if he went on foot, very clean mats were spread wherever he was to pass.

We left this village for fear that our soldiers should tamper with the women and went to encamp about two leagues off, intending to stay to rest and recruit. The people of the country made us sufficiently exact maps of the neighboring rivers and nations. They told us that they knew the Spaniards, and depicted to us their clothing, and showed us candlesticks, swords,

[[†] The party did not arrive among the Cenis until after La Salle's death.]

JOURNEYS OF

bucklers, daggers and Spanish papers. We are convinced that they are not far off, the more so as the Senis have a number of fine horses.

Feb. 16, 1687.—On the 16th we left this great village for the smaller one of the same nation, twenty leagues off. Thirty well-mounted young warriors took us by as well-beaten a road as that from Paris to Orleans. At intervals we came to little forts in the most exposed positions and everywhere a most level country, extremely well adapted to pasturage.^a

^a Cavelier's narrative ends abruptly at this point, a few days before his brother's death.
